The austere landscape of the Great Basin has inspired diverse responses from the people who have moved through or settled in it. Author Richard V. Francaviglia is interested in the connection between environment and spirituality in the Great Basin, for here, he says, "faith and landscape conspire to resurrect old myths and create new ones." As a geographer, Francaviglia knows that place means more than physical space. Human perceptions and interpretations are what give place its meaning. In *Believing in Place*, he examines the varying human perceptions of and relationships with the Great Basin landscape, from the region's Native American groups to contemporary tourists and politicians, to determine the spiritual issues that have shaped our connections with this place. In doing so, he considers the creation and flood myths of several cultures, the impact of the

Judeo-Christian tradition and individualism, Native American animism and shamanist traditions, the Mormon landscape, the spiritual dimensions of gambling, the religious foundations of Cold War ideology, stories of UFOs and alien presence, and the convergence of science and spirituality. *Believing in Place* is a profound and totally engaging reflection on the ways that human needs and spiritual traditions can shape our perceptions of the land. That the Great Basin has inspired such a complex variety of responses is partly due to its enigmatic vastness and isolation, partly to the remarkable range of peoples who have found themselves in the region. Using not only the materials of traditional geography but folklore, anthropology, Native American and Euro-American religion, contemporary politics, and New Age philosophies, Francaviglia has produced a fascinating and timely investigation of the role of human conceptions of place in that space we call the Great Basin.

Some of the best pleasure trips a person could take in the American Southwest are explored through gorgeous photography, first-person accounts by experienced travelers, maps, helpful hints, and detailed route instructions. About half of the trips are entirely on asphalt or minor dirt roads that can be experienced in a sedan. The rest are recommended for heartier vehicles, perhaps, with four-wheel drive. All trips are within 250 miles of Las Vegas and includes areas such as La Verkin Falls, Zion and Bryce Canyons, the historic town of Eureka (NV), Death Valley, Wheeler Pass, Titus Canyon, Arizona Bay, Toroweap, and more.

From deserts to ghost towns, from national forests to

California bungalows, many of the features of the western American landscape are well known to residents and travelers alike. But in *How to Read the American West*, William Wyckoff introduces readers anew to these familiar landscapes. A geographer and an accomplished photographer, Wyckoff offers a fresh perspective on the natural and human history of the American West and encourages readers to discover that history has shaped the places where people live, work, and visit. This innovative field guide includes stories, photographs, maps, and diagrams on a hundred landscape features across the American West. Features are grouped according to type, such as natural landscapes, farms and ranches, places of special cultural identity, and cities and suburbs. Unlike the geographic organization of a traditional guidebook, Wyckoff's field guide draws attention to the connections and the differences between and among places. Emphasizing features that recur from one part of the region to another, the guide takes readers on an exploration of the eleven western states with trips into their natural and cultural character. *How to Read the American West* is an ideal traveling companion on the main roads and byways in the West, providing unexpected insights into the landscapes you see out your car window. It is also a wonderful source for armchair travelers and people who live in the West who want to learn more about the modern West, how it came

to be, and how it may change in the years to come. Showcasing the everyday alongside the exceptional, Wyckoff demonstrates how asking new questions about the landscapes of the West can let us see our surroundings more clearly, helping us make informed and thoughtful decisions about their stewardship in the twenty-first century.
