Ce livre est un aperçu de mon travail de thérapeute spécialisée en acupuncture sur oreilles. Il y a dans la première partie du livre, un peu d'histoire de la science d'Auriculothérapie et de l'Auriculomédecine ainsi que mon autobiographie. Vient ensuite des belles histoires vécues par dix de mes patients ainsi que les résultats d'une recherche sur les dangers et avantages du perçage d'oreilles. Le dernier deux tiers de mon livre contient la théorie de cette nouvelle technique de l'usage des aiguilles permanentes appelées 'implants' et utilisées par les thérapeutes pour les gens ayant la maladie de Parkinson. Ces implants sont aussi utilisés pour d'autres maux/aises tels que la Dystrophie Multiple et dans les cas de douleurs chroniques. Les patients de la maladie de Parkinson ont bien voulu vous offrir leur témoignage et cet ajout apporte une chaleur à mon livre qui risquerait d'être théorique autrement.

Finally, a rebuild and performance guide for GM 6.2 and 6.5L diesel engines! In the late 1970s and early 1980s, there was considerable pressure on the Detroit automakers to increase the fuel efficiency for their automotive and light-truck lines. While efficient electronic engine controls and computer-controlled gas engine technology was still in the developmental stages, the efficiency of diesel engines was already well documented during this time period. As a result, General Motors added diesel engine options to its car and truck lines in an attempt to combat high gas prices and increase fuel efficiency. The first mass-produced V-8 diesel engines of the era, the 5.7L variants, appeared in several General Motors passenger-car models beginning in 1978 and are often referred to as the Oldsmobile Diesels because of the number of Oldsmobile cars equipped with this option. This edition faded from popularity in the early 1980s as a result of falling gas prices and quality issues with diesel fuel suppliers, giving the cars a bad reputation for dependability and reliability. The 6.2L appeared in 1982 and the 6.5L in 1992, as the focus for diesel applications shifted from cars to light trucks. These engines served faithfully and remained in production until 2001, when the new Duramax design replaced it in all but a few military applications. While very durable and reliable, most of these engines have a lot of miles on them, and many are in need of a rebuild. This book will take you through the entire rebuild process step by step from diagnosis to tear down, inspection to parts sourcing, machining, and finally reassembly. Also included is valuable troubleshooting information, detailed explanations of how systems work, and even a complete Stanadyne DB2 rebuild section to get the most out of your engine in the modern era. If you have a 6.2, or 6.5L GM diesel engine, this book is a must-have item for your shop or library.

On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATerre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

The novel periscopes two prejudices, both rooted in slavery and race. A disturbed young American, Tim Forester travels to an African village to interrogate a story that he descends from a black woman in the slavery era. A black beauty, Alero, is ostracised by the village elite because her ancestors were labelled as champions of the slave trade era. Tim is told that the family ancestor's grave lies in a forest. Alero also hears that her dead mother, who was called a crocodile as a way to stigmatise her family as slave dealers, always had a locket believed to be in the forest. Both believe the truth is in a forbidden forest known as "the forest of silence." Tim and Alero confront their pasts and prejudices and what happens to them turns the village into a commotion of revelations that rile young and old, and expose centuries of elite hypocrisy and fear.
