'A great reference tool for anyone wanting to learn how to trade the Forex Markets' 'Just the right amount of information to get anyone started with Forex trading' 'A really useful Forex guide' "How to Trade Forex and Currency Markets: A Beginner's Guide to Professional Forex Trading" is a practical and easy-to-follow workbook for people interested in forex (foreign exchange) trading. Geared for newcomers to currency trading, the book takes its readers through the fundamentals of the market and provides easily-understood explanations of basic principles and terminology. One particularly interesting feature that distinguishes Zac Zarr's book from other publications on forex trading is that it provides its readers with a novel way of gaining insight into market developments. As Zarr points out early in the book,

forex trading is the playground of two basic types of traders: individuals like Zarr (and presumably his readers), and what he terms the "big players." It's a dramatically uneven playing field, pitting relatively inexperienced amateurs trading alone with their own limited funds against corporate professionals trading with the advice and copious budgets of their employers. The ability of these solitary traders to influence the directions of markets is negligible, while the big players have the money and the volume to place their collective hands on the steering wheel. So, Zarr concluded early in his ten-year trading career, if you can't beat them, join them - not by applying for a job with your corporate competitors, but by getting inside their heads and figuring out how they think. That way, you can not only understand their moves, you can also anticipate them. Unlike some of his counterparts, Zac Zarr is no snake oil salesman. He offers no wild promises of amazing profits for just following a few simple directions. Zarr does, however, establish a warm and empathetic relationship with his readers as he provides straightforward step-by-step explanations with hundreds of examples based on his own real-life forex trading experiences. Although "How to Trade Forex and Currency Markets: A Beginner's Guide to Professional Forex Trading" was written primarily for beginners, it's a book that many veteran traders will also want to read to gain new insights into the workings of currency markets.

Ever felt like knocking your boss the eff out? Even if you're your own boss? I have. I remember the day I decided to punch my boss in the face. One of the best decisions I ever made by far. It was glorious. A "V" day of sorts. I just walked in his office, looked him straight in the eyes, and did a spinning back fist. Yeah, that's right ... a spinning back fist. Bruce Lee style, baby. I missed of course. And fell. But nevertheless ... my point had been made. I picked myself back up off the floor, slotted back to my cubic-hell, and resumed my daily torchores like a good

little drone. And then I woke up. Literally. Like ... in a bed. I was just a stupid dream. "Man", I thought. "If I can't even punch my boss the right way in my dreams, how the heck am I ever gonna do it in real life?" So I decided to do what every sensible human being does in his mid-thirties ... give up on my dreams. Luckily for me I had two dreams. One was to punch my boss in the face. The other was to quit my job and get filthy rich doing stuff that made me happy. Swing-and-a-miss on the first dream (pun intended). Home run on the second one. Like ... grand slam home run. I wanna tell you both how I did it and how you can be one of my "RBI"s. I've done all the hard work for you. All you have to do is quit your job and come on home. Here's my point ... You can have and do whatever the heck you want. You can, to a certain degree, create your own reality. But it's not easy. Which is why I've decided to create your reality for you. Wanna see it? Step into it even? You would if you knew what was on the other side. All ya gotta do is punch a few buttons and get this book. But you're going to have to take a click of faith.

to open an account for you, even with a deposit of only a few dollars. What is not so easy, it is to get constant profits month after month. With "Forex with Fundamental Analysis" you will discover a new way of seeing the Forex, of analysing a currency pair. You will learn the dynamics that really move the currencies. You will understand the motivations behind specific movements; you will get a clear analysis of each currency, and you will know how to use it to your advantage. It is not certainly an indicator that makes a currency pair will rise or fall, but much larger force. You will learn a correct and well-defined method to trade a currency pair. You will follow the trail of the big speculators, by distancing yourself from the mass of small fish that every day get eaten by sharks that swim in the "forex ocean." A method that comes from over 25 years of experience in financial markets, even as a fund manager for a small Italian investment bank, and which I imported and adapted to my way to trade, and that you too can use. At first glance, probably some concepts may seem complicated, but I assure you that with time and practice you will assimilate them without any problems, and it will become natural to apply them in your forex analysis. You just have to stop seeing a currency pair as a single entity, like a price, and start, instead, to see it as two opposing economies because a currency is the mirror of its economy. You do not have to see Eur-Usd as a single market, but as the Eurozone economy versus the American economy. This concept is the starting point of the entire analysis that you will learn reading this book. "Forex with Fundamental Analysis" is a book that will change your way to trade in

