Winner of The Times British Sports Book Award 2014. A fascinating insight into the enclosed world of football scouts in the UK A teenaged boy plays football in a suburban park. His name is Raheem Sterling. The call is made: "Get down here quick. This is something special". Another boy is 8, going on 28. His name is Jack Wilshere. The referee, an Arsenal scout, spirits him away from Luton Town. A young goalkeeper struggles on loan at Cheltenham Town in League Two. His name is Jack Butland. Within months he will be playing for England. Welcome to football's hidden tribe. Scouts are everywhere yet nowhere, faceless and nameless, despite making the informed decisions worth millions. Award-winning sportswriter Michael Calvin opens up their hidden world, examining their disconnected lifestyles, petty betrayals and unconsidered professionalism of men who spend long, lonely hours on the road.

The scouting and game-preparation processes are conceivably the least exposed and least understood phases of the aggregate football program as it pertains to the general knowledge of the public and the average football aficionado. Supposition and conjecture suggest and imply few individuals, including the most dedicated of football fans, are aware of the time commitment, involvement, depth, and detail comprising the processes of film study, tendency analysis, statistical comparisons, producing the scouting report, computer-software applications, complex digital and video mechanisms, and personnel evaluation. Suffice to say - scouting and game-preparation methods are central to the success of today's football program through the leveraging of innovative technologies, computer software, data analysis, and database management. The ability to appropriately evaluate personnel, assess play-calling tendencies, coordinate large databases of statistics, and analyze various football schemes are all central tenets of the scouting process.

"This thesis describes a two level expert planning system that first helps to develop a game plan for a high school football game and then aids in the selection of plays during that game. Built using Rulemaster, an expert system development tool, the system, called COACH, is initially provided observed data through the answering of questions which represents the receiving of a scouting report. This information is stored in a data file for further use. Also created during this questioning period is a data file containing comparisons of key players on the offense against their counterparts on the opponent's defensive team. Using a rule base established from interviews with an expert football coach, COACH creates a constraint file, the game plan, which is used during the play selection portion of the programming. During this phase, COACH is provided the current game situation and subsequently selects one or more plays from the game plan deemed most likely to be successful ."-Abstract.

Super Bowl victories with his unique system of relentless preparation and resilience. He teaches his players that you can never guarantee a win, but you can always earn the right to win-with focus, hard work, and anticipation of obstacles. Now Coughlin shows how his teachings apply beyond the gridiron, illustrating his points with previously untold stories about players like Eli Manning, Doug Flutie, and Michael Strahan. His wisdom can help leaders in any field rev up their own organizations. 'Tom Coughlin challenged us and prepared us to handle anything that was thrown at us ... The lessons I learned from him weren't limited to football. They were applicable to every aspect of my life' -Michael Strahan Tom Coughlin is one of the most successful coaches in NFL history. Before winning two Super Bowls with the New York Giants, he coached the Jacksonville Jaguars for nine seasons, leading them to two appearances in the AFC Championship Game. David Fisher is the co-author of seventeen New York Times bestsellers.

Often considered the first-ever book about the art of scouting in football, George Allen's 1953 *How to Scout Football* explores the importance of careful observation and analysis of rival teams in order to reach victory on the field. In a time before film reviews were commonplace, football teams relied on expert scouts to travel the country and watch games in-person. The scout would then report back with their insight about plays, characteristics of offensive and defensive players, and the team's strengths and weaknesses. Scouting - or "pigskin espionage," as Allen calls it - is useful for all levels of the sport, from high school to college to professional. Allen himself got his shot with the Chicago Bears as a scout, so he was well versed in both its application and importance. George Allen's (b. 1922 - d. 1990) coaching career began at the college level as head coach of both Morningside College in Iowa and Whittier College in California. He then spent a year on the staff of the Los Angeles Rams, followed by a longer stint with the Chicago Bears. With the Bears, Allen was initially asked to scout the Rams for a single season. His reporting was so thorough that his contract position became permanent. Eventually, he would become the defensive coordinator for the Bears. In 1966, Allen returned to the Rams as head coach where he brought the team back from a long losing streak. After five winning seasons with the Rams, he joined the Washington Redskins as head coach where he remained from 1971 to 1977. During his NFL tenure, Allen led his teams to the NFL playoffs seven times. Notably, Allen's Redskins reached Super Bowl VII in the 1972 season before losing to the Miami Dolphins. The Dolphins' win gave the team the only perfect season in NFL history - a record

