Polyphenols are plant non-nutrient natural products, or plant secondary metabolites, found in fruits, vegetables and seeds that we consume daily. Their intakes from fruit, vegetables, seeds, and nuts are associated with lower risks of chronic and age-related degenerative diseases. Aging is a dynamic and complex biological process involving multiple actors and subject to a number of genetic and/or environmental influences. The famous free radical theory of aging proposed by Prof. Harman in 1956 states that free radicals lead to oxidative damage, causing cellular dysfunction and physiological decline, and are responsible for aging, with the appearance of degenerative diseases and eventually death. From this hypothesis, antioxidant molecules are capable of slowing down the aging process through the successful scavenging of radical oxygen and nitrogen species. Polyphenols have been shown to prolong the lifespan of different model species operating through a well-conserved antioxidant mechanism. This collection of research and review articles covers the most recent advances in the use of plant polyphenols, ranging from their biological properties and possible functions as medicines, the importance of traditional medicines as a source of inspiration, the rationalization of new uses of plant extracts which lead to applications in modern medicine, the status of modern green-chemistry extraction methods, to some reflections on future prospects.

Cari genitori: i compiti vi rovinano tutti i fine settimana? I vostri bambini si cuciono le labbra pur di non ripetere le tabelline? Cari insegnanti: catturare l'attenzione è una battaglia persa e i bulli infestano la classe? La supertata Lucia Rizzi, ex insegnante ed esperta di sindrome da deficit d'attenzione, è pronta a correre in vostro soccorso. Dopo il successo di Fate i bravi! torna infatti con questo manuale dedicato al tema caldo della scuola e affronta i grandi problemi che, prima o poi, mettono in crisi le famiglie con figli in età scolare: il bullismo, la scelta della scuola giusta, il supporto quotidiano allo studio, i voti. Grazie ai suoi utilissimi consigli pratici da applicare ogni giorno, sia a casa sia in classe, non solo riuscirete a tirar fuori il meglio da ogni scolaro e da ogni figlio, ma la scuola tornerà a essere l'imprescindibile palestra educativa che tutti vogliamo che sia.

Pediatric palliative care is a field of significant growth as health care systems recognize the benefits of palliative care in areas such as neonatal intensive care, pediatric ICU, and chronic pediatric illnesses. Pediatric Palliative Care, the fourth volume in the HPNA Palliative Nursing Manuals series, highlights key issues related to the field. Chapters address pediatric hospice, symptom management, pediatric pain, the neonatal intensive care unit, transitioning goals of care between the emergency department and intensive care unit, and grief and bereavement in pediatric palliative care. The content of the concise, clinically focused volumes in the HPNA Palliative Nursing Manuals series is one resource for nurses preparing for specialty certification exams and provides a quick-reference in daily practice. Plentiful tables and patient teaching points make these volumes useful resources for nurses.

Nella nostra società la famiglia è la dimensione fondamentale in cui l'individuo nasce, si forma, ama, acquisisce consapevolezza e si realizza nella sfera privata. Ciononostante, la vita fra le mura domestiche diventa spesso un cammino faticoso e accidentato, quando non una vera e propria guerra, in cui tutti combattono contro tutti. Tensioni latenti, malumori e litigi, recriminazioni velenose compromettono quell'atmosfera di complicità affettuosa e di spontanea e disinteressata collaborazione che dovrebbe dominare in ogni casa. In altre parole, guastano la felicità della famiglia. Ma si può fare qualcosa per risolvere o addirittura prevenire i conflitti? Certo, ogni nucleo ha le proprie peculiarità, però esistono situazioni ricorrenti che - sostiene Lucia Rizzi in questo nuovo libro dedicato alle dinamiche dell'intera famiglia - basta analizzare e affrontare correttamente per volgerle sempre in positivo. Con l'approccio pratico che le è consueto, la tata più famosa d'Italia inizia con l'insegnarci come riconoscere i segnali che fanno capire a una coppia se è davvero pronta per mettere su famiglia (qualora non lo sia, meglio evitare!). Rivolgendosi poi ai nuclei già formati, con uno o più figli, con genitori conviventi e non, offre consigli preziosi, corredati da esempi e da esercizi divertenti, per favorire un buon funzionamento delle relazioni quotidiane. Si imparano così diverse strategie per comunicare in maniera adeguata, esercitare la giusta autorevolezza sui figli, condividere valori e obiettivi, distinguere tra ciò che è solo urgente e ciò che è davvero importante, ma anche per organizzare le vacanze, concedere a tutti tempo di qualità e per gestire gli spazi in casa, segnando confini chiari tra "pubblico e privato". Tutto questo, parola di tata Lucia, può garantire o ripristinare la serenità e il piacere di stare insieme, ovvero la felicità. Vi sembra poco?

