Americans now obtain college degrees at a higher rate than at any time in recent decades in the hopes of improving their career prospects. At the same time, the rising costs of an undergraduate education have increased dramatically, forcing students and families to take out often unmanageable levels of student debt. The cumulative amount of student debt reached nearly \$1.5 trillion in 2017, and calls for student loan forgiveness have gained momentum. Yet public policy to address college affordability has been mixed. While some policymakers support more public funding to broaden educational access, others oppose this expansion. Noting that public opinion often shapes public policy, sociologists Natasha Quadlin and Brian Powell examine public opinion on who should shoulder the increasing costs of higher education and why. *Who Should Pay?* draws on a decade's worth of public opinion surveys analyzing public attitudes about whether parents, students, or the government should be primarily responsible for funding higher education. Quadlin and Powell find that between 2010 and 2019, public opinion has shifted dramatically in favor of more government funding. In 2010, Americans overwhelmingly believed that parents and students were responsible for the costs of higher education. Less than a decade later, the percentage of Americans who believed that federal or state/local government should be the primary financial contributor has more than doubled. The authors contend that the rapidity of this change may be due to the effects of the 2008 financial crisis and the growing awareness of the social and economic costs of high levels of student debt. Quadlin and Powell also find increased public endorsement of shared responsibility between individuals and the government in paying for higher education. The authors additionally examine attitudes on the accessibility of college for all, whether higher education at public universities should be free, and whether college is worth the costs. Quadlin and Powell also explore why Americans hold these beliefs. They identify individualistic and collectivist world views that shape public perspectives on the questions of funding, accessibility, and worthiness of college. Those with more individualistic orientations believed parents and students should pay for college, and that if students want to attend college, then they should work hard and find ways to achieve their goals. Those with collectivist orientations believed in a model of shared responsibility – one in which the government takes a greater level of responsibility for funding education while acknowledging the social and economic barriers to obtaining a college degree for many students. The authors find that these belief systems differ among socio-demographic groups and that bias – sometimes unconscious and sometimes deliberate – regarding race and class affects responses from both individualistic and collectivist-oriented participants. Public opinion is typically very slow to change. Yet *Who Should Pay?* provides an illuminating account of just how quickly public opinion has shifted regarding the responsibility of paying for a college education and its implications for future generations of students.

FINANCIAL ACCOUNTING: THE IMPACT ON DECISION MAKERS, 10E makes it easy to demonstrate that accounting is a powerful tool for business decision-making by going beyond debits and credits and keeping students focused on the big picture. For example, journal entries in the text and CengageNOWv2 require students to demonstrate the balance sheet and income statement impact of transactions, helping students see how business events ultimately impact the financial statements. In addition to exposing students to annual reports of highly recognizable companies such as Nike, Porter's exclusive Ratio Decision-Model provides students with a framework for reading and interpreting financial statements to make decisions. The focus on financial statements and decision-making carries through to the end-of-chapter with a suite of case materials that have students reading and interpreting financial statements. Finally, new auto-graded problems integrated into CengageNOWv2 build Excel skills by having

students use Microsoft Office Excel Online to solve accounting problems. FINANCIAL ACCOUNTING 10E is available with CengageNOWv2, an online learning solution that better prepares students for the exam by providing an online homework experience that is similar to what students will experience on the exam and in the real-world."

Based on a three-year ethnographic study of a class on the sociology of Latino/a society, this book tells the story of how the students navigated academic life in a predominantly white university to construct their own education. Padilla weaves together journal entries, his own experiences in education, cultural analysis, and theory to create a rich narrative.

The fourth installment in the Excel University series covers the Excel features, functions, and techniques that will help you build reliable workpapers. The first part of this volume explores a variety of useful features, including outlines and protection. We discover that formatting choices impact productivity and learn how to use accounting underlines and custom number formats. We also use hyperlinks to help organize our digital files. The second part examines numerous functions that help make our workbooks efficient to maintain and update each period. Our examination includes lookup functions, text functions, date functions, and alternatives to the IF function. The third part discusses several techniques that combine multiple features and functions. We revisit topics presented in prior volumes in more depth, including conditional formatting, names, wildcards, and tables. The fourth part applies what we know to common accounting and finance tasks. We streamline our journal entries, budgets, and a variety of other common workpapers. The items covered in this volume will help improve your productivity so you can get your work done faster!

