Based on twenty years of teaching experience, it begins with the most basic definitions of waves, proceeds to ultrasound in fluids and solids, explains the principles of wave attenuation and reflection, then introduces to the reader the principles of focusing devices, ultrasonic transducers, and acoustic fields, and then delves into integrative applications of ultrasound in conventional and advanced medical imaging techniques (including Doppler imaging) and therapeutic ultrasound. Demonstrative medical applications are interleaved within the text and exemplary questions with solutions are provided on every chapter. Readers will come away with the basic toolkit of knowledge they need to successfully use ultrasound in biomedicine and conduct research. Encompasses a wide range of topics within biomedical ultrasound, from attenuation and reflection of waves to the intricacies of focusing devices, transducers, acoustic fields, modern medical imaging techniques, and therapeutics Explains the most common applications of biomedical ultrasound from an engineering point of view Provides need-to-know information in the form of physical and mathematical principles directed at concrete applications Fills in holes in knowledge caused by ever-increasing new applications of ultrasonic imaging and therapy Basics of Biomedical Ultrasound for Engineers is designed for undergraduate and graduate engineering students; academic/research engineers unfamiliar with ultrasound; and physicians and researchers in biomedical disciplines who need an introduction to the field. No one knows Hillary Clinton the way R. Emmett Tyrrell and Mark Davis know her. Tyrrell's American Spectator was the magazine of record for breaking stories on the Clinton administration. For eight solid years it was the administration's most formidable journalistic opponent - a persistent (as well as a devastatingly perceptive and witty) obstacle to the Clintons' attempt to hoodwink the public and whitewash their own corruption. Former White House speechwriter and longtime Clinton watcher and chronicler Mark Davis has compiled devastating files of research on Hillary. With insiders' access to Hillary's Senate colleagues, other key players, and fresh reporting, Tyrrell and Davis examine in detail the strategies Hillary is preparing to achieve her ambition for power, the lies she uses to camouflage her record for the American people, and the damage that Madame President Hillary could inflict upon the nation. Best of all, they know how she can

be stopped. Packed with eye-opening facts and incisive insights, Madame Hillary proves conclusively that a Hillary victory would be an unmitigated disaster for America. This book is the much-needed alarm to alert all Americans to the clear and present danger of Madame Hillary.

Montese Crandall is a downtrodden writer whose rare collection of baseball cards won't sustain him, financially or emotionally, through the grave illness of his wife. Luckily, he swindles himself a job churning out a novelization of the 2025 remake of a 1963 horror classic, The Crawling Hand. Crandall tells therein of the United States, in a bid to regain global eminence, launching at last its doomed manned mission to the desolation of Mars. Three space pods with nine Americans on board travel three months, expecting to spend three years as the planet's first colonists. When a secret mission to retrieve a flesh-eating bacterium for use in bio-warfare is uncovered, mayhem ensues. Only a lonely human arm (missing its middle finger) returns to earth, crash-landing in the vast Sonoran Desert of Arizona. The arm may hold the secret to reanimation or it may simply be an infectious killing machine. In the ensuing days, it crawls through the heartbroken wasteland of a civilization at its breaking point, economically and culturally -- a dystopia of lowlife, emigration from America, and laughable lifestyle alternatives. The Four Fingers of Death is a stunningly inventive, sometimes hilarious, monumental novel. It will delight admirers of comic masterpieces like Slaughterhouse-Five, The Crying of Lot 49, and Catch-22.

In *Notes from a Colored Girl*, Karsonya Wise Whitehead examines the life and experiences of Emilie Frances Davis, a freeborn twenty-one-year-old mulatto woman, through a close reading of three pocket diaries she kept from 1863 to 1865. Whitehead explores Davis's worldviews and politics, her perceptions of both public and private events, her personal relationships, and her place in Philadelphia's free black community in the nineteenth century. Although Davis's daily entries are sparse, brief snapshots of her life, Whitehead interprets them in ways that situate Davis in historical and literary contexts that illuminate nineteenth-century black American women's experiences. Whitehead's contribution of edited text and original narrative fills a void in scholarly documentation of women who dwelled in spaces between white elites, black entrepreneurs, and urban dwellers of every race and class. *Notes from a Colored Girl* is a unique offering to the fields of history and documentary editing as the book includes both a six-chapter historical reconstruction of Davis's life and a full, heavily annotated edition of her Civil War–era pocket diaries. Drawing on scholarly traditions from history, literature, feminist studies, and sociolinguistics, Whitehead investigates Davis's diary both as a complete literary artifact and in terms of her specific daily entries. From a historical perspective, Whitehead re-creates the narrative of Davis's life for those three years and analyzes the black community where she lived and worked. From a literary perspective, Whitehead examines Davis's diary as a socially, racially, and gendered nonfiction text. From a feminist studies perspective, she examines Davis's agency and identity, grounded in theories elaborated by black feminist scholars. And, from linguistic and rhetorical perspectives, she studies Davis's discourse about her interpersonal relationships, her work, and external events in her life in an effort to understand how she used language to construct her social, racial, and gendered identities. Since there are few primary sources written by black women during this time in history, Davis's diary—though ordinary in its content—is rendered extraordinary simply because it has survived to be included in this very small class of resources. Whitehead's extensive analysis illuminates the lives of many through the simple words of one.

In a fledgling community, on a hilltop near a Palestinian village, Gabi Kupper's life is disrupted when his brother Roni arrives from America penniless.

This powerful drama examines the fears of parents driven to do "the right thing" when the safety of their daughter is in doubt. A mother and father who learn that the next door neighbor is a convicted child molester consider both vigilance and vigilantism before being forced into action by a pair of child advocacy crusaders. The shocking climax hits a raw nerve, leaving the audience to consider where the line between right and wrong lies. *Mr. Bundy* was a hit at the 1998 Humana Festival at Actors Theatre of Louisville. -- Publisher's website.

Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross

prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.

Electron Transfer Reactions of Complex Ions in Solution covers the significant development of some important area of electron transfer reactions of complex ions. This four-chapter book emerged from a series of lectures at the Polytechnic Institute of Brooklyn in November and December 1967. Chapter I presents research studies in cation hydration. This chapter describes principal methods for composition determination of the first coordination spheres of the aquo ions. Chapter II examines the distinction between reactions in which electron transfer takes place from one primary bond system to another. Chapter III discusses some aspects of ligand effects in electron-transfer reactions. This chapter demonstrates that differences in the behavior of systems can be expected at least in the extremes of mechanisms. Chapter IV deals with the history, principles and applications of the induced electron-transfer effect. This book is of great value to electrochemists, students, and researchers.

This volume concerns several aspects of China's changing market based economy. These include commercial contract enforcement, corporate structures, competition law and other issues related to China's membership in the WTO. In the past two decades, the rapid integration of China's economy into the global marketplace has created obligations and expectations of non-discrimination and regulatory transparency in domestic markets. The Chinese government has responded by demanding better governance within major companies, market sectors and public administration generally. However, as the articles in this volume show, it has struggled to find a corporate structure capable of absorbing external equity investment and participation but still amenable to direct and indirect state guidance. It has also moved cautiously in creating legal controls over unfair competition. Moreover, the protection of state owned enterprises, which serve as vehicles for domestic economic, social and political policy, has been a recurring issue in China's WTO trade disputes.