they still hold. George Allen is generally considered one of the hardest working coaches in the sport. He was known for preferring veteran players over younger players, focusing on the success of the current team and controversially trading away young draft picks for older, more experienced players. "The future is now," he famously said. Throughout his successful career, Allen wrote several books about the sport, including 1953's *How to Scout Football*. While scouting methods have changed since the 1950s, the book offers an interesting look back at the techniques of the mid-century. The work goes into minute detail, from the appropriate number of scouts for each game, to where they should sit in the stands for the best view, to what steps a scout should take before, during, and after each game. In the chapter titled "Techniques of Scouting," Allen provides his own preferred methods that he employed during his time at Whittier College. This includes using a rubber hand stamp to create a quick template to fill in after each play. No notes were to be taken during play; all writing was reserved for the moments during time outs and between plays. Plenty of sample charts, graphs, and diagrams are included to demonstrate the techniques. Today's scouting takes place behind closed doors. Coaches and coordinators have the opportunity to stop and replay a game as many times as necessary to reach a full understanding of the opposing team's strategy. Allen's scouting recommendations show us how difficult it was to watch all 11 members of the team at once before the days of home video. "Winning is the science of being prepared," Allen once said. The attention to detail that he displayed as a coach and in his books is what led him to become one of the most successful football coaches of his day. To highlight his lifetime of achievements, George Allen was inducted into the Football Hall of Fame in 2002. Split-field coverages are nothing new. Many coaches around the country run them at all levels of play, but there are not many resources on how to teach them. In Cody Alexander's third book, he breaks down how to teach the many varieties of Quarters coverage. From simple match-Quarters to defending Empty and Quads formations, Coach Alexander breaks it down and simplifies the concepts for any coach. Xs and Os are great, but the players must still execute and the coach must know when to use each scheme. *Match Quarters: A Modern Guidebook to Split-Field Coverages*, allows anyone interested in football to have a deeper understanding of the game itself and why each coverage is used. Along with the basics, Coach Alexander gives you multiple tags and variations within each family (Cover 4 and Cover 2). Come learn the Art of X.

offense scouting process will get you the information you need to know about your opponent's offensive tendencies. It is not designed to predict what your opponent will do on down and distances. It is designed for you and your players to recognize formation and running back set keys so you can know what play your opponent can or will run from that formation or running back set. That is the key to playing effective defense regardless of the talent you have. Coach Renner provides you with his naming and labeling terminology for 27 tight end formations, 12 no tight end formations and 10 running back sets. It is a complete list that you need to name and be prepared to play against. He gives you a diagram for each step in his scouting process so you know exactly what that step should look like. When you're finished you will have an idea of what a simple comprehensive offensive scouting report will look like. If you want to insure your players are prepared for your opponent's offense Coach Renner's simple but comprehensive plan will help you.

When coach Nick Saban arrived in Tuscaloosa in 2007, he boldly proclaimed "We want to be a champion in everything that we do." Since that time, Alabama has won three national championships and become the nation's number one destination for recruits and the top source of NFL talent while simultaneously graduating its players. No other program has won more games, captured more awards, or come close to approaching the kind of consistent success as the Crimson Tide. In Nick Saban vs. College Football, author Christopher Walsh not only explains what separates Saban from his peers and compares his accomplishments to some of the all-time legends, but tells why, if there were a Mount Rushmore of college football coaches, Saban's face would already be on it. From his upbringing in West Virginia to his relationship with legendary coach Bill Belichick, "the process" has not only led to Saban having a statue along Alabama's "Walk of Champions" in front of Bryant-Denny Stadium, but the establishment of a new standard that may be unparalleled in college football history. Scouting a football defense is vital to the preparation and coaching of offensive football players for a game. Coach Bill Renner outlines a simple and efficient 10-step process to follow when scouting a football defense. The information gathered will provide the coaches and players with a confidence they need to have to play their opponent. Coach Renner has prepared high school offensive game plans for 30 years. He finished his football coaching career with a span of 13 straight years, 142 games, without the offense he was coaching being shutout. Following this simple 10-step process will help a coach in obtaining the knowledge to call offensive plays and know how and why the defense is aligned versus their formation. Play calling becomes more efficient and easier because you are calling plays to attack a players technique in a defensive alignment you are certain of. If you want to be certain that you are scouting your opponents defense the right way, getting the right information to help your offense, this book, How to Scout the Defense of Your High School Football Opponent, will give you that plan.

football playing experience ended in high school if not earlier; and coaches who have served as an assistant football coach at a higher level like college or high school, but are unfamiliar with the idiosyncrasies of coaching little kids.

The first question anyone should have for me is, Why would anyone be interested in an autobiography about my life as a coach? That would be a fair question, since I havent won any national championships nor have I been in demand for speaking engagements. If you compare my coaching record to others, my won-lost record doesnt stand out. With that said, let me explain what I have to offer, and then you decide. This book is not just about my life as a coach, but rather, the lessons I have learned through my coaching career. Being old-school is about coaching kids and young adults, not a particular sport, gender, age, or level of play. I have coached on every level of play that exists and coached both genders on those levels, along with almost every sport that a school offers.