Clive Cussler's bestselling Cyclops will now be published in our popular premium format with an exciting new cover.

Piccoli capricci, problemi di concentrazione, grandi domande sulla vita e sulla morte: il percorso di crescita di un bambino mette i genitori continuamente alle prese con sfide di ogni genere. Il metodo di Tata Lucia insegna come prevenirle, dalla prima infanzia fino ai 15 anni. Basta prendere la buona abitudine di condividere la lettura con i propri figli. Dai volumetti a colori per i più piccoli ai grandi classici come Il Piccolo Principe, passando per le fiabe e le storie avventurose alla Tom Sawyer, questo libro è una guida che aiuta i genitori a scegliere i testi più adatti per ogni età e situazione. Con il suo approccio concreto Lucia Rizzi spiega anche come porre, durante la lettura e la discussione che ne segue, le domande giuste per trasmettere valori e importanti messaggi educativi. Aiutando i propri figli a sentirsi forti, consapevoli e curiosi: in poche parole, a diventare ogni giorno un po' più grandi.

Definitive account of the last great Luftwaffe attack of World War II Gripping stories of Fw 190s and Bf 109s in combat Contains hundreds of eyewitness accounts and rare photos In the early morning of January 1, 1945, as the Battle of the Bulge smoldered to an end, the German Luftwaffe--assumed to be starved of fuel and fighting spirit--launched a massive, surprise, low-level strike on Allied airfields throughout France, Belgium, and Holland, an operation code-named Bodenplatte. More than 900 German aircraft took to the skies and attacked the vulnerable fields, destroying 200 Allied aircraft and damaging 150 more. In a pyrrhic victory, the Luftwaffe lost 271 fighters, with many more damaged, and 213 pilots--irreplaceable losses at this stage of the war.

The revised and updated edition of the bestselling parenting classic Raising Girls in the Twenty-first Century is Steve Biddulph's warm, wise and up-to-the-minute look at how to help your daughter – at every age, from baby to teen. Girls today need to be strong, but also keep their hearts open. Steve brings the very best help from around the globe to build girls' self-belief in a world that often wants to tear them down. In this revised and updated edition, you'll learn how to raise your daughter to: • have a joyful childhood and not be forced to grow up too fast • navigate the fraught world of friends, peer pressure and bullying • be free and wild, to reduce anxiety, depression and self-harm • avoid technology addiction and other social media pitfalls • relate to boys with a clear head and strong heart There is also a powerful new section on '#MeToo in School', shining a light on the reality of childhood sexual harassment, and how best to help your daughter fight it. Filled with unforgettable stories that will bring you to tears, and offering clear, practical help, Raising Girls in the Twenty-first Century is not just a guidebook but a fierce call-to-arms. The world's best guide to girlhood is now in your hands.

Oggi i comportamenti tipici dell'adolescenza si presentano sempre più precocemente: i ragazzi entrano nell'"età in bilico" già a 10-11 anni, manifestando atteggiamenti ostili e di chiusura al mondo esterno. Nei casi più estremi è proprio in questo periodo che i giovanissimi rischiano di sviluppare dipendenze pericolose da alcol e droga. Il metodo educativo della tata più famosa d'Italia, dopo averci aiutato a

crescere felici i nostri bambini, si rivela utile anche in questa delicata fase di passaggio, che vede i nostri figli affacciarsi al mondo degli adulti. Creare un clima sereno, rafforzare l'autostima, il senso del dovere e di responsabilità: questi e altri i capisaldi che Lucia Rizzi traduce in miracolosi consigli pratici, utili a impostare correttamente e nei tempi giusti il percorso verso la piena autonomia. Senza dimenticare di dare preziose indicazioni ai ragazzi, parlando loro direttamente per esortarli a fare i grandi.

