This engaging, heart wrenching story of a young woman lost in a society that's not built for her family nor her life, Christine's story will keep you at the edge of your seat and leave you with feelings of hope, relief, and awe.

A disgruntled federal worker with top-secret clearance decides to get even with his bosses by selling critical security data to America's enemies, resulting in horrifying consequences to the U.S. Government. It also brings into play Omar Husain, a faceless, nameless master terrorist, known only by the FBI code-name Saladin. Consumed by hatred the day he lost his entire family including Kamilah, his fiancée, in southern Lebanon during the '82 Arab-Israeli war, he commits himself to the Jihad. Out of the ruins of his life, he carries a relic of his love for Kamilah whose mother is a Christian-a copy of the Holy Bible. A quarter of a century before, Sister Caterina, an Italian nun on a mission in the Philippines, had written a message inside the book which she would later give Kamilah's mother as a gift. Holding Julie Santorelli-a niece of Sister Caterina and a witness to his identity-captive while hunted by the FBI, memories of the past overwhelm him. Seeing Julie in anguish reminds him of Kamilah. He struggles with guilt. Here, his hatred finally succumbs to it when he recalls the message in the Bible which, in part, says: ' what good is a victory if it turns you into your enemy?'

Beyond Clinical Dehumanisation Toward the Other in Community Mental Health Care offers a rare and intimate portrayal of the moral process of a mental health clinician that interrogates the intractable problem of systemic dehumanisation in community mental health care and looks to the notion of "wonder" and the visionary relational ethics of Emmanuel Levinas for a possible cure. An interdisciplinary study with transdisciplinary aspirations, this book contributes an original and compelling voice to the emerging therapeutic conversation attempting to re-imagine and transcend the objectifying constraints of the dominant discourse and the reductive world view that drives it. Chapters bring into dialogue the fields of community mental health care, psychology, philosophy and the Other, the philosophy of wonder, Levinasian ethics, clinical ethics, the moral research of autoethnography and the medical humanities, to consider the defilement of the vulnerable help seeker, the moral injury of the clinician and look for answers beyond. This book is an ethical primer for mental health professionals, researchers, educators, advocates and service users working to re-imagine and heal a broken system by challenging the underpinnings of entrenched dehumanisation and standing with those they "serve".

Smart. Funny. Fearless."It's pretty safe to say that Spy was the most influential magazine of the 1980s. It might have remade New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. There's no magazine I know of that's so continually referenced, held up as a benchmark, and whose demise is so lamented" --Dave Eggers. "It's a piece of garbage" --Donald Trump.

Book 4 in a continuing series, so be sure to read books 1 to 3, first. "Great read rivals Cussler and Riely...Thank you." - reader comment left on author's site. Is there a clandestine world of tunnels and bases underground? Who is living in them? What do they want with humanity? Leon Verdat thought he knew all there was to know about building underground tunnels and structures. His civilian contracting business was doing very well and his family was thriving. Then, he got a visit from a mysterious Man in Black and all that changed. He was introduced to the world of black budgets and secret military underground bases; the work of the "shadow government" and the ultra-rich. Now, his life will never be the same again, if he survives... There are a lot more things than he bargained for deep underground, and some of them have been here for a very long time. A sci-fi thriller from David Sloma  
The inspiration behind this book series? Many late nights listening to Coast to Coast AM, since the early days of Art Bell, where he'd have many guests on that talked about aliens and underground secret bases (mostly in the southwest USA desert, like Area 51, but also bases all over the world), like Whitley Strieber, Richard Dolan, Roger Lear, Richard Sauder, and more. Guests spoke about real life bases and also told some fictional stories. Some spoke about both. These books take a sampling of the facts that have been made public about D.U.M.B.s and adds some imaginative speculation to create a brand new, wild fictional ride! Author

The legions of Bob Dylan fans know that Dylan is not just a great composer, writer, and performer, but a great thinker as well. In *Bob Dylan and Philosophy*, eighteen philosophers analyze Dylan's ethical positions, political commitments, views on gender and sexuality, and his complicated and controversial attitudes toward religion. All phases of Dylan's output are covered, from his early acoustic folk ballads and anthem-like protest songs to his controversial switch to electric guitar to his sometimes puzzling, often profound music of the 1970s and beyond. The book examines different aspects of Dylan's creative thought through a philosophical lens, including personal identity, negative and positive freedom, enlightenment and postmodernism in his social criticism, and the morality of bootlegging. An engaging introduction to deep philosophical truths, the book provides Dylan fans with an opportunity to learn about philosophy while impressing fans of philosophy with the deeper implications of his intellectual achievements.

