An Anthropology of Marxism offers Cedric Robinson's analysis of the history of communalism that has been claimed by Marx and Marxists. Suggesting that the socialist ideal was embedded both in Western and non-Western civilizations and cultures long before the opening of the modern era and did not begin with or depend on the existence of capitalism, Robinson interrogates the social, cultural, institutional, and historical materials that were the seedbeds for communal modes of living and reimagining society. Ultimately, it pushes back against Marx's vision of a better society as rooted in a Eurocentric society, and cut off from its own precursors. Accompanied by a new foreword by H.L.T. Quan and a preface by Avery Gordon, this invaluable text reimagines the communal ideal from a broader perspective that transcends modernity, industrialization, and capitalism.

Introduces the UNIX environment for the Mac OS X Tiger and explains how to set up and configure the Terminal application; how to manage, create, and edit files; and how to navigate the Internet.

"Solveig Hisdal is not only aware of the knowledge housed in Norway's museums, she has also learned how to use it. She has visited museums throughout the country, searching eagerly for the treasures that her ancestors left behind. She has found textiles, chests, cabinets and old folk costumes that have later become her greatest source of inspiration. This book is a result of her quest, and it shows how the creativity of the past has inspired her to make beautiful knitted designs. It contains wonderful knitting ideas for almost all occasions, from a child's christening outfit to an exquisite, knitted bridal cardigan with beads and silk. Whether you wish to be inspired by the beautiful pictures, or knit some of the outfits -- enjoy the book!"--P. [4] of cover.

Explore the powers of Raspberry Pi and build your very own projects right out of the box About This Book From robotics to gaming, this Learning Path will unlock your creativity! Build your own impressive IoT projects to transform your home

Featuring some of Packt's very best Raspberry Pi content, this Learning Path doesn't just get you to your destination – it opens up a whole horizon of possibilities! Who This Book Is For Want new ideas for your next Raspberry Pi project? Got one lying around gathering dust? This Learning Path gets you straight into the creative dirty work of programming and playing with your pi. Whether your new to Raspberry Pi, or an experienced maker, we think this Learning Path will inspire you and get your creative juices flowing! What You Will Learn Discover an aweome range of Raspberry Pi projects Bridge the gap between software and hardware through your Pi and find out how to make an operating system interact with cameras and other hardware Find out how to use your Raspberry Pi for gaming Secure your home with this tiny computer! Make science fiction a reality – build a walking robot In Detail Looking for inspiration for your next Raspberry Pi project? Not sure where to begin? This Learning Path is the perfect place to begin, providing you with an accessible yet comprehensive journey through Raspberry Pi. Following three modules, you'll soon be confident and prepared to get creative with your microcomputer. Raspberry Pi by Example is the first module in this Learning Path – and it does exactly what it says. It doesn't just teach, it shows you how to go and build some awesome Raspberry Pi projects immediately. Build and play your own games with the Pi, build a complete Internet of Things home automation system that controls your house through Twitter... let your imagination run wild! In the next module we'll look in more depth at building a home security system. You'll be using some of the skills you devoped through the first module, but apply them to something more intricate and impressive. Using a Linux based operating system as the foundations, you'll gradually build up an entire security infrastructure adding cameras, remote controls, and even intrusion alerts! In the final module, we'll take you into the world of Raspberry Pi robotics. By the end of it, you'll have built a biped robot that can interact with its environment! This Learning Path combines some of the best that Packt has to offer in one complete, curated package. It includes content from the following Packt products: Raspberry Pi By Example by Ashwin Pajankar and Arush Kakkar Building a Home Security System with Raspberry Pi by Matthew Pole Raspberry Pi Robotics Essentials by Richard Grimmett Style and approach It's not every day you build a home automation system. It's not every day you build a walking robot. But with this Learning Path you'll do just that. So get started and let this tiny computer expand your imagination.

Journey through a small suburban town and view a special friendship through the

eyes of a marble. If you've ever played with marbles, you know how beautiful they can be. There are several different types of marbles, big and small, different colors, alternate designs. And then, there is Aggie, a very special marble. This tale is told from an unusual perspective. Follow a story of adventure, friendship, caring, giving and sacrifice. But most of all, the book details a colorful journey that will enhance the imagination of young readers. This booklet also includes a brief description of the game of marbles. It details what materials are needed and how to set the game up for initial play. The rules of marbles are listed in an easy to understand format. So, why not play one of the oldest and most treasured games right now? This short picture book is targeted at younger children, but the game itself applies to all ages that are able to use marbles, although this may depend upon your own child's progress. The story was developed to learn about friendship, giving, sharing, and acceptance by traveling through the virtual eyes of a marble. The sentences in this book are relatively easy to read, with photographs to help understand the story.

'When you look up at that sky, tell me you don't know the world is bigger than this farm.' Teddy Broderick is committed to her busy life in the country - seeding, harvest, shearing, and the daily milking of her grandmother's cow - but she dreams of another life, in the world beyond the farm gate. But just as she thinks she knows everything about her family, her grandmother Deirdre announces there is a house buried on the property, and archaeologist Will Hastings is coming to dig it up. What is hidden in Deirdre's childhood home that she needs to see again before she dies? What is preventing Teddy from living the life she truly wants, and will she ever find her freedom? As Teddy and Will work to expose past secrets to the light,the stories they tell bring them together, and unearth a whole world of buried treasures. Sixteen-year-old Alaric discovers how to travel to an alternate reality, where his mother is alive and his place in the family is held by a girl named Naia.

While the Internet revolution has vastly improved communication among businesses and individuals, pressure has been building for faster and less expensive broadband data services. Such services could not only yield vastly improved and less expensive provision of traditional applications such as voice telephony and Web browsing, but could also enable new applications such as Internet-based television, videoconferencing, and software distribution. However, broadband services and prices have not kept pace either with demand or with progress in information technology. This new book analyzes the markets and policy issues underlying the broadband dilemma. Charles Ferguson asserts that the Telecommunications Act of 1996 and federal policy have failed to provide sufficient levels of new entry, competition, and innovation in the local telecommunications market, which remains dominated by monopoly telephone companies. New entrants and Internet-based firms such as competitive local exchange carriers (CLECs), Internet service providers (ISPs), and enhanced service providers (ESPs) remain disadvantaged relative to the monopoly incumbent local exchange carriers (ILECs). Flawed policy has also allowed ILECs to continue to engage in monopolistic practices, mergers, and anticompetitive conduct. Through a combination of inefficiency and rational monopolistic conduct, the ILECs are thus able to retard the deployment of new technology and services through delaying tactics, regulatory procedures, litigation, and political influence. Competition from the cable television (CATV) industry probably cannot fully address these problems. The CATV industry cannot compete in most business markets. In residential markets CATVs competitive potential is greater, but CATV vendors incentives to favor their own networks, services, and proprietary content raise major concerns analogous to those raised by the ILECs. The combined result of these market and policy failures is inadequate technological progress, innovation, and productivity growth in advanced Internet services and in telecommunications services generally. This significantly retards U.S. and global

economic growth, perhaps by as much as one percent per year. Ferguson believes federal policy must be adjusted to ensure the robust infrastructure necessary for advanced Internet services, electronic commerce, open-systems HDTV, videoconferencing, and improved voice telephony. Ferguson recommends several policy changes, including increased regulatory surveillance of ILEC conduct, antitrust actions against ILECs, limits on conflicts of interest in government and academia, limits on CATV control of proprietary content, and possibly tax measures to stimulate construction of competitive