During live CPE training sessions, and through Excel articles featured in magazines such as the Journal of Accountancy and California CPA Magazine, Jeff Lenning, founder of Click Consulting, Inc., has shown thousands of CPAs and accounting professionals across the country how to use Excel more effectively. Drawing on his experience as an auditor, a financial analyst in industry, an accounting manager at a public company, and a consultant, he has demonstrated how to leverage Excel in order to improve efficiency by reducing the time it takes to complete job tasks. Written to reach those he won't have the opportunity to meet in one of his CPE sessions, Lenning's series, Excel University: Microsoft Excel Training for CPAs and Accounting Professionals, offers a comprehensive collection of the features, functions, and techniques that are of direct benefit to accountants working in industry, public practice, consulting, or not-for-profit. Concentrating on Excel for Windows, his books offer a hands-on approach to learning and include narrative, screenshots, video content, Excel practice files, and exercises that demonstrate the practical application of the items presented in each chapter. Visit <http://www.clickconsulting.com/books> to access the Excel University video library and to download the practice files. Features, functions and techniques are presented in a sequential and progressive manner, so the books are best read in order. In Volume 1, the author presents material and information that will prove useful to every accountant, regardless of the type of work they do. Blown away by the power of Excel, readers are sure to find this series relevant, enlightening, and extremely easy-to-follow.

A professional perspective to implementing IFRS 10, 11, and 12 The new International Financial Reporting Standards (IFRS) 10, 11, and 12 are changing group accounting for

many businesses. As business becomes increasingly global, more and more firms will need to transition using the codes and techniques described in Principles of Group Accounting under IFRS. This book is a practical guide and reference to the standards related to consolidated financial statements, joint arrangements, and disclosure of interests. Fully illustrated with a step-by-step case study, Principles of Group Accounting under IFRS is equally valuable as an introductory text and as a reference for addressing specific issues that may arise in the process of consolidating group accounts. The new international standards will bring about significant changes in group reporting, and it is essential for accountants, auditors, and business leaders to understand their implications. Author Andreas Krimpmann is an internationally recognized authority on the transition from GAAP to IFRS, and this new text comes packaged with GAAP/IFRS comparison resources that will help make the changes clear. Other bonus resources include an Excel-based consolidation tool, checklists, and a companion website with the latest information. Learn about: Definitions, requirements, processes, and transition techniques for IFRS 10, 11, and 12 covering group level accounting Practical implementation strategies demonstrated through a clear case study of a midsize group Key concepts related to consolidated financial statements, joint ventures, management consolidation, and disclosure of interests Comparisons between GAAP and IFRS to clarify the required changes for international firms Whatever stage of the consolidation process you are in, you will appreciate the professional perspective in Principles of Group Accounting under IFRS.

We are pleased to present this Global Edition, which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting, and performance evaluation. Many of the real-world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

This book presents mixed-methods research into Chinese students' willingness to communicate (WTC) in an EFL classroom context. The interrelationships between WTC and motivation, communication confidence, learner beliefs and classroom environment are examined using structural equation modelling on data collected in a large-scale survey. These results are then complemented and expanded upon in a follow-up multiple case-study that identifies six themes which account for fluctuations of WTC over time and across situations. The qualitative and quantitative data provide the grounds for the proposition of an ecological model of WTC in the Chinese EFL university classroom, which reveals that WTC is socioculturally constructed as a function of the interaction of individual and environmental factors inside and beyond the classroom walls.

Written by teachers and successful entrepreneurs, this textbook includes guidance, instruction and practical lessons for the prospective entrepreneur.

The OECD Employment Outlook 2014 includes chapters on recent labour market developments with a special section on earnings, job quality, youth employment, and forms of employment and employment protection.

This book starts with a macro view of accounting information by presenting real financial statements. The authors establish how financial statements communicate the financing, operation, and investing activities of a business. To integrate the use of financial statements for decision making, the authors identify a finite set of tools necessary to make business decisions based on financial information. The Decision Toolkit is provided for the reader and integrated throughout the text.