years, covering 60 – 70 hours a week, split shifts, weekends and all of the holidays! I stumbled across Forex trading and knew that is my way out, It was not easy! It took me over a year before I got any real education on Forex, it looked so easy at the start! But once I had blown 2 accounts by this point, it was time to get educated or quit! I didn't want to quit because I saw the opportunity Forex trading can offer, so I persevered and never stopped learning to this day, I make it my mission to always educate myself further, every day I will learn something new and it is not just about Forex, I learn about business, real estate investing and sales marketing. You should make that one of your missions to always educate yourself, it is the only way to get on in life! Anyway, it took me a while to realise that the markets are a little bit harder to read than initially perceived, with all of the news events, manipulation and uncertainty. It took many more months of learning and practice to become consistent in my trading, but persevere and you can get there! So if you are like me, like many others out there trying to learn on their own, I have been there, I have struggled on, dealt with all of the emotions of being a retail trader, no boss to give you a hard time if your trading performance does not meet up with the institutions demands. You have to learn to be your own boss, research your trading performance, kick your but if you deviate from the plan and push yourself to the next level! I am self taught and you are going do the same, so why not learn from somebody that has walked down the road you are about to embark on, but I'll help you shorten your learning curve! We all know what opportunities Forex trading can bring, every benefit is unique to you. It is up to you how these rewards will manifest into your life, you must put in some effort to see any rewards. Success is the pay off in exchange for the amount of time and effort devoted to a task, it is said that you will need to devote 10,000 hours of practice before becoming a master of your endeavor! I

remember my first Forex training course, it was \$900 and it only covered the basics, it was O.K at the time, but there was so much more I had to learn! I later subscribed with another guy for \$650 one off fee and a recurring \$90 monthly subscription charge to trade with him twice a week, I did this for one and a half years! That is my two main ones, but I have done a trading psychology course and many many more. Looking back, thinking that the amount of money I have actually paid for fragments of information is kind of sickening. I am a firm believer of that you should pay for your education and pay well when you can, because you have to be cautious about the free information out there, but we want information for a reasonable price, have it all in one place and have life time updates on new trading techniques. So this is what I propose; Learn from somebody that came from the bottom and had nobody to help but his eagerness and drive. If you become one of my loyal members, I will teach you about the basics of the Forex markets, with lifetime updates. This is my website, Forex trading and teaching is my life! In exchange for a small one off fee, for the time and effort devoted to building the tactical trader boot camp website, I will devote to giving you everything you need to know getting started in Forex trading, it will give you the insights into Forex trading. I won't teach you every single thing, I do not use every single indicator, I will not explain every single indicator, trading patterns, or trading algorithms. I will simply teach you what you need to know and give you the tools you need to become your own success story! I cut out all of the fluff, no B.S, and as long as you can put up with my Scottish accent, I think we will be just fine! So become a member of the boot camp and start learning today!

missed of course. And fell. But nevertheless ... my point had been made. I picked myself back up off the floor, slotted back to my cubic-hell, and resumed my daily torchores like a good little drone. And then I woke up. Literally. Like ... in a bed. I was just a stupid dream. "Man," I thought. "If I can't even punch my boss the right way in my dreams, how the heck am I ever gonna do it in real life?" So I decided to do what every sensible human being does in his mid-thirties ... give up on my dreams. Luckily for me I had two dreams. One was to punch my boss in the face. The other was to quit my job and get filthy rich doing stuff that made me happy. Swing-and-a-miss on the first dream (pun intended). Home run on the second one. Like ... grand slam home run. I wanna tell you both how I did it and how you can be one of my "RBI"s. I've done all the hard work for you. All you have to do is quit your job and come on home. Here's my point ... You can have and do whatever the heck you want. You can, to a certain degree, create your own reality. But it's not easy. Which is why I've decided to create your reality for you. Wanna see it? Step into it even? You would if you knew what was on the other side. All ya gotta do is punch a few buttons and get this book. But you're going to have to take a click of faith.
