Given the significance of a feasibility study in decision making and implementation of the project, many people especially potential investors, financiers or even management lack the practical knowledge of feasibility study. In this regard, it becomes difficult to write a feasibility study which will provide a road map for a particular project. Based on this notion, this book sets to address those practical challenges in preparing a feasibility study. The purpose of the book is to provide practical guide to write a feasibility study to determine the viability of a specific project. Specifically, this will book will provide the

description of every important section in a feasibility study with vivid illustration. This dissertation, "Undeclared Passion and Ungraded Beauty: a Feasibility Study of Setting up a Heritage Trail on a Non-historic Campus" by Siu-ye, Yeung, ???, was obtained from The University of Hong Kong (Pokfulam, Hong Kong) and is being sold pursuant to Creative Commons: Attribution 3.0 Hong Kong License. The content of this dissertation has not been altered in any way. We have altered the formatting in order to facilitate the ease of printing and reading of the dissertation. All rights not granted by the above license are retained by the author. Abstract: ?The aim of this dissertation is to test the feasibility of setting up a heritage trail on a non-historic campus as an effective educational tool to facilitate cultural identification among students. The ELCHK Lutheran Secondary School is used as a case study. Since understanding the place is fundamental to value-based conservation, heritage education for students should start from their acquainted environment with a sense of belonging. Existing external heritage resources provided to schools are not sufficient to meet the mounting needs for cultural heritage education. One's own campus should be incorporated into the design of teaching and learning activities. In this dissertation, an in-house, on-campus heritage trail is set up on a non-historic campus, with neither declared monuments nor graded historic buildings, through a stakeholder participation approach. Major visiting points are determined according to an opinion survey of the stakeholders. The proposed trail can also be used for docent service for visitors and other orientation programs. The

proposed campus heritage trail may only be operated on a pilot scale in view of its inherent limitations of small campus size and low degree of attractiveness. Its non-historic nature also implies lack of adequate funding for management and impetus for conservation. Nonetheless, implementation and evaluation of the proposed learning activities should still be tried out. If review proves that utilization of the trail is an effective tool to cultivate a sense of identity, continuity and belongings among students, the feasibility of the proposal can be verified. An ordinary school, as long as it is loved and has its own identity and individuality, deserves recognition and conservation. Regardless of age, non-historic places have to be taken care of with passion and enthusiasm before they can gradually evolve into more historic and precious jewels.

"This study is a feasibility analysis of a European platform for data and information exchange for the European fruit and vegetable market. The specific tasks of the study are defined in details by the Tender specifications as follows: Task 1- Legal assessment: compatibility of the platform with European Union law, and national law on competition and data privacy, if relevant. Task 2 - Collection of existing data and methodology: overview on existing data collection and processing mechanisms in at least 3 of the main producing Countries. Task 3- Technical requirements of the platform: technical requirements for the platform. Task 4- Conclusions and

recommendations: feasibility of the platform implementation."--Editor.

This book describes how managers can do various important feasibility analyses for new products. The feasibility studies covered in the book are Market Feasibility, Economic Feasibility, Financial Feasibility and Operational Feasibility. The book draws theory and practice from strategic management and strategic marketing and used a general rather than sector and country specific view in its approach.

There has been a dramatic demographic shift from rural areas to cities in sub-Saharan African countries over the last few decades. This continuing urbanisation trend has created new challenges for local governments in terms of managing urban services, since over half of the city streets in these countries have no names or addresses, and the problem is particularly acute in the poorest neighbourhoods. This publication examines the use of street addressing initiatives to address this problem, giving information on current and future applications, considering examples of use in many African countries, and setting out a methodological guide for implementing such initiatives.

This second publication in the CTA series of food processing manuals, compiled by contributors from several developing countries, covers markets and marketing for meat and fish, planning production, meat processing, fish processing, quality assurance and legislation, and financial management (See also 1041, 1176).

This is the first in a series of manuals on small-scale food processing, compiled by contributors from several developing countries. Intended as a practical guide for people starting or operating a food business, it covers a range of topics including: hygiene, equipment, product testing, suppliers and retailers, and financial, production and staff management.

Information and Communication Technology (ICT) is becoming indispensable in the spheres of business, government, education and entertainment. It makes Internet marketing, e-government, e-learning and online chat services possible. And its commercial aspect, e-commerce, is part of this trend. Today, no business training is complete without the inclusion of at least the basics of e-commerce. But although e-commerce has opened up new opportunities, it also presents threats and risks. The success of e-commerce hinges on security and trust. Every business manager should therefore have a fundamental awareness of the meaning of e-commerce and ICT security and risk management. This second edition provides guidelines for overcoming these challenges by exploring the ways in which entrepreneurs and managers should co-operate with IT experts to exploit opportunities and combat the threats imposed by new technologies.

"This study is the feasibility analysis of a platform for data and information exchange for the European fruit and vegetables market. ...To develop the study, five organisations which produce information for the fruit and vegetable industry have been identified in Belgium, France, Hungary, Italy, and Spain.
