Despite his relatively young age, Magnus Carlsen has already secured his place in chess history as a legend of the game. In a short space of time his accomplishments have been extraordinary. In December 2012 he broke Garry Kasparov's record to become the highest-rated chess player of all time. He followed up this achievement in 2013 by defeating Vishy Anand to become World Chess Champion. Carlsen's universal style, positional mastery and incredible mental strength add up to make him a formidable opponent. In this book, former American Open Champion Cyrus Lakdawala invites you to join him in a study of his favourite Carlsen games. Lakdawala examines Carlsen's skills in attack and defence, exploiting imbalances, accumulating advantages and endgame play, and shows us how we can all improve by learning from Carlsen's masterpieces. Move by Move provides an ideal platform to study chess. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to improve your chess skills and knowledge.

At the age of 13 years, 4 months and 26 days, Magnus Carlsen became the youngest chess grandmaster in the world. The international press raved about the Norwegian prodigy. The Washington Post even called him 'the Mozart of chess'. Ten years on Magnus Carlsen is the number one in the world rankings and a household name far beyond chess circles. Time Magazine listed him as one of the 100 most influential people in the world in 2013. How Magnus Carlsen Became the Youngest Chess Grandmaster in the World is the fairy-tale-like story of his rise. The story-teller could not have been better qualified. Simen Agdestein trained Magnus in the years leading up to his grandmaster title, repeatedly pinching himself in amazement at his pupil's lightning progress. While you follow Magnus on his wonderful journey, Agdestein is your guide, providing insights into the Carlsen family life and explaining the secrets of Magnus' play in clear and instructive comments. This is an inspiring book for any chess player. It will fascinate parents and help gifted children to realize their full potential.

In 1970 Bobby Fischer started his phenomenal run that would end two years later with the Match of the Century in Reykjavik, against World Champion Boris Spassky. He began by sweeping the field at the 23-round Palma Interzonal Tournament to qualify for the next stage of the cycle. In the Candidates Matches he first faced Mark Taimanov, in Vancouver. Fischer trounced the Soviet ace. Then, a few months later in Denver, he was up against Bent Larsen, the Great Dane. Fischer annihilated him, too. The surreal score in those two matches, twice 6-0, flabbergasted chess fans all over the world. In the ensuing Candidates Final in Buenos Aires, Fischer also made short shrift of former World Champion Tigran Petrosian, beating him 6½-2½. Altogether, Fischer had scored an incredible 36 points from 43 games against many of the world's best players, including a streak of 19 consecutive wins. Bobby Fischer had become not just a national hero in the US, but a household name with pop-star status all over the world. Jan Timman chronicles the full story of Fischer's sensational run and takes a fresh look at the games. The annotations are in the author's trademark lucid style, that happy mix of colourful background information and sharp, crystal-clear explanations.

Christof Sielecki presents a repertoire for Black against mainline 1 d4, with the Nimzo-Indian and Bogo-Indian defenses. Sielecki focuses on lines where Black adopts a dark-square strategy. This creates a system-type approach linking variations to a common theme, making the repertoire much easier to learn and understand.

"I had a fantastic position, but I couldn't figure out what to do next!" Sound familiar? If so, then Fred Wilson's Simple Attacking Plans was written for you. Novice players and amateurs of intermediate strength will benefit from the explanations of ideas and tips for practical play, all presented in an easy, conversational style. More experienced competitors will appreciate this book as a game collection featuring masterpieces of enterprising play – some of them never before published.

woman writer is rivaled only by Zora Neale Hurston's. This Norton Critical Edition of Larsen's electrifying 1929 novel is accompanied by Carla Kaplan's insightfully detailed introduction, explanatory annotations, and a Note on the Text "Backgrounds and Contexts" connects *Passing* to the historical events of the day, most notably the sensational Rhineland/Jones case of 1925. Fourteen contemporary reviews are reprinted, including those by Alice Dunbar-Nelson, W. B. Seabrook, Mary Griffin, and W. E. B. Du Bois. Little-known documents, including those by Juanita Ellsworth and Caleb Johnson, reveal America's fascination with-and fear of-the cultural phenomenon of passing. Also included are Larsen's statements on the novel and on passing, as well as a generous selection of her letters. The theme of "The Tragic Mulatto(a)" in American literature is explored through related writings by Lydia Maria Child, William Wells Brown, Kate Chopin, Mark Twain, Countee Cullen, and Langston Hughes, among others. Finally, Joseph Seamon Cotter, Jr., Jessie Redmon Fauset, Countee Cullen, W. E. B. Du Bois, Allen Semi [Nella Larsen], George S. Schuyler, Carl Van Vechten, and Langston Hughes voice their impressions of passing from the perspective of the Harlem Renaissance. "Criticism" provides sixteen diverse interpretations of *Passing* by, among others, Deborah E. McDowell, Judith Butler, Cheryl A. Wall, Thadious M. Davis, George Hutchinson, Mary Helen Washington, Ann duCille, Gayle Wald, Claudia Tate, and Jennifer DeVere Brody. A Chronology and Selected Bibliography are also included. Book jacket.

