The great 13th century Muslim philosopher explores the mysteries of divine love and wisdom, using the symbolic examples of Biblical figures, prophets and holy men, from Adam to Muhammad.

Post-anarchism has been of considerable importance in the discussions of radical intellectuals across the globe in the last decade. In its most popular form, it demonstrates a desire to blend the most promising aspects of traditional anarchist theory with developments in post-structuralist and post-modernist thought. *Post-Anarchism: A Reader* includes the most comprehensive collection of essays about this emergent body of thought, making it an essential and accessible resource for academics, intellectuals, activists and anarchists interested in radical philosophy. Many of the chapters have been formative to the development of a distinctly "post-anarchist" approach to politics, aesthetics, and philosophy. Others respond to the so-called "post-anarchist turn" with caution and skepticism. The book also includes original contributions from several of today's "post-anarchists," inviting further debate and new ways of conceiving post-anarchism across a number of disciplines.

Poisons are topics of multidisciplinary concern. The clinician and the pathologist are sensitive to instances of human poisoning. The laboratory researcher, whether pharmacologist, physiologist, or biochemist, is oriented toward molecular modes of poison action. Both clinician and researcher are eager to learn of poisons that can be used as therapeutic agents or methodological tools. This volume is an attempt to underscore the multidisciplinary character of neuropoisons. Six poisons of animal origin which are receiving considerable clinical and research attention are discussed. Each poison is presented first as a clinical entity, then as a topic of investigative research, and finally as an agent useful to the study of nerve function. Because no single volume on neuropoisons can be exhaustive, an attempt at balance is offered as compensation. Two snake venoms, two marine poisons, and two bacterial toxins are presented in detail. In the sequel to this volume, attention will be focused on representative neuro poisons of plant origin.

This dissertation in the field of Islamic studies offers a critical analysis of Nurcholish Madjid's attempt to interpret Islam within the framework of modern Indonesia. Nurcholish, who recently passed away at the age of sixty-six, had been active in the reform of Islamic thought for over thirty years, and while remaining deeply coloured by the local Indonesian context, was also part of a global and century-old tradition of reform. The aim of this dissertation is twofold. Firstly, it is a study in the tradition of the history of ideas, and thus attempts an analysis of Nurcholish's ideational production and methodological approach. Secondly, it aims to locate Nurcholish's ideas and activities within the Indonesian context. To this end it provides a presentation of his life, intellectual influences and an overview of relevant historical facts.

This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficulty accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

A revised 25th anniversary edition of the classic work on Sufism that Jack Kornfield called, "A heartfelt modern illumination of the Sufi path, filled with the fragrance of the ancients." In Sufism, the mystical branch of Islam, presence is the quality that describes a heart-filled state of mindfulness, an experience of being conscious in the present moment. It is only in this present moment, Sufi teachings reveal, that we can connect with the Divine, and the Divine can live through us. Kabir Helminski is one of the world's most recognized teachers of Sufism. Named one of the "500 Most Influential Muslims" in the world by Georgetown University and the Royal Strategic Studies Center, Helminski and his teachings are touchstones for the growth in interest in Sufism, and his books have been translated around the world. In *Living Presence*, Helminski lays out the basic principles of Sufism, and how these ideas can lead to the experience of presence. In this inspiring work, readers will learn how to cultivate presence in their lives through:

- * Finding a balance between the outer stimuli of the world and our inner reactions to them
- * Harnessing faithfulness and gracefulness
- * Learning about the parallels between ancient spiritual wisdom and modern psychological knowledge
- * Meditation and contemplation to discover more meaning in daily life

With unique clarity, this book describes how presence can be developed to vastly improve our lives. Drawing on the work of the beloved Sufi poet, Rumi, as well as traditional material and personal experience, this book integrates the ancient wisdom of Sufism with the needs of contemporary life. Completely revised and updated for its 25th anniversary, this edition of *Living Presence* offers a wisdom that is both universal and practical.

This new introduction replaces Marenbon's best-selling editions *Early Medieval Philosophy* (1983) and *Later Medieval Philosophy* (1987) to present a single authoritative and comprehensive study of the period. It gives a lucid and engaging account of the history of philosophy in the Middle Ages, discussing the main writers and ideas, the social and intellectual contexts, and the important

concepts used in medieval philosophy. Medieval Philosophy gives a chronological account which: treats all four main traditions of philosophy that stem from the Greek heritage of late antiquity: Greek Christian philosophy, Latin philosophy, Arabic philosophy and Jewish philosophy provides a series of 'study' sections for close attention to arguments and shorter 'interludes' that point to the wider questions of the intellectual context combines philosophical analysis with historical background includes a helpful detailed guide to further reading and an extensive bibliography All students of medieval philosophy, medieval history, theology or religion will find this necessary reading.

This is the first study of the modern history, experience, and ethno-religious identity of the Dönme, the descendants of seventeenth-century Jewish converts to Islam, in Ottoman and Greek Salonica and in Turkish Istanbul.