Ranked by many scholars as the greatest master of early Italian Renaissance painting, Masaccio (1401-1428) was the first artist to use effects of light to create three-dimensional images on a two-dimensional plane. This achievement, revolutionary in Masaccio's day, is one of the painter's significant contributions to art history. This book explores Masaccio's accomplishment as epitomized by the multipaneled painting of which the Saint Andrew panel is thought to have once formed a part: the Pisa Altarpiece, one of the truly great polyptychs in the history of Italian Renaissance art, produced in 1426 for a chapel in the church of Santa Maria del Carmine, Pisa. The text discusses Masaccio's short life and illustrious career; the commission for the altarpiece; its patron and program; the painting's original location; and the role that the church friars played in the actual commission. Finally, after examining the polyptych's individual panels, the book traces their subsequent history and recounts how art historians came to identify them.

Avere un figlio è la più grande gioia della vita e vederlo crescere una vera soddisfazione per i genitori: il suo primo vagito, i primi passi, l'inizio della scuola... Poi, in quello che sembra un attimo ma sono quindici anni, ci si ritrova di fronte un ragazzo con la barba, con sempre maggiori richieste di autonomia e atteggiamenti insofferenti, se non ostili, nei confronti di mamma e papà. I quali, a quel punto, si domandano: dove abbiamo sbagliato? Lucia Rizzi, ormai da anni punto di riferimento per le famiglie italiane, è convinta che l'educazione sia un "lavoro" che va portato avanti dal primo giorno e poi, costantemente, per tutti gli anni di vita insieme, anche fino alla maggiore età. I comportamenti di un adolescente possono essere la conseguenza del percorso che ha fatto nella prima infanzia e poi in tutte le fasi a seguire. Ecco allora che la Tata più famosa d'Italia offre questo nuovo corposo volume per accompagnare i lettori, genitori o educatori, ma anche i ragazzi cui spesso si rivolge direttamente dalla nascita (come preparare la cameretta? Come gestire la gelosia del fratellino? Lettone: sé o no?) ai primi 36 mesi periodo in cui è fondamentale impostare le buone abitudini, anno per anno fino all'adolescenza, senza tralasciare alcuna tappa e con un lungo capitolo sulla scuola, imprescindibile palestra educativa. Appare chiaro, da queste pagine, come possa essere gestita una famiglia per "funzionare" e diventare una squadra vincente: con la propria specificità ma con regole chiare e inequivocabili e, soprattutto, fatte rispettare con costanza. Sembra difficile? No, se ci si abitua al "rinforzo positivo", incentivando i comportamenti corretti anziché punendo quelli negativi. I segreti delle famiglie felici è un libro indispensabile in ogni casa in cui nasca un figlio, in cui crescano bambini e ragazzi, per dimenticare ansie, stanchezza e preoccupazioni, e vivere in serenità gli anni più belli della vita.

In his haunting follow-up to the acclaimed *Beneath the Mountain*, Luca D'Andrea returns to the stunning Italian landscape of Alto Adige in this clever, twisting thriller that follows a woman on the run from her crime boss husband and the assassin sent to kill her. The Italian region of Alto-Adige is the northernmost part of the county, bordering Switzerland and Austria. The majestic Dolomites mountain range encompasses the area creating stark, beautiful landscapes. But this place of beauty also hides an evil side. For within the shadows of the towering Dolomites' peaks, one man has forged a reign of terror. Since World War II, when he was only a boy, Herr Wegener has been entrenched in a black market crime organization. He is feared by all and controls everyone: politicians, police, and his wife Marlene. But Marlene has finally had enough... Unable to take her husband's abuse and cruelty anymore, Marlene has reached her breaking point and goes on the run—but not before stealing millions of lire worth of sapphires from Wegener's safe as well as his car. Marlene was a young woman when Wegener fell into her life by chance while she was working at a hotel to earn money for her family who still lives in a rural mountain town. He represented protection and sanctuary—until she found out too late how he made his money. But no one escapes Wegener, and he will make sure Marlene pays for her betrayal. Wegener sends a notorious assassin to kill his wife—an assassin known solely as The Trusted Man and who always gets the job done. Once he is given an assignment, he sees it through to the end no matter how difficult. Normally, this wouldn't be a problem for Wegener. But then one of his men discovers the one fact that would make him want Marlene alive. She's pregnant with his son.... With nightmarish villains and kind-hearted heroes, *Sanctuary* is a fairy tale-esque thriller that will leave readers racing through its pages to keep up with a cat and mouse game between a lunatic crime boss and his desperate, pregnant wife.