This is one of the most interesting, most unusual and most instructive chess books ever written. It is the combined work of seven of the world's strongest grandmasters: Larry Evans, Paul Keres, Svetozar Gligoric, Vlastimil Hort, Bent Larsen, Tigran Petrosian and Lajos Portisch. What makes this book especially great and useful is that each of these seven grandmasters had vastly different styles. For example, Bent Larsen used wild, unorthodox attacking lines, whereas Petrosian, who was capable of attacking when he wanted to, preferred to sniff out his opponent's chances and wait for the opponent to attack unsoundly and fall upon his own sword.

Ten of the world's strongest chess players competed in the strongest chess tournament ever held in the US. All ten of the players have provided annotations to their games. Every one of the 90 games in the tournament is annotated. All the games have been converted to modern Algebraic Notation with diagrams. The games are annotated by Jan H. Donner, Robert Fischer, Borislav Ivkov, Bent Larsen, Miguel Najdorf, Tigran Petrosian, Lajos Portisch, Samuel Reshevsky, Boris Spassky, and Wolfgang Unzicker. Introduction by Gregor Piatigorsky. Edited by Isaac Kashdan with a new foreword by Sam Sloan.

Zenon Franco guides readers through 50 top-level games, challenges them to guess key moves correctly, and poses questions at critical moments. This material has never appeared in the English language before, and represents the pick of monthly articles that Franco has written for a quarter of a century in Spanish-language magazines, revised and rechecked for this book.

“First the idea and then the move!” Miguel Najdorf used to say in his habitually enthusiastic fashion; that statement is the perfect summary of planning in chess. Planning is of crucial importance in chess and yet this is an area that has not been well discussed or explained to ambitious players who wish to improve. A very well known saying in chess is “Better a bad plan than no plan at all”. Playing without a plan – effectively staggering from one move to the next – is a recipe for disaster. It is essential to have some kind of idea of what you are trying to achieve and how to go about it. However, planning is not a straightforward matter. A good plan might be very short, lasting just two or three moves. Another plan might require almost an entire game to implement. A plan can be highly ambitious and complex or somewhat modest and simple. In chess, as in life, circumstances can change quickly and when they do, new plans are needed. How is a player expected to juggle all these different concepts while dealing with the immediate problems posed by the opponent's most recent move? In this book, grandmaster and experienced author Zenón Franco explains planning in detail. He organises material in terms of: typical structures, advantage in space, manoeuvring play, simplification and, finally attack and defence. Using games played by elite players he explains how plans are formed and carried out in these different scenarios. If you want to take your game to the next level, then Planning Move by Move will enable you to do this.

San Antonio 1972 was either the strongest chess tournament ever played in the history of the United States or, if not the very strongest, then second only to New York 1924. What makes this book especially great is not merely was it a great tournament with great players, but that the players annotated some of their own games. In this day and age, there are millions of games in the chess databases, but annotated games are increasingly hard to find. This book has games annotated by Karpov, Larsen, Hort, Suttles, Mecking, Donald Byrne, Gligoric, Keres, Saidy, Portisch, Kaplan, Evans and Smith. Two games were annotated by both Larsen and Petrosian. In addition, many of the games were annotated by International Master David Levy. This book was originally published in Descriptive Chess Notation. Since that time, Descriptive has become almost obsolete. For that reason, all 120 games in this book have been converted into modern Algebraic Notation and are included in an appendix in the back of the book. The games in the back are grouped and sorted alphabetically according to the player of the white pieces. Thus, all games in which Browne played White are first, followed by the games by Byrne, Campos-Lopez, Evans, Gligoric, Hort, Kaplan, Karpov, Keres, Larsen, Mecking, Petrosian, Portisch, Saidy and Smith in that order.

