Vocal Technique: A Physiologic Approach, Second Edition builds upon the premise firmly established in its first edition -- a singer who understands how his or her body functions when speaking and singing will necessarily be a better singer and teacher of singing. As such, it is the ideal text for voice classes and lessons at the university level as well as for voice lessons in the independent studio. Because it is so comprehensive, including anatomy, posture, breath management, physiology of tone production, achieving resonance, the International Phonetic Alphabet (IPA), classification of voices, health care for singers, a logical method for learning repertoire, stage deportment, and technology in the voice studio, it is also an excellent book for teaching vocal pedagogy. This text provides the essential information regarding anatomic and physiologic functions connected with the speaking and singing process so that singers will learn to develop their technique fully and thus maintain optimal technical skill and vocal health throughout a long singing and/or teaching career. The technical aspects of singing are discussed in detail, giving the singer the tools to apply this technique to a wide variety of repertoire and languages. The author provides a thorough introduction to the IPA and its application to

Written between 1887 and 1890, Gabriel Faure's setting of the requiem is a departure from traditional structure. Faure said the following of his work: "It has been said that my Requiem does not express the fear of death and someone has called it a lullaby of death. But it is thus that I see death: as a happy deliverance, an aspiration towards happiness above, rather than as a painful experience." This score represents the choral portion of the Requiem, each voice on a separate staff, including solos, with both Latin and English text. This book has an orchestra reduction for either piano or organ accompaniment by Malcolm Binney. Includes: * Introit et Kyrie * Offertoire * Sanctus * Pie Jesu * Agnus Dei * Libera Me * In Paradisum

Fauré moved systematically through his poetic contemporaries, exhausting Baudelaire's *Les fleurs du mal* before immersing himself in the Parnassian poets. He would set nine poems by Armand Silvestre in swift succession (1878-84), seventeen by Paul Verlaine (1887-94), and eighteen by Charles Van Lerberghe (1906-14). As an artist deeply engaged with some of the most important cultural issues of the period, Fauré reimagined his musical idiom with each new poet and school, and his song cycles show the same sensitivity to the poetic material. Far more than Debussy, Ravel, or Poulenc, he crafted his song cycles as integrated works, reordering poems freely and using narratives, key schemes, and even leitmotifs to unify the individual songs. *The Fauré Song Cycles* explores the peculiar vision behind each synthesis of music and verse, revealing the astonishing imagination and insight of Fauré's musical readings. This book offers not only close readings of Fauré's musical works but an interdisciplinary study of how he responded to the changing schools and aesthetic currents of French poetry.

Romantics endures, but as Benita Eisler reveals in her elegant and elegiac biography, the man was more complicated than his iconic image. A classicist, conservative, and dandy who relished his conquest of Parisian society, the Polish émigré was for a while blessed with genius, acclaim, and the love of Europe's most infamous woman writer, George Sand. But by the age of 39, the man whose brilliant compositions had thrilled audiences in the most fashionable salons lay dying of consumption, penniless and abandoned by his lover. In the fall of 1849, his lavish funeral was attended by thousands—but not by George Sand. In this intimate portrait of an embattled man, Eisler tells the story of a turbulent love affair, of pain and loss redeemed by art, and of worlds—both private and public—convulsed by momentous change.

The career of Gabriel Fauré as a composer of songs for voice and piano traverses six decades (1862-1921); almost the whole history of French mélodie is contained within these parameters. In this book, the distinguished accompanist and song scholar Graham Johnson places the vocal music within twin contexts: Fauré's own life story, and the parallel lives of his many poets. Each of Fauré's 109 songs receives a separate commentary. Additional chapters for the student singer and serious music-lover discuss interpretation and performance in both aesthetical and practical terms and Richard Stokes