Transactional Analysis delineates three observable ego-states (Parent, Adult, and Child) as the basis for the content and quality of interpersonal communication. "Happy childhood" notwithstanding, says Harris, most of us are living out the Not ok feelings of a defenseless child, dependent on ok others (parents) for stroking and caring. At some stage early in our lives we adopt a "position" about ourselves and others that determines how we feel about everything we do. And for a huge portion of the population, that position is "I'm Not OK -- You're OK." This negative "life position," shared by successful and unsuccessful people alike, contaminates our rational Adult capabilities, leaving us vulnerable to inappropriate emotional reactions of our Child and uncritically learned behavior programmed into our Parent. By exploring the structure of our personalities and understanding old decisions, Harris believes we can find the freedom to change our lives.

Field education is social work's signature pedagogy, the essential preparation for professional practice. Its success depends on field educators—field instructors, task supervisors or preceptors, and faculty field liaisons—to guide and assess student learning and maintain the pedagogical integrity of the field experience. Despite its importance and complexity, few resources exist for orienting and preparing field educators. This anthology presents decision cases that depict the actual experiences of social work field educators and students. They showcase the complex dynamics of field education and highlight a range of dilemmas experienced by novice and seasoned field educators. In various combinations, the dilemmas include interpersonal boundaries, emotional reactivity, initiative, expectations, role confusion, inadequate performance, accountability, interpersonal conflict, personal values, and impairment. The cases show how other field educators have navigated the issues that typically arise, with greater or lesser success. The cases portray the intricacy and rewards of this educational role and are selected for their ability to facilitate in-depth discussion among field educators during their initial training or continuing education. Guided discussions of these cases can bolster supervisory competence and confidence. They enable field educators to develop important problem-solving and critical-thinking skills related to their overlapping roles as instructors, supervisors, mentors, advisors, colleagues, and role models, helping them thrive and continue to serve the profession. An accompanying instructor manual provides extensive information for each decision case and also includes guidance for field directors on how to use the case method of teaching and sources for additional information.

Power of Blood is the Third Book in The Broken Academy Series, a reverse harem, slow burn paranormal romance. All of the books can be read as standalone stories however series order is recommended to fully maximize enjoyment. Author note: The romance is described as "why choose" instead of reverse harem as each central female character has her cake and gets to eat it too, with multiple concurrent love interests that ebb and fall throughout the series, however there are no steamy scenes with multi-partner action. Here's what readers are saying about Power of Blood: "This book made me warm moist and intoxicated from one eye-popping ravenous page to the next. This story was definitely smokin hot with an intriguing storyline that kept me thirsty excited and on edge... I love this book it was so crazy I can't wait for the next it was such a page-turner took my breath away definitely 5 \* read." ?????? "This series keeps on getting better and better. It's fast-paced, action-packed and full of twists and turns. Loved it!" ?????? "In "Power of Blood" Jade Alters has spun a dangerously deceptive paranormal tale. The Academy is ready for war but never expected it to come from within again...This is the best book in the series, so far. Pick up a copy, you will not be disappointed!" ??????