Seize the Initiative Right from the Start! Are you bored with slow maneuvering in systems such as the the Italian game with d2-d3 and the anti-Berlin? Do you enjoy confrontation in the center and sharp, tactical play? Alex Fishbein shows how the Scotch Gambit

can give you exciting yet sound positions where you aim at the enemy king. In the Scotch Gambit, White immediately strikes in the center and attacks the f7-pawn, provoking concessions from Black. An imbalance typically results, where White has attacking chances on the kingside. The Scotch Gambit will help you develop a finer feeling for the initiative and improve your combinational vision. You will also better understand strategic concepts, such as weak squares of one color and pawn structure nuances.

Fishbein, an experienced player and author, takes you into a modern grandmaster's research lab. Here, all ideas are scrutinized and prepared for use against an opponent who is similarly armed with the latest theory and technology. The most critical responses for Black receive special emphasis. Alex Fishbein is an American grandmaster. His peak world ranking was #150. He was competitive in each of his four U.S. Championship appearances, including in 2004 when he won the Bent Larsen prize for the most uncompromising chess. A lifelong 1.e4 player, Fishbein is known for interesting and creative play.

The Vignes twin sisters will always be identical. But after growing up together in a small, southern black community and running away at age sixteen, it's not just the shape of their daily lives that is different as adults, it's everything: their families, their communities, their racial identities. Many years later, one sister lives with her black daughter in the same southern town she once tried to escape. The other secretly passes for white, and her white husband knows nothing of her past. Still, even separated by so many miles and just as many lies, the fates of the twins remain intertwined. What will happen to the next generation, when their own daughters' storylines intersect? Weaving together multiple strands and generations of this family, from the Deep South to California, from the 1950s to the 1990s, Brit Bennett produces a story that is at once a riveting, emotional family story and a brilliant exploration of the American history of passing. Looking well beyond issues of race, *The Vanishing Half* considers the lasting influence of the past as it shapes a person's decisions, desires, and expectations, and explores some of the multiple reasons and realms in which people sometimes feel pulled to live as something other than their origins. As with her New York Times-bestselling debut *The Mothers*, Brit Bennett offers an engrossing page-turner about family and relationships that is immersive and provocative, compassionate and wise.

The Best Move is a collection of very hard chess problems based on actual grandmaster games. The reader is asked who has the advantage and why. Points are awarded not only for getting the answer right but for seeing deeply into the position. These problems are based primarily on the games of grandmasters Hort and Jansa. This book was later translated into German with some changes in the diagrams and published in 1982-1984.

Larry Kaufman can safely be called an exceptional chess grandmaster Larry Kaufman started out as a prodigy, however not in chess but as a whizz kid in science and math. He excels at shogi (Japanese chess) and Go, and is also a world-famous computer programmer and a highly successful option trader. Remarkably, as a chess player he only peaked at the weirdly late age of fifty. Yet his victories in the chess arena are considerable. Over a career span of nearly sixty years Kaufman won the state championships of Massachusetts, Maryland, Florida, Virginia, D.C. and Pennsylvania. He was an American Open Champion and won the U.S. Senior Championship as well as the World Senior Championship. 'Never a great chess player' himself (his words), he met or played chess greats such as Bobby Fischer, Bent Larsen, Walter Browne, Boris Spassky, Viktor Kortchnoi and many others. He worked as a second to legendary grandmaster Roman Dzindzichashvili, and coached three talented youngsters to become International Master, one of them his son Raymond. This engrossing memoir is rife with stories and anecdotes about dozens of famous and not-so-famous chess players. In one of the most remarkable chapters Larry Kaufman reveals that the American woman chess player that inspired Walter Tevis to create the Beth Harmon character of Netflix's *The Queen's Gambit* fame, is his former girlfriend. You will learn about neural networks, material values and how being a chess master helps when trading options. And find lots of memorable but little-known annotated games.

It shows how Tal achieved greatness through hard work, application and the influence of a world-class coach, and through this book modern readers can catch a glimpse of the development of a true chess genius. This is the groundbreaking cult classic by the Legendary Grandmaster Bent Larsen and the noted openings theoretician Steffen Zeuthen. Zoom 001 stands for Zero Hour for Operative Opening models. The principal idea behind Zoom 001 is the creation of "pattern knowledge" of typical middle game/endgame structures-one of a grandmaster's essential qualities-cultivated through the use of the Grunfeld and Catalan openings. Using twenty modern Grandmasters' games, the authors show how these structures typically arise. Included are games by Andersson, Botvinnik, Fischer, Korchnoi, and of course Larsen. By using complete games instead of variations that might be outdated by the next tournament, Larsen and Zeuthen demonstrate that pattern recognition is a timeless skill. By recognizing these typical patterns, you will not only gain a feel for the position, but will be able to effectively form a game plan that will allow you to carry you to won positions.

