A slow-boil, modern noir, *Of Sound Mind* finds audiometry technician Richard Keene settling into his new, center-city apartment just as he reaches his thirtieth birthday. Formerly confined to a mental institution, Richard struggles to adapt to a world of adult freedom. He possesses abnormally acute powers of hearing and suffers from claustrophobia, yet he feels unleashed to dare fate in high places — in short, he is a bundle of neuroses. When he believes he hears a strangulation murder committed behind the closed door of a neighboring apartment in his high-rise, Richard confronts a chance for redemption that he knew would come someday. For the incident eerily parallels the defining experience of his childhood, the night he heard — through the walls of his row house — the death struggle of the little girl next door. But just how reliable are Richard's perceptions?

Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. *Who Owns the World's Media?* moves beyond the rhetoric of free media and free markets to provide a

Bookmark File PDF Fios Tv Guide Hd

dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.

The First to Present 3D Technology as Applied to Commercial Programming for the Consumer This is the first book to provide an overview of the technologies, standards, and infrastructure required to support the rollout of commercial real-time 3 Dimension Television/3 Dimension Video (3DTV/3DV) services. It reviews the required standards and technologies that have emerged—or are just emerging—in support of such new

services, with a focus on encoding mechanisms formats and the buildout of the transport infrastructure. While there is a lot of academic interest in various intrinsic aspects of 3DTV, service providers and consumers ultimately tend to take a system-level view. 3DTV stakeholders need to consider the overall architectural system-level view of what it will take to deploy an infrastructure that is able to reliably and cost-effectively deliver a commercial-grade quality bundle of multiple 3DTV content channels to paying customers with high expectations. This text, therefore, takes such a system-level view, revealing how to actually deploy the technology. Presented in a self-contained, tutorial fashion, the book begins with a review of 3DTV in the marketplace and the opportunities and challenges therein. Recent industry events related to 3D are also discussed. From there, the fundamental visual concepts supporting stereographic perception of 3DTV/3DV are explained, as are encoding approaches. Readers will understand frame mastering and compression for conventional stereo video (CSV) and more advanced methods such as video plus depth (V+D), multi-view video plus depth (MV+D), and layered depth video (LDV). Next, the elements of an end-to-end 3DTV system are covered from a satellite delivery perspective, with explanations of digital video broadcasting (DVB) and DVB-handheld. Transmission technologies are assessed for terrestrial and IPTV-based architecture; IPv6 is reviewed in detail. Finally, the book presents 3DTV/3DV standardization and related activities, which are critical to any type of broad deployment. System planners, the broadcast TV industry, satellite operators,

Bookmark File PDF Fios Tv Guide Hd

Internet service providers, terrestrial telecommunication carriers, content developers, design engineers, venture capitalists, and students and professors are among those stakeholders in these services, and who will rely on this volume to discover the latest 3D advances, market opportunities, and competing technologies.

A first edition, *Insiders' Guide to Hampton Roads* is the essential source for in-depth travel and relocation information to this storied Virginia metropolitan area. Written by a local (and true insider), this guide offers a personal and practical perspective of Hampton Roads and its surrounding environs.

Knowing the "going" royalty rate for virtually any product is as simple as reaching for the newly published *Licensing Royalty Rates, 2013 Edition*. This information-packed report details the royalty rates for over 1,500 products and services in ten lucrative licensed product categories--art, celebrity, character and entertainment, collegiate, corporate, designer, event, sports, nonprofit and music. Setting a royalty rate too high can scare away potential licensees, while accepting a lower rate can cost licensors hundreds of thousands of dollars. *Licensing Royalty Rates, 2013 Edition* provides all the information you need to calculate the right rate every time. The data in *Licensing Royalty Rates* is compiled using information from the U.S. Patent and Trademark Office. After careful review by a blue-ribbon panel of expert licensing consultants uniquely qualified to know what the appropriate rate range is for specific properties in each licensing category, the information is organized into four time-saving sections that give

Bookmark File PDF Fios Tv Guide Hd

researchers fast access to comprehensive statistical and analytical data:Royalty rate listing alphabetically by licensed product --provides a detailed alphabetical listing of products and their suggested rate range across all product categories.Royalty rate listing by international trademark class --lets you quickly identify subtle royalty rate differences between similar products within specific international trademark classes.Checklist of licensed products and services --offers a quick-reference to products with a high potential for licensing.Comprehensive list of licensed products and services --presents a detailed list of all surveyed products and services within a trademark class for preparing intent-to-use trademark applications.This detailed information gives both beginning and more experienced licensing professionals the confidence needed to negotiate the maximum allowable rate regardless of the product, the market and the parameters of the specific deal itself.

right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!

A consumer guide integrates shopping suggestions and handy user tips as it describes and rates dozens of digital electronic products, including cell phones, digital cameras, televisions, computers, and home theater products.

This book is a refreshingly practical yet theoretically sound roadmap to leveraging data analytics and data science. The vast amount of data generated about us and our world is useless without plans and strategies that are designed to cope with its size and complexity, and which enable organizations to leverage the information to create value in marketing. *Creating Value with Data Analytics in Marketing* provides a nuanced view

of big data developments and data science, arguing that big data is not a revolution but an evolution of the increasing availability of data that has been observed in recent times. Building on the authors' extensive academic and practical knowledge, this book aims to provide managers and analysts with strategic directions and practical analytical solutions on how to create value from existing and new big data. The second edition of this bestselling text has been fully updated in line with developments in the field and includes a selection of new, international cases and examples, exercises, techniques and methodologies. Tying data and analytics to specific goals and processes for implementation makes this essential reading for advanced undergraduate and postgraduate students and specialists of data analytics, marketing research, marketing management and customer relationship management. Online resources include chapter-by-chapter lecture slides and data sets and corresponding R code for selected chapters.

