Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last and 5,387,862nd original Mini rolled off the production line in October, 2000. In July 2001, BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as popular as the original from 1959.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

There are a million cat stories in the naked city. This is one of them . . . There are days when everything seems to go wrong—days that can crack even the hardest New Yorker: your cab breaks down, an address that Google Maps assures you exists is nowhere to be found, nobody you ask for directions has any idea what you're talking about, you lose your cell phone, it starts to rain and you can't find your umbrella . . . Throw in trying to get three fussy felines to their first appointment with a new vet on time, and that's the day Gwen Cooper is having. As she treks the streets of Manhattan with her three cranky (and surprisingly heavy!) cats in tow, the real question isn't if she'll make it to the vet's office on schedule—it's whether her sanity will still be intact by the time she gets there. A hilarious account of one long day's wacky adventures and misadventures, "Cat Carrier Tango" is the fourth installment in the Curl Up with a Cat Tale monthly story series from Gwen Cooper, author of the smash hit Homer's Odyssey: A Fearless Feline Tale. Meant to be read in a warm bubble bath, or with a glass of wine in hand, it's sure to keep you laughing from start to finish!

From the creator of Splatterpunk Zine comes Splatterpunk's Not Dead, an anthology consisting of 8 horror stories, ranging from new upcoming writers to genre favourites, featuring new fiction by Jeff Strand, Adam Cesare, Shane McKenzie, Nathan Robinson, Robert Essig, Brendan Vidito, Saul Bailey and Paul Shrimpton. Edited by Jack Bantry and including an introduction by Jeff Burk, head editor at Deadite Press. Praise for Splatterpunk Zine: "Splatterpunk is 100% the real deal, and if seedy-but-brilliantly-written hardcore horror is your pleasure, guilty or otherwise, I'd say this zine is essential reading." - Kit Power, Ginger Nuts of Horror "These are great days for horror fiction and Splatterpunk is a great return to bloody roots." - John Boden, Shock Totem "It's a zine

in the 80s sense of the word... It makes me nostalgic" - Wrath James White "This is an old school handmade hardcore horror fiction zine... I liked it a lot." - Mark Sieber, Horror Drive-In "Bantry is providing a great time for fans of horror fiction. If you haven't jumped on this viscera-covered bandwagon, what are you waiting for?" - Sean Leonard, HorrorNews.net "Splatterpunk Zine has thrown down the gauntlet to any and all challengers, and assumed its place at the head of the pack. This is exactly how underground horror fiction should be, unfettered, uncompromising and deliciously nasty. Horror has a new voice." - Mass Movement "Sometimes you stumble across something and you want to tell the world about it. It happens I've found something I'd like to share, something joyous, yet unsettling, amateur, yet smart. I'm talking about Splatterpunk Zine." - Snakebite Horror Fisher and Garvey review the best of the beaches, bring the best of the Minoan and ancient sites to life, and steer visitors through the fumes Samarian gorge as well as less explored routes, in this "excellent and characterfully written" ("The Times") guidebook. of color photos. 25 maps.

Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars, sport-utility vehicles, minivans, and other light-duty vehicles without compromising vehicle performance or safety.

Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines: spark-ignition gasoline, compression-ignition diesel, and hybrid. According to its estimates, adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark-ignition engines could reduce fuel consumption by 29 percent at an additional cost of \$2,200 to the consumer. Replacing spark-ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately \$5,900 per vehicle, and replacing spark-ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of \$6,000 per
