Once upon a time in the little town of Clifton, Oregon, there were four Lindas. Enjoy this engaging first novel in the Four Lindas series from bestselling author Melody Carlson.

You might have heard of the basilisk and the griffin, but what about the basiffin? This fantastical flipbook collects together magical and mythical creatures from all over the world, then lets you mix and match their fronts and backs to create even more wondrous beasts of your own! From the wolpertinger and nekomata to the thunderbird and the cockatrice, this mixed-up magical bestiary has over 1,000 possible creations to fascinate, bewitch, and beguile.

Humanists are sometimes accused of being so focused on the human race that they ignore the environment and other species. This book is designed to address these criticisms. The contributors, all humanists in the naturalistic tradition, show that in fact humanism as a worldview has much to offer environmentalism. Since humanists are committed to working for a global community in which all humans can flourish, they are as concerned about ecological degradation as environmentalists. But in regard to what should be done about environmental problems, humanists do not hesitate to use the best scientific information and technology to reclaim the natural world while ensuring the welfare of all human beings. Humanists stress that science and technology must be used responsibly and that human beings must learn to give up destructive ideological fantasies, whether political or religious. The contributors are Vern L. Bullough, Gwen Whitehead Brewer, Richard Gilbert, Michael J. Kami, Gerald Larue, Timothy J. Madigan, Sarah Oelberg, Don Page, Howard B. Radest, Philip J. Regal, Andreas Rosenberg, Harvey Sarles, David Schafer, John M. Swomley, Robert B. Tapp, Michael Werner, and Carol Wintermute.

Written by the #1 name in IT security certification training, fully revised for the latest exam release, and featuring 750+ practice questions plus 24 hours of audio lectures CISSP Practice Exams, Second Edition is the ideal companion to Shon Harris' bestselling CISSP All-in-One Exam Guide. Well-regarded for her engaging and informative style, Shon Harris is renowned as an IT security certification expert. Designed as an exam-focused study-self aid and resource, CISSP Practice Exams, Second Edition provides 100% coverage of the 10 exam domains. Organized by these domains, the book allows you to focus on specific topics and tailor your study to your areas of expertise and weakness. To further aid in study and retention, each question in the book is accompanied by in-depth answer explanations for the correct and incorrect answer choices. Each chapter contains 25+ practice questions with an additional 500 practice questions hosted in a web-based environment. As an added bonus, you'll get access to 24 hours of audio lectures featuring Harris conducting intensive review sessions. (Terms and conditions apply.) Complete, authoritative coverage of the CISSP exam Information Security Governance and Risk Management; Access Control;

Security Architecture and Design; Physical (Environmental) Security; Telecommunications and Networking Security; Cryptography; Business Continuity and Disaster Recovery Planning; Legal, Regulations, Investigations, and Compliance; Software Development Security; Operations Security

Everything looks different by the light of the moon... I met my best friend Noah when we were five years old. But Noah wasn't just a friend... at least not to me. He was everything. The summer we turned eighteen, I kissed Noah Harper -- by the light of the moon, sitting on the dock, I kissed him. And he kissed me back. I swear. But the next morning, he ended our friendship and walked away. I haven't seen him since. Not for three long years. At least not until last night. Last night he was sitting on our dock like nothing had changed. He was sweet and apologetic and more gorgeous than ever. I wanted to believe everything could go back to how it always was. But something's different about Noah. Something isn't quite right. I have to know... what secret is Noah Harper hiding? \*\*This is a new edition of a book that was previously published\*\*

Michael Nye's debut short story collection presents nine stories about people who find themselves at turning points in their lives--times of disruption and dislocation, yet also of reclamation and reinvention. These diverse characters include a war veteran turned radio broadcaster, a film projectionist, a former governor of Ohio, a second-generation comic book store owner, and a vascular surgeon at one of Boston's premier hospitals. Startling and precise in its evocations of the lives of memorable characters, *Strategies Against Extinction* is rich with energetic observation, attentive empathy, and a compelling spirit of uncertainty.

This book places music education in context and then goes on to examine a range of issues linked to the teaching and learning of music. The latter half of the book concentrates on music education within the classroom

The sponge has attracted attention as one of the first animals to evolve multicellular organization. The sponge also interests scientists because it provides excellent research material in molecular phylogeny, allowing the process of animal diversification to be probed at the molecular level. Additionally, researchers have discovered in sponges certain bioactive substances with unique antibacterial and anticancer properties of great interest in medical and pharmaceutical science. *Sponge Sciences* presents the most up-to-date information on all areas of sponge research, with emphasis on taxonomy, molecular evolution, developmental biology, and natural products chemistry, as well as the biology of freshwater sponges. It also provides new findings in the morphology, cell biology, physiology, ecology, and biogeography of sponges. The papers compiled here are contributed by world-renowned sponge scientists.

This book presents selected papers from the fourth edition of the GraphX conference series, GraphITA 2015. Its content range from fundamentals to applications of graphene and other 2D material such as silicene, BN and MoS<sub>2</sub>. The newest technological challenges in the field are described in this book, written by worldwide known scientists working with 2D materials. The chapter 'Morphing Graphene-Based Systems for Applications: Perspectives from Simulations' is published open access under a CC BY 4.0 license.