Leon Krier is one of the best-known—and most provocative—architects and urban theoreticians in the world. Until now, however, his ideas have circulated mostly among a professional audience of architects, city planners, and academics. In *The Architecture of Community*, Krier has reconsidered and expanded writing from his 1998 book *Architecture: Choice or Fate*. Here he refines and updates his thinking on the making of sustainable, humane, and attractive villages, towns, and cities. The book includes drawings, diagrams, and photographs of his built works, which have not been widely seen until now. With three new chapters, *The Architecture of Community* provides a contemporary road map for designing or completing today's fragmented communities. Illustrated throughout with Krier's original drawings, *The Architecture of Community* explains his theories on classical and vernacular urbanism and architecture, while providing practical design guidelines for creating livable towns. The book contains descriptions and images of the author's built and unbuilt projects, including the Krier House and Tower in Seaside, Florida, as well as the town of Poundbury in England. Commissioned by the Prince of Wales in 1988, Krier's design for Poundbury in Dorset has become a reference model for ecological planning and building that can meet contemporary needs.

Dental implants have become one of the most popular and rapidly growing techniques for replacing missing teeth. While their predictability, functionality, and durability make them an attractive option for patients and clinicians alike, complications can arise at any stage from patient assessment to maintenance therapy. *Dental Implant Complications: Etiology, Prevention, and Treatment, Second Edition*, updates and expands the hallmark first edition, which was the first comprehensive reference designed to provide clinicians of all skill levels with practical instruction grounded in evidence-based research. Featuring cases from a variety of dental specialties, the book covers the most commonly occurring implant complications as well as the unique. *Dental Implant Complications: Etiology, Prevention, and Treatment, Second Edition*, is organized sequentially, guiding the reader through complications associated with the diagnosis, treatment planning, placement, restoration, and maintenance of implants at any stage. Complications associated with various bone augmentation and sinus lift procedures are also discussed in detail with emphasis on their etiology and prevention. Each chapter utilizes a highly illustrated and user-friendly format to showcase key pedagogical features, including a list of "take home tips" summarizing the fundamental points of each chapter. New chapters include discussions of complications from drug prescribing, implant naturalization, cemented restorations, loose implant restoration syndrome, and craniofacial growth. Readers will also find more case presentations to see how complications have been managed in real-world situations. *Dental Implant Complications: Etiology, Prevention, and Treatment, Second Edition*, brings together contributions from leading experts in the field under the superior editorship of Dr. Stuart Froum. With its pragmatic approach to preventing and managing implant complications, this expertly crafted text continues to serve as an indispensable clinical reference and guide for all dentists placing or restoring implants.

Da 0 a 15 anni: tutti i consigli della Tata più famosa d'Italia in un unico volume. L'ebook contiene: - FATE I BRAVI! (0-3 ANNI) Lucia Rizzi, esperta di comportamenti dell'infanzia, si dedica alla fase cruciale che va dalla nascita ai 3 anni, presentando regole chiare e consigli efficaci per accogliere il neonato in famiglia e accompagnarlo nell'affascinante percorso alla scoperta del

