This book presents a practical approach to pro-environmental challenges faced by companies in the process of restructuring. It contains a broad variety of case studies from different economic sectors, and small and large businesses, in four European countries: Ukraine, Romania, Germany and Poland. The studies are the results of surveys of companies that had either already restructured or were planning to, and reveal both the weaknesses and strengths in these practices. The book is divided into three parts: explorations of how political and legal factors are embedded in a company's strategy and how they influence the company's behaviour; analyses of companies' activities on matching restructuring with ecology; and approaches to ecoinnovations within the companies. The case studies throughout the book show that the restructuring of a company is an opportunity for the implementation of

proecological action and “green” business models. The authors trust that the experiences and good practices of others will prove valuable both for future businessmen (i.e. students), but also for academics and representatives of local government, central environmental agencies, owners and managers of enterprises to be restructured.

Utilizing the first thirteen chapters of Wild’s best-selling, Financial and Managerial Accounting text, Financial Accounting Fundamentals responds to the market’s request for a low-cost, succinct book; a book that balances large and small businesses, and one that is contemporary, engaging, and accessible for today’s students. Its innovation is reflected in its extensive use of small business examples, the integration of new technology learning tools, superior end-of-chapter material, and a highly engaging, pedagogical design.

Digitization promises to reshape fiscal policy by transforming how governments collect, process, share, and act on information. More and higher-quality information can improve not only policy design for tax and spending, but also systems for their management, including tax administration and compliance, delivery of public services, administration of social programs, public financial management, and more. Countries must chart their own paths to effectively balance the potential benefits against the risks and challenges, including institutional and capacity constraints, privacy concerns, and new avenues for fraud and evasion. Agribusiness Management uses four specific approaches to help readers develop and enhance their capabilities as agribusiness managers. First, this edition of the book offers a contemporary focus that reflects the issues that agribusiness managers face both today and are likely to face tomorrow. Specifically, food sector firms and larger agribusiness firms receive more attention in this edition, reflecting their increasing importance as employers of food and agribusiness program graduates. Second, the book presents conceptual material in a pragmatic way with illustrations and examples that will help the reader understand how a specific concept works in practice. Third, the book has a decision-making emphasis, providing contemporary tools that readers will find useful when making decisions in the contemporary business environment. Finally, Agribusiness Management offers a pertinent set of discussion questions and case studies that will allow the reader to apply the material covered in real-world situations.

agricultural finance. The presentation of financial economics discusses how the credit needs of farmer/borrowers are met by depositors through commercial banks. The financial management content presents methods used to make farm financial decisions including farm accounting, capital budgeting, and the analysis of risk. The textbook begins by developing the farm financial market focusing primarily on the market for debt. Next, the textbook presents an overview of accounting concepts important for the credit market. The accounting section provides a detailed discussion of the Farm Financial Standards Council's suggestions for agricultural financial statements. Following the financial accounting, the book presents the use of ratio analysis applied to the farm firm. Next, the text describes capital budgeting followed by an introduction to risk analysis. Finally, the book presents the effect of debt decisions on the farm firm. In addition to the primary topics, the textbook includes a discussion of agricultural banking and monetary policy and an analysis of the choice of historical cost and market valued accounting methodologies on the farm debt decision.

systems, reviews savings and investments in different sectors, describes accounting concepts and organizational structures, and more. Real-world examples featured throughout the text help students understand important concepts and appreciate the role of finance in various local, national, and global settings.

Designed for those who want to gain an understanding of the fundamental concepts and techniques used in financial management. An underlying premise of the book is that the objective of the firm is to maximize value or wealth. Drawing on a wealth of experience in the academic and professional worlds, the authors discuss how firms can accomplish this objective by making appropriate investment and financing decisions. Bridging the gap between financial theory and practice, the authors present fundamental concepts in an intuitive and nontechnical way, and provide numerous practical financial tips to readers. The focus is on current practice, using results from recent surveys to show the most popular techniques and approaches used by financial managers today. improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food

security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.
