New material in a new format is contained in this third edition of Family Medicine. The comprehensive text nevertheless remains true to the goal of previous editions in offering a scientific approach to health and illness within the context of the family. Using up-to-date clinical material, the book demonstrates how the family physician may provide comprehensive health care to persons of all ages. The first part of Family Medicine discusses such topics as the conceptual basis of family as discipline and specialty, problem differentiation, family-centered health care, longitudinal care, clinical reasoning, and resource management. The second part explores both problems related to organs and systems and problems related to the person, family and community, including: pregnancy, care of infants, children, adolescents, and the elderly; behavioral and psychiatric problems; emergency and critical care; sports medicine; alcoholism and substance misuse; environmental health; and neoplastic and infectious diseases. Family Medicine, with its greatly expanded in-depth coverage of the most commonly encountered clinical core problems and procedures in family medicine, continues to be a textbook written and edited by family physicians for family physicians.

The New Edition provides the latest, essential information on the symptoms, diseases, treatments, and procedures most commonly encountered in everyday practice. It features step-by-step clinical guidance for more than 320 common diseases and disorders, as well as explicit guidelines for over 60 office procedures. An organ-system organization, extensive alphabetical index, and cross references within the individual chapters make the information easy to find. Integrates coverage of more than 29 new subjects, such as alternative and herbal medicine,

postpartum depression, thoracic outlet syndrome, attention deficit disorder, knee injuries, autism, and hemochromatosis Features 5 new procedures including tympanocentesis and pulse oximetry plus 2 new symptoms, parotid gland swelling and jaundice in adults. Addresses the etiology, symptoms, clinical findings, laboratory tests, differential diagnosis, treatment, follow-up, and special notes for a full range of common diseases. Discusses the approach to common symptoms, with an emphasis on differential diagnosis and key questions to ask during the history as well as management. Details more than 60 procedures from indications and contraindications to preparation, equipment, anesthesia, precautions technique, and follow-up. Includes clinical pearls, warnings, and special tips throughout. Presents a complete list of procedures, ICD-9 codes, and CPT-4 codes on the inside covers. Makes reference easy with a flexible binding that will lay flat without breaking the spine.

Revised by the American Medical Association (AMA), Graduate Medical Education Directory, 2012-2013 (Green Book) contains comprehensive information on 9,000 Accreditation Council for Graduate Medical Education-accredited programs (GME) in the United States, including Residency, Fellowship, and Combined programs, plus residency application and career-planning resources. Revisions and updates: specialty/subspecialty information, Match data, 215 new programs, and 3,000 teaching institutions.

Global Health Training in Graduate Medical Education is a guide to help medical schools, residency programs, students, residents, fellows, educators and allied health professionals create, expand and improve global health education. Medical residents in hospitals are often required to be on duty for long hours. In 2003 the organization overseeing graduate medical education adopted common program requirements to restrict resident workweeks, including limits to an average of 80 hours over 4 weeks and the longest consecutive period of work to 30 hours in order to protect patients and residents from unsafe conditions resulting from excessive fatigue.

Resident Duty Hours provides a timely examination of how those requirements were implemented and their impact on safety, education, and the training institutions. An in-depth review of the evidence on sleep and human performance indicated a need to increase opportunities for sleep during residency training to prevent acute and chronic sleep deprivation and minimize the risk of fatigue-related errors. In addition to recommending opportunities for on-duty sleep during long duty periods and breaks for sleep of appropriate lengths between work periods, the committee also recommends enhancements of supervision, appropriate workload, and changes in the work environment to improve conditions for safety and learning. All residents, medical educators, those involved with academic training institutions, specialty societies, professional groups, and consumer/patient safety organizations will find this book useful to advocate for an improved culture of safety.

JOHN S. MILLIS In 1966 the Citizens Commission on Graduate Medical Education observed that the explosive growth in biomedical science and the consequent increase in medical skill and technology of the twentieth century had made it possible for physicians to respond to the episodes of illness of patients with an ever-increasing effectiveness, but that the increase in knowledge and technology had forced most physicians to concentrate upon a disease entity, an organ or organ system, or a particular mode of diagnosis or therapy. As a result there had been a growing lack of continuing and comprehensive patient care. The Commission expressed the opinion that "Now, in order to bring medicine's enhanced diagnostic and therapeutic powers fully to the benefit of society, it is necessary to have many physicians who can put medicine together again. "!

The Commission proceeded to recommend the education and training of substantial numbers of Primary Physicians who would, by assuming primary responsibility for the patient's welfare in sickness and in health, provide continuing and comprehensive health care to the citizens of the United States. In 1978 it is clear that the recommendation has been accepted by the public, the medical profession, and medical education. There has been a vigorous response in the development of family medicine and in the fields of internal medicine, pediatrics, and

The Mayo Clinic physician and founder of The Patient Revolution offers a “thoroughly convincing. . . call to action for medical industry reform” (Kirkus). Winner of the 2018 PenCraft Award for Literary Excellence, *Why We Revolt* exposes the corruption and negligence that are endemic in America’s healthcare system—and offers a blueprint for revolutionizing patient care across the country. Through a series of essays and first-hand accounts, Dr. Victor M. Montori demonstrates how the system has been increasingly exploited and industrialized, putting profit before patients. As costs soar, the United States continues to fall behind other countries on patient outcomes. Offering concrete, direct actions we can take to bring positive change to the healthcare system, *Why We Revolt* is an

Graduate medical education (GME) is a continually evolving, highly dynamic area within the complex fabric of the modern health-care environment. Given the rapidly changing regulatory, financial, scientific and technical aspects of GME, many institutions and programs face daily challenges of "keeping up" with the most recent developments within this ever-more-sophisticated operational environment. Organizational excellence is a requirement for the seamless functioning of GME programs, especially when one considers the multiple disciplines and stakeholders involved. The goal of the current book cycle, titled *Contemporary Topics in Graduate Medical Education*, beginning with this

inaugural tome, is to provide GME professionals with a practical and readily applicable set of reference materials. More than 20 distinguished authors from some of the top teaching institutions in the US, touch upon some of the most relevant, contemporary, and at times controversial topics, including provider burnout, gender equality issues, trainee wellness, scholarly activities and requirements, and many other theoretical and practical considerations. We hope that the reader will find this book to be a valuable and high quality resource of a broad range of GME-related topics. It is the Editors' goal to create a multi-tome platform that will become the definitive go-to reference for professionals navigating the complex landscape of modern graduate medical education. This book provides a detailed guide for surgeons and surgical trainees on a variety of facets relevant to wellbeing, and how to maintain wellbeing throughout a career in academic surgery. Individual and external factors relevant to wellbeing are both covered in relation to the surgeon. Aspects covered include healthcare roles, personal factors, socio-cultural factors, the regulatory business, and payer environment. Potential strategies for managing welfare including considerations for both students and residents are provided, as are methodologies for studying aspects of wellbeing.