mondo. - FATE I BRAVI! (3-11 ANNI) Avete perso il controllo dei figli? Tata Lucia presenta un metodo efficacissimo di conduzione della famiglia (con figli dai 3 agli 11 anni), basato sulle più avanzate teorie d'oltreoceano e, al tempo stesso, su principi di buon senso che, chissà perché, ci siamo dimenticati: stabilire regole chiare, inequivocabili, farle rispettare con costanza, senza mai scoraggiarsi. - FATE I BRAVI! (10-15 ANNI) È il periodo più difficile in assoluto per genitori ed educatori. Lucia Rizzi, dopo averci insegnato a far crescere felici i nostri figli dalla culla alla preadolescenza, propone questo nuovo libro su quella che definisce "l'età in bilico", in cui i ragazzi sono un po' ancora bambini e un po' già adulti, mentre madri e padri sono combattuti fra il desiderio che diventino grandi e l'istinto di continuare a proteggerli.

Se fare i genitori è un "lavoro" che non conosce pause, anche il tempo libero può essere impiegato per imparare, ma con gusto e senza annoiarsi. La tata Lucia, ormai da anni un punto di riferimento sicuro per i genitori italiani, ci offre ancora una volta il suo aiuto prezioso, suggerendo un'ampia e variegata serie di giochi e attività per far crescere sereni i nostri figli e consolidare i rapporti familiari. Con un occhio attento al divertimento: in casa o all'aria aperta, in due o in tanti, quando apparecchiate la tavola o durante un viaggio in automobile, il gioco è più bello e funziona meglio se partecipano tutti. Per vivere felicemente in armonia, bambini, ragazzi e genitori.

Presents a coherent model for understanding historical examples in Ancient Rome and their rhetorical, moral and historiographical functions.

The story is told by Coriander, daughter of a silk merchant in 1650s London. Her idyllic childhood ends when her mother dies and her father goes away, leaving Coriander with her stepmother, a widow who is in cahoots with a fundamentalist Puritan preacher. She is shut away in a chest and left to die, but emerges into the fairy world from which her mother came, and where time has no meaning. When she returns, charged with a task that will transform her life, she is seventeen. This is a book filled with enchantments -- a pair of silver shoes, a fairy shadow, a prince transformed into a fox - that contrast with the heartbreaking loss and cruelty of Coriander's life in the real world. With its brilliantly realized setting of old London Bridge, and underpinned by the conflict between Royalists and Puritans, it is a terrific page turner, involving kidnapping, murder and romance, and an abundance of vivid characters. Coriander is a heroine to love. Her story will establish Sally Gardner as a children's writer of boundless imagination and originality.

The purpose of this Special Issue is to provide a thorough and up-to-date presentation of research investigating the impact of coffee and/or caffeine intake on various health outcomes. We welcome the submission of original research articles and/or systematic Reviews/meta-analyses focusing on several aspects of coffee/caffeine intake in relation to human health. Areas of interest include, but are not limited to, the following topics: - Human clinical trials of coffee or caffeine use in relation to disease or intermediate phenotypes. - Epidemiological studies of habitual coffee or caffeine intake in relation to human health, among the general public, as well as, among special populations (i.e., children, pregnant women, diabetics, cancer patients, hypertensives, etc.) - Mechanisms of action of nutrients and other bioactive components of coffee/caffeine. - Studies integrating genetic or physiological markers of coffee/caffeine intake to investigations of coffee and health.

This book provides in-depth information on basic and applied aspects of biofuels production from algae. It begins with an introduction to the topic, and follows with the basic scientific aspects of algal cultivation and its use for biofuels production, such as photo bioreactor engineering for microalgae production, open culture systems for biomass production and the economics of biomass production. It provides state-of-the-art information on synthetic biology approaches for algae suitable for biofuels production, followed by algal biomass harvesting, algal oils as fuels, biohydrogen production from algae, formation/production of co-products, and more. The book also covers topics such as metabolic engineering and molecular biology for algae for fuel production, life cycle assessment and scale-up and commercialization. It is highly useful and helps you to plan new research and design new economically viable processes for the production of clean fuels from algae. Covers in a comprehensive but concise way most of the algae biomass conversion technologies currently available Lists all the products produced from algae, i.e. biohydrogen, fuel oils, etc., their properties and potential uses Includes the economics of the various processes and the necessary steps for scaling them up