Presenting more than two hundred of the greatest haiku ever written about the game. There are moments in every baseball game that make fans catch their breath: the pause while a pitcher looks in for the sign, the moment a cocksure rookie gets picked off first, or the instant a batter lashes a game-winning homer into the night sky, just before the sell-out crowd explodes

onto its feet. Haiku captures these moments like no other poetic form, and Baseball Haiku captures the sights, the sounds, the smells, and the emotions of the game like no previous collection. Some of the most important haiku poets of both America and Japan are featured in this anthology; including Jack Kerouac, a longtime baseball fan who pioneered English-language haiku; Alan Pizzarelli, one of the top American haiku and senryu poets of the last thirty years; and Masaoka Shiki, one of the four great pillars of Japanese haiku—a towering figure—who was instrumental in popularizing baseball in Japan during the 1890s. With over two hundred poems spanning more than a century of ball playing, Baseball Haiku reveals the intricate ways in which this enduring and indelible sport—which is played on a field, under an open sky—has always been linked to nature and the seasons. And just as a haiku happens in a timeless now, so too does Baseball Haiku evoke those unforgettable images that capture the actions and atmospheres of the national pastime: each poem resonates like the lonely sound of cleats echoing in the tunnel as a grizzled veteran leaves his final game. The largest collection of haiku and senryu on baseball ever assembled, Baseball Haiku is an extraordinary treasure for any true baseball fan.

General Wallace M. Greene Jr. was the 23d Commandant of the Marine Corps, serving from 1964 to 1967, a period in which American involvement in Vietnam increased dramatically. The Greene Papers: General Wallace M. Greene Jr. and the Escalation of the Vietnam War, January 1964-March 1965 contains more than 100 documents from the personal papers of General Greene and is the first edited volume of personal papers to be published by the Marine Corps History Division as a monograph. Produced by a member of the Joint Chiefs of Staff, General Greene's notes provide readers with a firsthand account from one of the main participants in the decision-making process that led to the commitment of a large-scale American expeditionary force in Southeast Asia. Because of President Lyndon B. Johnson's reticence to regularly consult the Joint Chiefs on military matters, however, the notes also give readers a second point of view: that of a frustrated advisor kept on the outside and forced to look in, observe, and reflect on major military decisions often made without his input or support. Also apparent are the tensions between Greene and President Johnson's aggressive and domineering Secretary of Defense, Robert S. McNamara. This volume begins in January 1964 and ends just before the landing of the 9th Marine Expeditionary Brigade at Da Nang on 8 March 1965, a pivotal moment that marked the official transition from the United States' advisory mission to a more active combat mission. In doing so, it traces Greene's growing frustration with McNamara's and Johnson's equivocation and uncertainty about Southeast Asia. Along with a series of commemorative pamphlets, this book is part of the Marine Corps History Division's effort to mark the fiftieth anniversary of the Vietnam War. Other publications available from the United States Marine Corps can be found here:

How's London wedding planner August supposed to pull off the party of the year when he has to work with Christopher—the man who broke his heart? Can Christopher prove he's still the best man for August?

This powerful, timely novel in verse exposes provocative truths about periods, sex, shame, and going viral for all the wrong reasons. After school one day, Frankie, a lover of physics and astronomy, has her first sexual experience with quiet and gorgeous Benjamin—and gets her period. It's only blood, they agree. But soon a gruesome meme goes viral, turning an intimate, affectionate afternoon into something sordid, mortifying, and damaging. In the time it takes to swipe a screen, Frankie's universe implodes. Who can she trust? Not Harriet, her suddenly cruel best friend, and certainly not Benjamin, the only one who

knows about the incident. As the online shaming takes on a horrifying life of its own, Frankie begins to wonder: is her real life over? Author Lucy Cuthew vividly portrays what it is to be a teen today with this fearless and ultimately uplifting novel in verse. Brimming with emotion, the story captures the intensity of friendships, first love, and female desire, while unflinchingly exploring the culture of online and menstrual shaming. Sure to be a conversation starter, *Blood Moon* is the unforgettable portrait of one girl's fight to reclaim her reputation and to stand up against a culture that says periods are dirty.

### Blood Moon

Guide C: Reference Data contains the basic physical data and calculations which form the crucial part of building services engineer background reference material. Expanded and updated throughout, the book contains sections on the properties of humid air, water and steam, on heat transfer, the flow of fluids in pipes and ducts, and fuels and combustion, ending with a comprehensive section on units, mathematical and miscellaneous data. There are extensive and easy-to-follow tables and graphs. -Essential reference tool for all professional building services engineers -Easy to follow tables and graphs make the data accessible for all professionals -Provides you with all the necessary data to make informed decisions

This is a fascinating collection of essays about Israeli society and its institutions. It is written by practitioners who have experience and understanding, who are equipped with the insight and knowledge, and who bore responsibility while serving the public in the various institutions. Among the authors are former State President Yitzhak Navon, former cabinet minister Gad Yaakobi, former Deputy Speaker of the Knesset Naomi Chazan, former Attorney General Elyakim Rubinstein, Former Supreme Court President Meir Shamgar, the State Comptroller Eliezer Goldberg, and former member of the Press Council Raphael Cohen-Almagor. The decision-makers provide fresh, practical observations and personal, valuable accounts of their respective roles. The book aims to tackle timely concerns, analyzing the relationships between democracy and bureaucracy, the military-political complex, the issue of separation of powers in democracy and more specifically the role of the Supreme Court, and the need for a written, solid constitution. It also discusses citizenship education. The book will be useful to researchers on Israeli democracy, students, teachers, historians, sociologists, political scientists and legal scholars who wish to better understand this fascinating society and its institutions.