Antikythera mechanism: It's an astrological tool. Specially written for this book, a revolutionary new theory of astrology, based on planetary resonance in a defined clock-work mechanism. Discover the Earth's secret third zodiac. Interspersed, slice-of-life, stream-of-consciousness essays. What it's like to live in America in the first years of the 21st century. The author was introduced to astrology in the early 1980's and has studied intensely since the mid-1990's. He previously published AstroAmerica's Daily Ephemeris. This is his first book of essays.

Vols. for 1981- include four special directory issues.

This book examines corporate entrepreneurship start-ups in the media industries and provides a timely solution to fill in the gap of academic as well as practical knowledge in this regard. It brings together new media venturing practices in the west and east and covers new media opportunities in various emerging forms, including gaming, Internet, mobile and webcasting business. The book presents case studies from major transnational media companies, highlights the industry specific characteristics of corporate entrepreneurship, and thus contributes to understanding the links between new business venturing and certain particular industries, so as to further explore the industry specific characteristics of entrepreneurship. This book also suggests a new approach to integrate economic and management theories for the study of media corporate entrepreneurship; while the two sets of theories are conflicting with each other, the book proposes a contingent model to reconcile different theories. This is an innovative approach and will be a valuable starting point to construct an interdisciplinary theoretical framework for new media business studies.

learn to throw out self-defeating behaviors that keep you stuck in your depression, and grab hold of new ones that send you chasing new-found passions. You put into words what it is that you truly want from life and realize that little is impossible. Finally, you set about the business of making for yourself the life you've always wanted to live. Cathy Goldstein Mullin is a therapist on the North Shore of Boston. She has a private practice where she sees children, adolescents, and adults, many of whom struggle with depression. She is also a staff therapist at a large teaching hospital. For the last several years, she has led workshops and given talks on her areas of expertise. *If I Could Just Snap Out of It, Don't You Think I Would? A Nine-Month Plan for Smashing Your Depression* is her first book. She is presently at work on another book, tentatively titled *The Wicked Sisters Who Live in the Pit: Taming the Beasts of Your Anxiety*. In 2009 she launched a website offering information and treatment for anxiety and depressive disorders.

After fifty years of market prominence and incredible demand from loyal users, Head's *Broadcasting in America's* tenth edition returns as the celebrated market leader in its field with its renowned treatment of electronic media as a social force and with a distinguished new author team from Sydney Head's legacy school, the University of Miami. Head's *Broadcasting in America* distinguishes itself by presenting electronic media both as products of contemporary social forces and as social forces in their own right. This text will introduce you to the exciting changes taking place in electronic media. It will help you examine the emerging information infrastructure and the accelerating convergence of various electronic media forms. It will also help you explore the role electronic media plays in many academic areas, ranging from economics to law, from history to social science. You will find this industry more

The Media Handbook provides a practical introduction to the advertising media planning and buying process. Emphasizing basic calculations along with the practical realities of offering alternatives and evaluating the plan, this fifth edition reflects the critical changes in how media is planned, bought, and sold by today’s industry professionals. Author Helen Katz looks at the larger marketing, advertising, and media objectives, and follows with an exploration of major media categories, including digital media. She provides a comprehensive analysis of planning and buying, with a continued focus on how those tactical elements tie back to the strategic aims of the brand and client. Also available is a Companion Website that expands The Media Handbook’s content in an online forum. Here, students and instructors can find tools to enhance course studies such as chapter overviews, PowerPoint slides, and sample questions. With its emphasis on real-world industry practice, The Media Handbook provides an essential introduction to students in advertising, media planning, communication, and marketing. It serves as an indispensable reference for anyone pursuing a career in media planning, buying,

and research.

The Internet didn't kill TV! It has become its best friend. Americans are watching more television than ever before, and we're engaging online at the same time we're tuning in. Social media has created a new and powerful "backchannel", fueling the renaissance of live broadcasts. Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And "connected TVs" blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing (and complex) television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the "second screen" to drive synched and deeper brand engagement Using social ratings analytics tools to find and target lean-forward audiences Aligning brand messaging to content as it travels time-shifted across devices Determining the best strategy to approach marketing via connected TVs Employing addressable TV advertising to maximize content relevancy Testing and learning from the most cutting-edge emerging TV innovations The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand.

The rapid advancement of digital multimedia technologies has not only revolutionized the production and distribution of audiovisual content, but also created the need to efficiently analyze TV programs to enable applications for content managers and consumers. Leaving no stone unturned, *TV Content Analysis: Techniques and Applications* provides a detailed exploration of TV

program analysis techniques. Leading researchers and academics from around the world supply scientifically sound treatment of recent developments across the related subject areas—including systems, architectures, algorithms, applications, research results, emerging approaches, and open issues. The book is organized into six parts: Content Extraction - deals with automatic analysis and annotation of TV content, addressing generic semantics and concepts as well as TV content Content Structuring - examines techniques for identifying interesting parts of TV programs and supplying direct access to it Content Recommendation - explores the problem of providing users with the most relevant content, addressing the problem of an ever-increasing amount of available content Content Quality - considers visual perception and quality approaches in the multi-display TV context and the specific mobile TV scenario Web and Social TV - presents studies on Web and TV convergence and on how user-generated content in Web 2.0 applications can be used to enhance services Content Production - covers postproduction, visual effects, and presentation standards Most parts start with a chapter that provides an overview of that area, followed by state-of-the-art approaches focusing on specific issues covered in that section. Reporting on recent advances in the field, the book provides you with the global view and up-to-date understanding of emerging trends needed to participate in the development
