If your personal financial knowledge is limited, you're probably not at fault. Personal Finance 101 isn't offered in our schools - not in high school and not even in the best colleges and graduate programs. It should be. (Of course, if it were, I wouldn't be able to write fun and useful books such as this - or maybe they'd use this book in the course!) People keep making the same common financial mistakes over and over - procrastinating and lack of planning, wasteful spending, falling prey to financial salespeople and pitches, failing to do sufficient research before making important financial decisions, and so on. This book can keep you from falling into the same traps and get you going on the best paths. As unfair as it may seem, numerous pitfalls await you when you seek help for your financial problems. The world is filled with biased and bad financial advice. As a practicing financial counselor and now as a writer, I constantly see and hear about the consequences of poor advice. Of course, every profession has bad apples, but too many of the people calling themselves "financial planners" have conflicts of interest and an inadequate competence level. All too often, financial advice ignores the big picture and focuses narrowly on investing. Because money is not an end in itself but a part of your whole life, this book helps connect your financial goals and challenges to the rest of your life. You need a broad understanding of personal finance to include all areas of your financial life: spending, taxes, saving and investing, insurance, and planning for major goals like education, buying a home, and retirement.....You want to know the best places to go for your circumstances, so this book contains specific, tried-and-proven recommendations. I also suggest where to turn next if you need more information and help.

Anthony has two dollars and three quarters and one dime and seven nickels and eighteen pennies. Nicholas has one dollar and two quarters and five dimes and five nickels and thirteen pennies. Alexander has...bus tokens. And even when

he's rich, pretty soon all he has is bus tokens. He was rich. Last Sunday. Grandma Betty and Grandpa Louie came and gave Anthony and Nicholas and Alexander each a dollar. Alexander was saving his. Maybe for a walkie-talkie. And then there was bubble gum, some bets with Anthony and Nicholas (that Alexander lost), a snake rental, a garage sale, and all kinds of other things to spend money on. And now all he has is bus tokens. When he used to be rich last Sunday.

ESSENTIALS OF PERSONAL FINANCIAL PLANNING Essentials of Personal Financial Planning was written to challenge the status quo by promoting personal financial planning (PFP) as a profession, not as a sales tool to gather assets under management or facilitate sales of insurance products. The book takes a comprehensive and integrated approach to PFP for accounting students, allowing them to view the profession through the lens of a CPA – with integrity and objectivity. This book systematically introduces the essentials of all the major PFP topics (estate, retirement, investments, insurance, and tax), as well as: The PFP process, concepts and regulatory environment. Professional responsibilities of a CPA personal financial planner and the requirements of the Statement on Standards in PFP Services. Time value of money concepts. The book then builds on these foundational concepts, showing their interconnectivity and professional opportunities, to provide a deeper understanding of PFP and its application. After reading this book, students will be able to apply the knowledge and skills gained from this course to have an immediate and long-term positive impact for themselves and for the clients they serve.

The objective of this book is to prompt a re-examination of financial literacy, its social foundations, and its relationship to citizenship education. The collection includes topics that concern indigenous people's perspectives, critical race theory, and transdisciplinary perspectives, which invite a dialogue about the ideologies that drive traditional and critical perspectives. This volume offers readers opportunities to learn about different views of financial literacy from a variety of sociological, historical and cultural perspectives. The reader may perceive financial literacy as representing a multifaceted concept best interpreted through a non-segregated lens. The volume includes chapters that describe groundings for revising standards, provide innovative teaching concepts, and offer unique sociological and historical perspectives. This book contains 13 chapters, with each one speaking to a distinctive topic that, taken as a whole, offers a well-rounded vision of financial literacy to benefit social education, its research, and teaching. Each chapter provides a response from an alternative view, and the reader can also access an eResource featuring the authors' rejoinders. It therefore offers contrasting visions about the nature and purpose of financial education. These dissimilar perspectives offer an opportunity for examining different social ideologies that may guide approaches to financial literacy and citizenship, along with the philosophies and principles that shape them. The principles that teach and inform about financial literacy defines the premises for base personal and community responsibility. The work invites researchers and practitioners to reconsider financial literacy/financial education and its social foundations. The book will appeal to a range of students, academics and researchers across a number of disciplines, including economics, personal finance/personal economics, business ethics, citizenship, moral education, consumer education, and spiritual education.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial

Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

This book presents selected papers on the factors that serve to influence an individual's capacity in financial decision-making. Initial chapters provide an overview of the cognitive factors affecting financial decisions and suggest a link between limited cognitive capacity and the need for financial education. The book then expands on these cognitive limitations to explore the tendency for overconfidence in decision-making and the interplay between rational and irrational factors. Later contributions show how credit card companies benefit from limitations in consumer financial literacy, how gender and cognition intersect to play an important role in financial decision-making, and how to improve financial capacity through financial literacy and education campaigns, including those addressing developed marketplaces. This comprehensive collection of papers will be of value to all readers who seek to better understand the multi-factorial and complex nature of personal financial management in today's economic climate.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

"Do I really need a budget? How can I get out of debt? Should I give my kids an allowance? Should Christians lend money and charge interest?" These questions and many others were often asked of respected Christian financial counselor Larry Burkett. To answer them in a direct and brief way and help you discover the way to financial wisdom, Larry wrote Personal Finances. To build a sturdy house, a builder needs a blueprint. To find his way, a traveler needs a map. And to manage your finances correctly, you need a budget. Without a plan, the house will collapse, the traveler will get lost, and your finances will eventually fail. Get on board with the basics of wise financial planning. From the youngest member of your family to the oldest, budgeting should accompany income. Learn how to create a budget and what it takes to stick with it in Personal Finances.
