Financial Markets and Institutions is aimed at the first course in financial markets and institutions at both the undergraduate and MBA levels. While topics covered in this book are found in more advanced textbooks on financial markets and institutions, the explanations and illustrations are aimed at those with little or no practical or academic experience beyond the introductory-level finance courses. In most chapters, the main relationships are presented by figures, graphs, and simple examples. The more complicated details and technical problems related to in-chapter discussion are provided in appendixes to the chapters. Since the author team's focus is on return and risk and the sources of that return and risk in

domestic and foreign financial markets and institutions, this text relates ways in which a modern financial manager, saver, and investor can expand return with a managed level of risk to achieve the best, or most favorable, return–risk outcome. In this wide-ranging book, Wall Street legend Henry Kaufman recounts the events surrounding the catastrophic collapse of Lehman Brothers from his then vantage point on the board. He explains how, ironically, the Federal Reserve’s shortcomings contributed to its growing power. And he argues that Dodd-Frank – by sanctioning rather than truly addressing the too-big-to-fail dilemma – squandered a rare opportunity for essential reform. Whether sparring in print with Citicorp’s mercurial Walter Wriston, consulting with British Prime Minister Margaret Thatcher, spurning a deal with junk bond king Michael Milken, or reflecting on his long-time friend Paul Volcker, Kaufman brings readers inside post-war Wall Street. Looking ahead, he dissects major national and global trends and the likely future of credit markets, financial institutions, and leading economies. As we search for bearings in the wake of the 2008 financial debacle, Henry Kaufman offers sage and penetrating analysis of today’s superheated and – he argues – still-fragile financial world.

"The last 30 years have been dramatic for the financial services industry. In the 1990s and 2000s, boundaries between the traditional industry sectors, such as commercial banking and investment banking, broke down and competition became increasingly global in nature. Many forces contributed to this breakdown in interindustry and intercountry barriers, including financial innovation, technology, taxation, and regulation. Then in 2008-2009, the financial services industry experienced the worst financial crisis
