Welcome to the wonderfully weird World War Two... The Second World War was the bloodiest on record. It was the first total war in history when civilians - men, women and children - were on the front line as never before. With so many millions involved, the rumour machine went into overdrive, tall stories built on fear of the unknown. With so much at stake, boffins battled with each other to build ever more bizarre weapons to outgun the enemy. Nazi Germany alone had so many government-orchestrated foibles that they would be funny if they were not so tragic. Parachuting sheep? Pilot pigeons? Rifles that fire round corners? Men who never were? You will find them all in these pages, the weird, wonderful and barely believable tales from World War Two.

After the discovery that elements were commonly composed of isotopes, there developed a range of studies of the variability of isotopic compositions in Earth materials, which was able to add to our understanding of Earth processes and history. This collection of chapters from the Treatise on Geochemistry describes the range of isotopic studies. The chapters are grouped into the following categories: light stable isotopes, radiogenic tracers, noble gases and radioactive tracers. The first three groups depend on mass spectrometric measurements. The section on radioactive tracers employs both radioactive counting techniques and the newly developed accelerator mass spectrometric techniques. For thousands of years fragrance has been used, across many varied cultures, for altering mental and emotional states, and as part of spiritual practice. This book explores the impact of fragrance on the psyche from biological, anthropological, perfumery and aromatherapy viewpoints. Beginning with an exploration of our olfactory system and a discussion of the language of odour, the book examines the ways in which fragrance can influence our perceptions and experiences. It introduces us to a broad range of fragrance types – woody, resinous, spicy, herbaceous, agrestic, floral and citrus, as well as the attars that form part of Unani Tibb medicine. Traditional and contemporary uses and the mood-enhancing properties of fragrance types are presented. The book then provides an overview of the theoretical and philosophical frameworks that have been used to analyse how and why we choose fragrance. Finally readers are given guidance on how to cultivate their olfactory palate, which reveals a new dimension in the use of fragrance to enhance wellbeing. This book offers a wealth of knowledge on plant aromatics and the powerful influence of fragrance on wellbeing.

Seduction is one of the areas of life which has the potential to bring people the most pleasure and the most pain. If people are able to effectively move through life getting what they want and need out of romance and relationships then they are sure to be spared the pain of heartbreak and loneliness. If people are unable to master this area of existence then they set themselves up for disappointment and despair. Most people stumble through life, never taking conscious control of their seductive efforts, never figuring out exactly what it is that makes some people masters of seduction, and other people permanently alone and bitter. This book entitled *Dark Seduction* by Michael Pace represents the pinnacle of dark seductive knowledge which has been collected, tested and understood by the seduction community. The fact that a secret society of seducers exists at all will be news to some people. This knowledge is so powerful that some governments have literally banned people from teaching it within their nation. Some of the most devastatingly effective pickup techniques of all time are detailed within these pages. They may shock and surprise readers - but they may well seduce them at the same time. What follows is a practical, psychological and philosophical exploration of the topic of seduction, conducted from a dark perspective. It aims only to uncover the truth behind the secrets of seduction and present real, tried and tested information without any spin, gloss or romantic distortion. The book is not for the faint of

Well, in our biology, there are basic instincts which everyone has to some extent. Some people are harder to get than others, but everyone is susceptible to seduction, and each gender is, in a general sense, different. What makes a man masculine? What makes a woman feminine? These are two of the most important questions we'll answer, because in them lies the key to becoming attractive. Many people don't understand what they are doing, though, and with these golden nuggets of knowledge, you can rise above that. Become your sexiest, most attractive, most loveable self by applying these gems of wisdom. How we see and how we visualize: why the scientific account differs from our experience.

What happens when the human brain, which evolved over eons, collides with twenty-first-century technology? Machines can now push psychological buttons, stimulating and sometimes exploiting the ways people make friends, gossip with neighbors, and grow intimate with lovers. Sex robots present the humanoid face of this technological revolution—yet although it is easy to gawk at their uncanniness, more familiar technologies based in artificial intelligence and virtual reality are insinuating themselves into human interactions. Digital lovers, virtual friends, and algorithmic matchmakers help us manage our feelings in a world of cognitive overload. Will these machines, fueled by masses of user data and powered by algorithms that learn all the time, transform the quality of human life? *Artificial Intimacy* offers an innovative perspective on the possibilities of the present and near future. The evolutionary biologist Rob Brooks explores the latest research on intimacy and desire to consider the interaction of new technologies and fundamental human behaviors. He details how existing artificial

intelligences can already learn and exploit human social needs—and are getting better at what they do. Brooks combines an understanding of core human traits from evolutionary biology with analysis of how cultural, economic, and technological contexts shape the ways people express them. Beyond the technology, he asks what the implications of artificial intimacy will be for how we understand ourselves.
