This edited volume explores the interconnection between care work, travel, and healthcare, emphasizing the emotional dimensions of seeking care away from home. It brings together contributions from disciplines such as anthropology, nursing, primary care, sociology and geography and covers experiences of medical travel and other forms of remote care in the United States, Laos, India, Italy, France, Finland, Switzerland, and Russia. This is an edited book based on papers presented at a 2003 invitee-only conference under the sponsorship of the Merrill Advanced Studies Center of the University of Kansas. The participants were prominent scholars in the areas of language and reading, and have research programs funded by NIH and other sources. The purpose of the gathering was to discuss theoretical issues and research findings concerning the relationship between developmental language and reading disabilities, specifically looking at neurological, behavioral, and genetic factors. In addition, it discussed other factors contributing to reading difficulties in the middle elementary school years through adolescence and literacy outcomes for children with early language impairments, and how these problems relate to children with dyslexia. The Foreword is written by Reid Lyon, Branch Chief, Child Development and Behavior Branch, NICHD-National Institutes of Health. This book appeals to scholars in the areas of language disorders and reading disabilities, as well as to practicing speech-

Folland, Goodman, and Stano's bestselling *The Economics of Health and Health Care* text offers the market-leading overview of all aspects of Health Economics, teaching through core economic themes, rather than concepts unique to the health care economy. The Eighth Edition of this key textbook has been revised and updated throughout, and reflects changes since the implementation of the Affordable Care Act (ACA). In addition to its revised treatment of health insurance, the text also introduces the key literature on social capital as it applies to individual and public health, as well as looking at public health initiatives relating to population health and economic equity, and comparing numerous policies across Western countries, China, and the developing world. It provides up-to-date discussions on current issues, as well as a comprehensive bibliography with over 1,100 references. Extra material and teaching resources are now also available through the brand new companion website, which provides full sets of discussion questions, exercises, presentation slides, and a test bank. This book demonstrates the multiplicity of ways in which economists analyze the health care system, and is suitable for courses in Health Economics, Health Policy/Systems, or Public Health, taken by health services students or practitioners.

Using a consistent, logical, and step-by-step approach, **MEDICAL TERMINOLOGY: A LIVING LANGUAGE**, 5/e introduces students to the anatomy and physiology of body systems and the corresponding medical terms related to them. For each body system, broad coverage of anatomy, physiology, pathology, diagnostic procedures, treatment procedures, and pharmacology is provided. The author emphasizes both terms built from Latin and Greek word parts, and modern English terms, helping students develop a full working word part vocabulary they can use to interpret any new term. This edition contains many new terms, and has been reorganized for more efficient learning. To eliminate confusion, Word Building tables have been removed from each chapter and the terms have been distributed throughout the pathology, diagnostic procedure, and treatment procedure tables, where they are more immediately relevant to students.

The student workbook is designed to help your students retain key chapter content. Included within this resource are chapter objective questions, key-term definition queries, and multiple choice, fill-in-the-

Now in its fourth edition, *Exploring Medical Anthropology* provides a concise and engaging introduction to medical anthropology. It presents competing theoretical perspectives in a balanced fashion, highlighting points of conflict and convergence. Concrete examples and the author's personal research experiences are utilized to explain some of the discipline's most important insights, such as that biology and culture matter equally in the human experience of disease and that medical anthropology can help to alleviate human suffering. The text has been thoroughly updated for the fourth edition, including fresh case studies and a new chapter on drugs. It contains a range of pedagogical features to support teaching and learning, including images, text boxes, a glossary, and suggested further reading.
