bodily self-experience, normality and deviance, self-alienation, and objectification. Situated at the intersection of phenomenology of medicine and feminist phenomenology, this volume provides insights into medical practices such as surgical operations, organ transplants, dentistry, midwifery, and psychiatry. The contributors make clear the relevance of feminist phenomenology to the fields of medicine and health by highlighting difference, vulnerability, and volatility as central dimensions of human experience rather than deviations. It also further vitalizes the field of phenomenology by bringing it into conversation with a range of different materials—including case studies, fiction, and other forms of narrative—and shedding new light on issues like bodily self-experience, normality and deviance, self-alienation, and objectification. The volume's focus on concrete experience develops and sharpens the methodological tools and conceptual framework of phenomenology and makes it an excellent resource for scholars, students, and medical practitioners alike.

The past few years have shown a growing interest in cooking and food, as a result of international food issues such as BSE, world trade and mass foreign travel, and at the same time there has been growing interest in Japanese Studies since the 1970s. This volume brings together the two interests of Japan and food, examining both from a number of perspectives. The book reflects on the social and cultural side of Japanese food, and at the same time reflects also on the ways in which Japanese culture has been affected by food, a basic human institution. Providing the reader with the historical and social bases to understand how Japanese cuisine has been and is being shaped, this book assumes minimal familiarity with Japanese society, but instead explores the country through the topic of its cuisine.

Modern financial theories enable us to look at old problems in early American Republic historiography from new perspectives. Concepts such as information asymmetry, portfolio choice, and principal-agent dilemmas open up new scholarly vistas. Transcending the ongoing debates over the prevalence of either community or capitalism in early America, Wright offers fresh and compelling arguments that illuminate motivations for individual and collective actions, and brings agency back into the historical equation. Wright argues that the Colonial rebellion was in part sparked by destabilizing British monetary policy that threatened many with financial insolvency; that in areas without modern financial institutions and practices, dueling was a rational means of protecting one's creditworthiness; that the principle-agent problem led to the institutionalization of the U.S. Constitution's system of checks and balances; and that a lack of information and education induced women to shift from active business owners to passive investors. Economists, historians, and political

No one can change that." --His Holiness the Dalai Lama In October 2012, the Dalai Lama visited the Kurukulla Center for Buddhist Studies in Medford, Massachusetts and addressed approximately 1,800 residents from this diverse New England community. White and Black, free & slave, Southern & Northern - and you'll fall in love with every character. How many books will be in the Bregdan Chronicles? No one knows yet... Ginny intends to write these character's stories, one year at a time, for as long as she is able to write. She is passionate about bringing history to life through historical fiction. Since she is amazingly healthy, that could be for a very long time! She doesn't like stories to end any more than you do. This one won't end for a very long time! Review: I enjoyed this book as much as the first in this historical fiction series. Ginny, you are a wonderful writer. I get so engrossed in your Chronicles that I cannot put my Kindle down. I have gotten so connected with the characters and the history is superb. I have already purchased the next and really shouldn't start on it now if I plan to sleep tonight! Thanks! Review: Ginny Dye delivers again!!!! What a fabulous book!!! This book carried more suspense than the first book, as it should!! The author is taking on the Civil War in a way I have never read before. The author is covering every aspect of the Civil War. South perspective, slave perspective, North perspective, abolitionist perspective, and some I would never have dreamed of. These books are thought provoking and uplifting. The author reels you in and you feel everything! You can just see the smoke of gunpowder hanging over the battles, you could feel Ike Adams' hatred. I could say so much more, but "Spring Will Come" (book #3) has finished downloading. I must continue with this absolutely phenomenal series! Review: This is the second book in the Bregdan Chronicles and in my opinion, the series just keeps

getting better! I'm not usually a fan of a series, but I'm hooked on this one. The individuals from the first book just keep getting more stimulating. Their storyline, as well as their characters, keep evolving. Add to that, the introduction of new individuals and scenarios and you have the recipe for a book that you can't put down. Again, this book comes with a high recommendation from me. All ages will enjoy. It could be read separately from the first because the background is expanded on sufficiently enough that you could pick up the plot, but I do recommend starting with the Storm Clouds Rolling In for maximum enjoyment. Just a warning though, I stayed up till 1 a.m. because I just had to find out how this one ended!!