The trilogy begins in March of 1968, when the CIA and U.S. Army INSCOM (Intelligence Security Command) learn that the Soviet Union has developed a psychic program to conduct espionage on the U.S. intelligence community. To counter this threat, they begin forming their own psychic program from the research of a similar experiment, conducted two years prior at the University of Illinois by Dr. Albert Silvers. The task of bringing this program together is put upon Director Henry Miller, a CIA veteran, and Colonel James A. Stewart, the officer in charge of INSCOM and the military liaison officer to a multitude of Department of Defense contractors, located at Johnsville Naval Air-Warfare Development Center, in Warminster, Pennsylvania. Director Miller appoints Brian Crawford, a new recruit to the CIA and former standout football player at Penn State University, to represent the CIA on his behalf. Colonel Stewart and Agent Crawford become quick friends and set out to form the Psychic Research for the advancement of Intelligence gathering on Soviet and eastern bloc Military forces, or P.R.I.S.M. Although Colonel Stewart and Agent Crawford are both skeptical of the usefulness of psychics to the intelligence community, but their opinions sway after watching old file footage of a young boy seemingly' using psychic abilities to help his family escape Communist held East Germany, and film from the failed program conducted by Dr. Silvers, of young girl using Pyro-Kinesis and another young boy using mental telepathy. They work at a blinding pace to retrieve all the data they can on these subjects. The young boy who helps his family defect from East Germany, is now a U.S. citizen and has been recruited by Director Miller to be a part of P.R.I.S.M. However, the whereabouts of the two children that were involved with Dr. Silvers' program, like their identities, are unknown. Concluding that the two children would make an excellent addition to P.R.I.S.M., Colonel Stewart and Agent Crawford begin looking for information on the two. Since neither the CIA, nor

INSCOM has any details on the two children, and Dr. Silvers was believed to have a nervous breakdown, killing himself and others in a city bus hijacking, Colonel Stewart recruits an old Army buddy, Scott Wallack, to be head of security on Project: P.R.I.S.M., and to gather any information he can from Dr. Silver's widow. Special Agent Wallack returns to Johnsville NADC with the personal journals of Dr. Silvers, and then the mystery begins to unfold. Agent Crawford comes across one of Dr. Silvers' journals and it has a particular effect on Project: P.R.I.S.M. He finds one word- Assyrr, written throughout the entire notebook. They discover that it is the name of an ancient demon that possesses its unwary victims through nightmares, ultimately driving the victim to end their own life, and the lives of others as well. Special Agent Wallack and his three man security team have an encounter with demonic influences, causing Agent Crawford to ask, "What does psychic research have to do with this demon?" The answer to that question remains a mystery, until the CIA recruit's an Exorcist/ Demonologist from the Catholic Church, Father Joseph Salomie. It becomes apparent that people with psychic abilities are in the evolutionary state of where God had ultimately planned for humanity to be. This would create a "Final Communion" with God and a world wide holy utopia. To prevent humanity from gaining such a precious ability, one in which he held so dear, but lost long ago, Lucifer sets out to halt this union of man and God. He unleashes his demonic horde to carry out his diabolical plan- a communion between humanity and himself! The members of Project: P.R.I.S.M. go head to head with the forces of evil, battling demons, political bureaucracy and enemy psychic agents, in an attempt to keep humanity on track for "Final Communion." But, will that communion be with God or Lucifer?

A key concern of researchers involved in the creation and sharing of language resources is to attain maximum usability, reliability and longevity of these resources for present and future researchers in the language sciences. The view developed in this volume is that spoken corpora construction and sharing are major research endeavours that should also be laid open to academic debate in a manner that is more visible than is currently the case in corpus linguistics. The present volume brings together multiple research perspectives to bear on the question of what constitutes best practices for the construction of spoken corpora. The book brings into closer contact scholars whose specializations have often remained in relatively different streams of scientific investigation; that is, scholars whose work falls primarily in conversation analysis, pragmatics and discourse analysis, but who are involved in spoken corpus compilation, on the one hand, and scholars who also specialize in linguistics but who have been intensively involved in developing various infrastructures for spoken corpora, on the other hand. This combination of scholars brings into better relief the concerns of data providers, data curators and data users in linguistic research. This book is thus unique in that it highlights best practices from both the perspective of assembling, annotating and linguistic analysis of spoken corpora, as well as from the perspective of processing, archiving and disseminating spoken language. In doing so, the contributions emphasise not only the considerable promise that the rapid technological changes that society continues to experience in this area offer, but also possible dangers for the unwary.