Quantitative Structure-Activity Relationships (QSARs) are increasingly used to predict the harmful effects of chemicals to humans and the environment. The increased use of these methods in a variety of areas (academic, industrial, regulatory) results from a realization that very little toxicological or fate data is available on the vast amount of chemicals to which humans and the environment are exposed. Predicting Chemical Toxicity and Fate provides a comprehensive explanation of the state-of-the-art methods that are available to predict the effects of chemicals on humans and the environment. It describes the use of predictive methods to estimate the physicochemical properties, biological activities, and fate of chemicals. The methods described may be used to predict the properties of drugs before their development, and to predict the environmental effects of chemicals. These methods also reduce the cost of product development and the need for animal testing. This book fills an obvious need by providing a comprehensive explanation of these prediction methods. It is a practical book that illustrates the use of these techniques in real life scenarios. This book will demystify QSARs for those students unsure of them, and professionals in environmental toxicology and chemistry will find this a useful reference in their everyday working lives.

Marco Polo was nicknamed "Marco of the millions" because his Venetian countrymen took the grandiose stories of his travels to be exaggerated, if not outright lies. As he lay dying, his priest, family, and friends offered him a last chance to confess his mendacity, and Marco, it is said, replied "I have not told the half of what I saw and did." Now, in his new novel *The Journeyer*, Gary Jennings has imagined the half that Marco left unsaid as even more elaborate and adventurous than the tall tales thought to be lies. From the palazzi and back streets of medieval Venice to the sumptuous court of Kublai Khan, from the perfumed sexuality of the Levant to the dangers and rigors of travel along the Silk Road, Marco meets all manner of people, survives all manner of danger, and, insatiably curious, becomes an almost compulsive collector of customs, languages and women. In more than two decades of travel, Marco was variously a merchant, a warrior, a lover, a spy, even a tax collector - but always a journeyer, unflagging in his appetite for new experiences, regretting only what he missed. Here - recreated and reimagined with all the splendor, the love of adventure, the zest for the rare and curious that are Jennings's hallmarks - is the epic account, at once magnificent and delightful, of the greatest real-life adventurer in human history. "Shocking revelations, bank heists, mysterious gifts, inappropriately tight bodysuits, and an epic firefight will determine the fate of the Aurora Legion's most unforgettable heroes--and maybe

the rest of the galaxy as well"--

Explores four key questions around Roman funerary customs that change our view of the society and its values.

Since the first attempts at structure-based drug design about four decades ago, molecular modelling techniques for drug design have developed enormously, along with the increasing computational power and structural and biological information of active compounds and potential target molecules. Nowadays, molecular modeling can be considered to be an integral component of the modern drug discovery and development toolbox. Nevertheless, there are still many methodological challenges to be overcome in the application of molecular modeling approaches to drug discovery. The eight original research and five review articles collected in this book provide a snapshot of the state-of-the-art of molecular modeling in drug design, illustrating recent advances and critically discussing important challenges. The topics covered include virtual screening and pharmacophore modelling, chemoinformatic applications of artificial intelligence and machine learning, molecular dynamics simulation and enhanced sampling to investigate contributions of molecular flexibility to drug-receptor interactions, the modeling of drug-receptor solvation, hydrogen bonding and polarization, and drug design against protein-protein interfaces and membrane protein receptors.

Medicinal plants and their derived products remain as an indispensable source of bioactive molecules that serve as either drug candidates or lead compounds for drug design and discovery. There are several advantages for plant-derived therapeutics including wide availability, diverse pharmacological actions and a generally good profile of safety and tolerability. Over the recent years, there have been numerous reports from clinical studies testifying to the efficacy and safety of medicinal plants and phytochemicals in ameliorating several human diseases. A plethora of basic studies has also unravelled molecular mechanisms underlying the health benefits of herbal medicines. Nevertheless, issues such as identification of bioactive ingredients, standardization of the products and drug interactions remain to be further studied. In this book, we aim to put together several chapters on the medicinal properties and pharmacological action of medicinal plants, plant species and phytochemicals. The goal of this contributed volume is to present a comprehensive collection on most important therapeutic aspects of plant-derived natural products and their molecular mechanisms of action.