The Sicilian Accelerated Dragon (1 e4 c5 2 Nf3 Nc6 3 d4 cxd4 4 Nxd4 g6) is one of the most exciting and enduring openings known to the modern chessplayer. After decades of use, the razor-sharp move has recently had a strong revival, and this book brings together previously inaccessible new material on the opening. The authors examine all significant developments within all of the lines that encompass the Accelerated Dragon, including the intriguing Hyper-Accelerated Dragon and the obscure Semi-Accelerated Dragon. Numerous new ideas and improvement of existing theory (as well as many places of original analysis) make this essential for both Black and White players wishing to arm themselves in competitive play.

White players will thoroughly dislike the Neo-Møller! The Ruy Lopez is one of the most important chess openings, hugely popular with amateurs and masters alike. Black players allowing the Ruy Lopez main lines are usually condemned to passivity, defending a slightly worse (though solid) position for as long as White chooses this situation to continue. World Champion Magnus Carlsen doesn't like passivity. He likes unconventional and active systems that allow him to take command and put pressure on his opponent from early on. That's why Magnus Carlsen revolutionized the old Møller Attack, one of the sharpest and most uncompromising variations against the Ruy Lopez. As yet largely disregarded and unexplored by the majority of players, Carlsen's new approach allows Black to break free early and start giving White a hard time. FIDE Master Ioannis Simeonidis is the first to investigate this system, cover it in detail, and make it easy to grasp for club players. He has called it the Neo-Møller. Simeonidis has made lots of exciting discoveries, presents many new ideas and shows that it is a reliable and playable system. Since the Neo-Møller is a very early deviation from the main lines, it's easy for Black to actually get it on the board and take opponents out of their comfort zone. Simeonidis has created a compact, accessible and inspirational book. One thing looks certain: White players of the Ruy Lopez are going to thoroughly dislike the Neo-Møller!

'If you want to improve at chess, you must know the characteristics of typical pawn formations. Understanding the pawn structure is a key tool when you are evaluating a position on the board. One simple pawn move can ruin your position or win the game. Post-beginners should know the basic essentials of chess structures and that is what this modern training manual focuses on. Experienced chess teacher Jörg Hickl helps you to: - Assess the strengths and weaknesses of pawn structures - Recognize strategic patterns - Identify how you can improve your position - Develop a plan of action The Power of Pawns provides common sense guidance and Jörg Hickl uses practical examples to explain typical structures, strategies and plans. His tips and exercises are both highly enjoyable and to the point.

In this book, FIDE Master Carsten Hansen invites you to join him in studying the Sicilian Dragon and its many variations. Bent Larsen (1935-2010) was one of the greatest fighters chess has ever seen. In his rich career the great Dane defeated all World Champions from Botvinnik to Karpov. He was a Candidate for the World Championship four times and became one of the most successful tournament players of his time. His uncompromising style and his unorthodox thinking made him popular with chess players all around the globe. In 1967/1968 Larsen won five international elite events in a row, a truly spectacular achievement. His successes were such that Bobby Fischer let him play first board in the legendary match Soviet Union vs. the World in 1970 in Belgrade. Bent Larsen also was a highly original chess writer and an extremely productive chess journalist. Not surprisingly the first chess book that Magnus Carlsen ever studied was written by the strongest Scandinavian player before him. This collection brings together more than 120 of Bent Larsen's best games, annotated by himself. His comments are lucid, to the point, instructive and humorous. Together, these games are a tribute to his genius and a continuous joy to read and play through.

In chess, a transposition is a known position reached by a different move order than usual – a less obvious way of getting to somewhere you want to go, leading to confusion for your opponent. Every chess player has a number of them in his arsenal, and they are used most often in openings. There are transpositional tricks in all openings, but this is the first book devoted to them. As the book covers all the key openings variations it can be used by most chess players. The introduction explains what transpositions are and why they're invaluable, followed by 8 chapters discussing transpositions, illustrated by some notorious examples from top-flight matches. Chapters are divided by opening group – Double e-pawn openings; Sicilian Defense; Other Semi-Open openings; Double e-pawn openings; Indian openings; Other 1 d4 openings; Reti, English, 1 g3. The benefits and drawbacks of each set of move orders are discussed throughout. This is an ideal book for all club players and is written by one of the best chess writers in the world today.
