George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

Donald Davidson has prepared a new edition of his classic 1980 collection of Essays on Actions and Events, including two additional essays. In this seminal investigation of the nature of human action, Davidson argues for an ontology which includes events along with persons and other objects. Certain events are identified and explained as actions when they are viewed as caused and rationalized by reasons; these same events, when described in physical, biological, or physiological terms, may be explained by appeal to natural laws. The mental and the physical thus constitute irreducibly discrete ways of explaining and understanding events and their causal relations. Among the topics discussed are: freedom to act; weakness of the will; the logical form of talk about actions, intentions, and causality; the logic of practical reasoning; Hume's theory of the indirect passions; and the nature and limits of decision theory. The introduction, cross-references, and appendices emphasize the relations between the essays and explain how Davidson's views have developed.

This volume brings together revised versions of a selection of papers presented at the 2003 International Conference on "Recent Advances in Natural Language Processing". The papers address different languages (Arabic, English, German, Slavic languages) and use different linguistic frameworks (HPSG, LFG, constraint-based DCG). Document from the year 2018 in the subject English Language and Literature Studies - Literature, University of Saida Dr Moulay Tahar (Department of English), language: English, abstract: Writing is both a challenging and an interesting task that requires much writer's attention, that is, it is a type of communication that expresses ideas and makes a chain between the writer and his readers. Thereby, it is unique, creative, and is done for purpose. Among the most essential forms of academic writings are essays that writers start to learn and write from college. They develop an idea in four or five paragraphs, or in a whole book, but the most commonly used are five paragraphs essays or timed essays because they can be written in class period. 'Lectures on Academic Essay Writing' is a booklet for second year students. It is an outgrowth of teaching academic writing for many years. Our experience as teachers and writers has taught us that writing is the most difficult task that requires much practice. Learning how to write essays needs more basics rather than instructions especially in classrooms. Indeed, classrooms are learning communities that are improved through evaluating their members' writing skills. Henceforth, this booklet provides an unpretentious manner on teaching students how to write different types of essays through practices that reinforce their writing skill and provide them with a supportive learning environment that helps them to be good writers. The first part of the booklet provides a detailed rehearsal of the different stages of essay writing, followed by a part that introduces the different elements of an essay, while the last part displays essential explanations on argumentative, process, cause/effect, and comparison/contrast essays. Hence, this part addresses the writing process from paragraph to essay.

If you're enrolled in an executive education or MBA program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying, challenging, or downright frustrating. In "The Case Study Handbook", William Ellet presents a potent new approach for analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (solving a problem, making a decision, or forming an evaluation) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-analytical essays based on the process laid out earlier. Extensive examples of effective and ineffective writing further reinforce your learning. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs to read this book.