L'arrivo di un bambino è la gioia più grande per una coppia, ma nei primi tempi è anche fonte di paure e dubbi: perché non smette di piangere? Perché continua a svegliarsi di notte? E perché, crescendo, con i progressi si moltiplicano anche i problemi? Tata Lucia, vera Mary Poppins contemporanea ed esperta di comportamenti dell'infanzia, si dedica alla fase cruciale che va dalla nascita ai 3 anni, presentando regole chiare e consigli efficaci per accogliere il neonato in famiglia e accompagnarlo nell'affascinante percorso alla scoperta del mondo. Tutti i bambini nascono "bravi" e possono continuare a esserlo se aiutati dai genitori ad affrontare serenamente la loro età. Sarà facile, poi, essere davvero felici insieme, dimenticando ansie, stanchezze e preoccupazioni.

Avete perso il controllo dei figli? Si aggirano per casa piccoli vandali, bambini cresciuti che ancora vi schiavizzano a imboccarli e vestirli, preadolescenti impenetrabili e aggressivi e chi più ne ha più ne metta? La vita familiare è diventata un inferno? Niente paura, c'è Lucia Rizzi, la tata più famosa d'Italia. O, per essere precisi, l'unica ricercatrice italiana di un prestigioso centro studi americano all'avanguardia in materia di educazione, resa celebre dalla trasmissione tv SOS Tata. Se nel secolo scorso Mary Poppins risolveva tutto con "un poco di zucchero" e un pizzico di magia, oggi — a fronte di un radicale cambiamento della società e dei ruoli tradizionali di padre e madre — Tata Lucia presenta un metodo efficacissimo di conduzione della famiglia (con figli dai 3 agli 11 anni), basato sulle più avanzate teorie d'oltreoceano e, al tempo stesso, su principi di buon senso che già applicavano i nostri nonni e che, chissà perché, ci siamo dimenticati. Tutto ruota attorno alla felicità. L'obiettivo è creare un clima domestico sereno, pieno di gioia e gratificante per bambini, ragazzi e adulti. A questo scopo, i genitori devono iniziare fin dalla prima infanzia a stabilire regole chiare, inequivocabili, e a farle rispettare con costanza, senza mai scoraggiarsi. Un traguardo raggiungibile se ci si abitua a "rinforzare positivamente" i figli anziché sgridarli e punirli, e se li si rende man mano autonomi e responsabili, favorendone l'autostima e una crescita corretta. Questa, a grandi linee, la teoria. Lucia Rizzi offre una lunga serie di suggerimenti pratici legati alle più comuni situazioni quotidiane, esercizi finalizzati a superare i momenti critici ed esempi illuminanti in cui i lettori possono scoprire la soluzione ai loro problemi. In un libro chiaro, innovativo, che può rivoluzionare la vita della famiglia. Rendendola felice.

This insightful volumes the use of imitation and the modern cult of originality through a consideration of the disparate fates of two Venetian painters - the canonised master Titian and his artistic heir, the little-known Padovanino.

Ember of the Great River people was a carefree young woman living in a small tribe in prehistoric Germany when a sign from the gods sends her on an epic quest to the ends of the world, where the Sun sets! Armed with only her fishing spear, obsidian dagger, and a keen mind, she faces Raiders, relentless hunters, human sacrifice, wolves and a struggle against nature for her very life as she learns what it means to be a warrior and to truly live. Well researched and highly descriptive, Ember of a New World is an inspiring coming-of-age story featuring a strong female protagonist and set in the early Neolithic period of prehistoric Europe, 7500 years ago. Clothing, weapons, rituals, and daily life are described in detail as the reader is transported to wild tribal Europe.

Beer is a beverage with more than 8000 years of history, and the process of brewing has not changed much over the centuries. However, important technical advances have allowed us to produce beer in a more sophisticated and efficient way. The proliferation of specialty hop varieties has been behind the popularity of craft beers seen in the past few years around the world. Craft brewers interpret historic beer with unique styles. Craft beers are undergoing an unprecedented period of growth, and more than 150 beer styles are currently recognized.