Although the era of European colonialism has long passed, misgivings about the inequality of the encounters between European and non-European languages persist in many parts of the postcolonial world. This unfinished state of affairs, this lingering historical experience of being caught among unequal languages, is the subject of Rey Chow's book. A diverse group of personae, never before assembled in a similar manner, make their appearances in the various chapters: the young mulatto happening upon a photograph about skin color in a popular magazine; the man from Martinique hearing himself named "Negro" in public in France; call center agents in India trained to Americanize their accents while speaking with customers; the Algerian Jewish philosopher reflecting on his relation to the French language; African intellectuals debating the pros and cons of using English for purposes of creative writing; the translator acting by turns as a traitor and as a mourner in the course of cross-cultural exchange; Cantonese-speaking writers of Chinese contemplating the politics of food consumption; radio drama workers straddling the forms of traditional storytelling and mediatized sound broadcast. In these riveting scenes of speaking and writing imbricated with race, pigmentation, and class demarcations, Chow suggests, postcolonial languaging becomes, de facto, an order of biopolitics. The native speaker, the fulcrum figure often accorded a transcendent status, is realigned here as the repository of illusory linguistic origins and unities. By inserting British and post-British Hong Kong (the city where she grew up) into the languaging controversies that tend to

be pursued in Francophone (and occasionally Anglophone) deliberations, and by sketching the fraught situations faced by those coping with the specifics of using Chinese while negotiating with English, Chow not only redefines the geopolitical boundaries of postcolonial inquiry but also demonstrates how such inquiry must articulate historical experience to the habits, practices, affects, and imaginaries based in sounds and scripts. or even a year at a time. *A Road Back from Schizophrenia* gives extraordinary insight into the logic (and life) of a schizophrenic. Lauveng illuminates her loss of identity, her sense of being controlled from the outside, and her relationship to the voices she heard and her sometimes terrifying hallucinations. Painful recollections of moments of humiliation inflicted by thoughtless medical professionals are juxtaposed with Lauveng's own understanding of how such patients are outwardly irrational and often violent. She paints a surreal world—sometimes full of terror and sometimes of beauty—in which “the Captain” rules her by the rod and the school's corridors are filled with wolves. When she was diagnosed with the mental illness, it was emphasized that this was a congenital disease, and that she would have to live with it for the rest of her life. Today, however, she calls herself a “former schizophrenic,” has stopped taking medication for the illness, and currently works as a clinical psychologist. Lauveng, though sometimes critical of mental health care, ultimately attributes her slow journey back to health to the dedicated medical staff who took the time to talk to her and who saw her as a person simply diagnosed with an illness—not the illness incarnate. A powerful memoir for sufferers, their families, and the professionals who care for them.

explains the Ptolemaic view of planetary motion and its displacement by the studies of Copernicus, Kepler, and Newton. Succeeding chapters examine the making of celestial observations and measurements and explain such central concepts as the ecliptic, the orbital plane, the two- and three-body problems, and perturbed motion. Ryabov also describes how perturbations in the path of Uranus led to the discovery of Neptune, and he devotes considerable attention to satellites, including a detailed treatment of the first artificial satellite, Sputnik I.

Additional topics include planetary rotation, the calculation of units of time, and the motions of the stars, with illustrations of how the law of gravity determines the shapes of galaxies. The book concludes with a deeper consideration of gravity, pointing out basic distinctions between classical and Einsteinian theories.

Presenting a practical, problem-based approach to colour physics, this title describes the key issues encountered in modern colour engineering, including efficient representation of colour information, fourier analysis of reflectance spectra and advanced colorimetric computation. Emphasis is placed on the practical applications rather than the techniques themselves, with material structured around key topics, such as colour calibration of visual displays, computer recipe prediction and models for colour-appearance prediction. Each topic is carefully introduced at three levels to enhance student understanding. Firstly, theoretical ideas and background information are discussed, explanations of mathematical solutions then follow and finally practical solutions are presented using MATLAB. Includes a compendium of equations and numerical data required by the modern colour and imaging scientist. Numerous examples of solutions and algorithms for a wide-range of computational problems in colour science. Provides example scripts using the MATLAB programming language. This text is a must-have for students taking courses in colour science, colour chemistry and colour physics as well as technicians and researchers working in the area.

Uncompahgre Country is available individually or as part of a boxed trilogy which includes The Utes: A Forgotten People (the original inhabitants of Western Colorado) and Sunset Slope (twenty-two-true tales of early Western Colorado).
