International GCSE specification for Biology and is packed full of questions, in depth content, practical investigative skills features and more.

A guide to experimental education, originally published in 1960 and expanded for the 1990s, features a discussion of how American education lags behind the rest of the world and what people can do to change that.

This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This new edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum specified in the IGCSE Physics syllabus. The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.

This book aims to cover all the GCSE Physics material needed to meet the specifications of the examining boards Edexcel, AQA, WJEC and OCR (both 21st Century Science and Gateway) both for single and double awards. The content also covers the additional topics necessary for the Physics GCSE single award. It is the third book in the series following 'Biology at a Glance' and 'Chemistry at a Glance' and it encourages learners to use a mind mapping approach to revision. Just like the other books in the series, each page contains clear annotated illustrations that will help the reader to assimilate the facts quickly and commit them to memory. The book covers force and energy, energy and its transfer (including waves, electrical and thermal energy), electromagnetism and radioactivity. It goes on to describe a wide range of the practical applications of physics and concludes with material on our place in the universe. To comply with the latest GCSE specifications, 'How Science Works' permeates all aspects of the book which also provides questions on all the topics covered, to reinforce skills and understanding.

A gritty, spirited inside look at the world of amateur boxing today The Golden Gloves tournament is center stage in amateur boxing-a single-elimination contest in which young hopefuls square off in steamy gyms with the boxing elite looking on. Robert Anasi took up boxing in his twenties to keep in shape, attract women, and sharpen his knuckles for the odd bar fight. He thought of entering "the Gloves," but put it off. Finally, at age thirty-two-his last year of eligibility-he vowed to fight, although he was an old man in a sport of teenagers and a light man who had to be even lighter (125 pounds) to fight others his size. So begins Anasi's obsessive preparation for the Golden Gloves. He finds Milton, a wily and abusive trainer, and joins Milton's "Supreme Team": a black teenager who used to deal guns in Harlem, a bus driver with five kids, a hard-hitting woman champion who becomes his sparring partner. Meanwhile, he observes the changing world of amateur boxing, in which investment bankers spar with ex-convicts and everyone dreads a fatal blow to the head. With the Supreme Team, he goes to the tournament, whose outcome, it seems, is rigged, like so much in boxing life today. Robert Anasi tells his story not as a journalist on assignment but as a man in the midst of one of the great adventures of his life. The Gloves, his first book, has the feel of a contemporary classic.

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover.
