Picture a tree - what do YOU see? Picture a tree, from every season, and from every angle. These wondrous beings give shade and shelter. They protect, and bring beauty to, any landscape. Now look again. Look closer. A tree's colours both soothe and excite. Its shape can ignite the imagination and conjure a pirate ship, a bear cave, a clubhouse, a friend; an ocean, a tunnel, and a home sweet home. Its majestic presence evokes family, growth, changes, endings and new beginnings. Picture a tree - what do you see? The possibilities are endless. In this gorgeous new picture book, Barbara Reid brings her vision, her craft, and her signature Plasticine artwork to the subject of trees. Each page is a celebration, and you will never look at trees in quite the same way again.

Ultimate Guide for Polymer Clay Craft: Complete and simple step-by-step Guide for making amazing art with polymer clay. Polymer clay is a type of modeling clay with a polymer polyvinyl chloride (PVC). It doesn't actually have clay minerals in it, but it's just as pliable and easy to work with (if not, more so!). Once you mold it into your desired shape, you can pop it in the oven to cure it. It doesn't shrink when you cure the clay, just hardens it. This also allows polymer clay to be a great activity to enjoy with the kids as well as adults can take care of the curing process. It's just as fun as Play-Doh but way better in my opinion, since you actually get to solidify your object into something you can keep. You've probably seen polymer clay at your local crafting stores in rows and rows of colorful blocks from brands like Fimo, Sculpey, Premo, and many others. Well, now's your chance to finally grab a few blocks to try to see what you can make. Grab this copy now and start having super fun with this craft.
