INTRODUCTION Representing Congress presents a selection of political cartoons by Clifford K. Berryman to engage students in a discussion of what Congress is, how it works, and what it does. It features the masterful work of one of America's preeminent political cartoonists and showcases his ability to use portraits, representative symbols and figures, and iconic personifications to convey thought-provoking insights into the institutions and issues of civic life. The House of Representatives and Senate take center stage as national elected officials work to realize the ideals of the Founders. This eBook is designed to teach students to analyze history as conveyed in visual media. The cartoons offer comments about various moments in history, and they challenge the reader to evaluate their perspective and objectivity. Viewed outside their original journalistic context, the cartoons engage and amuse as comic art, but they can also puzzle a reader with references to little-remembered events and people. This eBook provides contextual information on each cartoon to help dispel the historical mysteries. Berryman's cartoons were originally published as illustrations for the front page of the Washington Post and the Washington Evening Star at various dates spanning the years from 1896 to 1949. Thirty-nine cartoons selected from the more than 2,400 original Berryman drawings preserved at the Center for Legislative Archives convey thumbnail sketches of Congress in action to reveal some of the enduring features of our national representative government. For more than 50 years, Berryman's cartoons engaged readers of Washington's newspapers, illustrating everyday political events as they related to larger issues of civic life. These cartoons promise to engage students in similar ways today. The cartoons intrigue and inform, puzzle and inspire. Like Congress itself, Berryman's cartoons seem familiar at first glance. Closer study reveals nuances and design features that invite in-depth analysis and discussion. Using these cartoons, students engage in fun and substantive challenges to unlock each cartoon's meaning and better understand Congress. As they do so, students will develop the critical thinking skills so important to academic success and the future health and longevity of our democratic republic. 2 | REPRESENTING CONGRESS SHOW THIS eBook IS ORGANIZED This eBook presents 39 cartoons by Clifford K. Berryman, organized in six chapters that illustrate how Congress works. Each page features one cartoon accompanied by links to additional information and questions. TEACHING WITH THIS eBook Representing Congress is designed to teach students about Congress-its

history, procedures, and constitutional roles-through the analysis of political cartoons. In what is widely considered the most influential book ever written by Walter Lippmann, the late journalist and social critic provides a fundamental treatise on the nature of human information and communication. The work is divided into eight parts, covering such varied issues as stereotypes, image making, and organized intelligence. The study begins with an analysis of "the world outside and the pictures in our heads", a leitmotif that starts with issues of censorship and privacy, speed, words, and clarity, and ends with a careful survey of the modern newspaper. Lippmann's conclusions are as meaningful in a world of television and computers as in the earlier period when newspapers were dominant. Public Opinion is of enduring significance for communications scholars, historians, sociologists, and political scientists. Copyright © Libri GmbH. All rights reserved.