Populist Discourse brings together experts from both linguistics and political science to analyse the language of populist leaders and the media's representation of populism in different temporal, geographical and ideological contexts, including Nazi Germany, Sweden, the Netherlands, Spain, Italy, Portugal, Austria, Greece, the UK, the US and South America. With 17 contributions split into four sections, Populist Discourse covers a variety of approaches such as corpus-based discourse analysis, critical discourse analysis and political perspectives, making it a timely dissection for students and researchers working in linguistics, political science and communication.

Delving into the anarchist writings of Nietzsche, Foucault, and Baudrillard, and exploring the cyberpunk fiction of William Gibson and Bruce Sterling, theorist Lewis Call examines the new philosophical current where anarchism meets postmodernism. This theoretical stream moves beyond anarchism's conventional attacks on capital and the state to criticize those forms of rationality, consciousness, and language that implicitly underwrite all economic and political power. Call argues that postmodernism's timely influence updates anarchism, making it relevant to the political culture of the new millennium.

The first book-length study to examine Turko-Persian culture as an entity.

Philosophy written in Arabic and in the Islamic world represents one of the great traditions of Western philosophy. Inspired by Greek philosophical works and the indigenous ideas of Islamic theology, Arabic philosophers from the ninth century onwards put forward ideas of great philosophical and historical importance. This collection of essays, by some of the leading scholars in Arabic philosophy, provides an introduction to the field by way of chapters devoted to individual thinkers (such as al-Farabi, Avicenna and Averroes) or groups, especially during the 'classical' period from the ninth to the twelfth centuries. It also includes chapters on areas of philosophical inquiry across the tradition, such as ethics and metaphysics. Finally, it includes chapters on later Islamic thought, and on the connections between Arabic philosophy and Greek, Jewish, and Latin philosophy. The volume also includes a useful bibliography and a chronology of the most important Arabic thinkers.

The present publication is the first that has attempted to portray the separate and progressive history of the Jews in the different countries which they have made their homes, since their expulsion from the land which they had been identified for something like thirty centuries. In these pages the author has endeavoured to compile a narrative of a great part of what has occurred to the Jews of Asia in the last eighteen and a half centuries.

A powerful tribute to feminist sci-fi about bicycles. It gravitates away from the unfortunately-traditional macho heroes, hurtling through space with giant guns, ready to protect and/or tame their scantily clad space babe. Elly's visions of the future are populated by strong, intelligent, empowered women with complex personalities. Heroines find meaning and freedom on two wheels in the confines of a gated space society and in the ravaged earth left behind. Racers compete in deep space and on otherworldly planets. From fantasy to hard sci-fi to dystopia, there's something for everyone in this little volume that launched a genre.

This book offers the first sustained treatment of Sufism in the context of modern Muslim communities. It is also innovative, in that it broadens the purview of the study of Sufism to look at the subject right across international boundaries, from Canada to Brazil, and from Denmark to the UK and USA. Subjects discussed include: the politics of Sufism, the remaking of Turkish Sufism, tradition and cultural creativity among Syrian Sufi communities, the globalization of Sufi networks, and their transplantation in America, Iranian Sufism in London, and Naqshbandi Sufism in Sweden. In its thorough examination of how Sufi rituals, traditions and theologies have been adapted by late-modern religiosity, this volume will make indispensable reading for all scholars and students of modern Islam.

The author of The Gospel of Inclusion continues to rouse organized religion as he raises controversial issues and provides enlightening answers to the deepest questions about God and faith. What is God? Where is God? Who is the one true God? Questions such as these have driven a thousand human struggles, through war, terrorism, and oppression. Humanity has responded by branching off into multiple religions, including Christianity, Judaism, Islam—each one pitted against the other. But it doesn't have to be that way. In God Is Not a Christian, nor a Jew, Muslim, Hindu . . . , the provocative and acclaimed Bishop Carlton Pearson follows up on his celebrated first book, The Gospel of Inclusion, to tackle these questions and many more, exploring new ideas about God and faith and putting forth the stunning assertion that God belongs to no particular religion but is an ever-loving presence available to all. For these beliefs, Bishop Pearson lost his thriving Pentecostal ministry but was catapulted instead into a greater pulpit. His readership has grown through appearances on national television and an extensive speaking schedule. With the world in the midst of a holy war, there is no better time for the wisdom of Bishop Pearson to reach a global audience. Bishop Pearson's many loyal fans, along with new readers, will surely welcome this provocative and eye-opening exploration of a deeper faith, one that goes far beyond any fundamentalist way of thinking, be it Christian, Jewish, Muslim, Hindu, etc. Simply put, Bishop Pearson dares to tell the truth so many others are too afraid to face.

An old man shares his secret for happiness. The two halves of the brain debate the meaning of life. A young man explains why he chose life

over death. An explorer and his team are trapped in a hostile environment, the fate of their extremely important mission in doubt. A common tradesman must solve an unanswered question to win the love of a princess; he seeks the answer with a reclusive hermit deep in the mountains. The stories in *When Zero Died* aren't ordinary: They draw on some of the oldest, classic forms in storytelling—allegory and myth—to explore what it means to live a thoughtful, selfless life in a chaotic, selfish world. They blur the line between science and religion to show how deeply interconnected the world, and everything in it, really is. Full of sharp intelligence, humor, and pathos, *When Zero Died* will make you think about how perfectly ordered and designed the universe is, and will force you to re-consider how you live your own life. Marc David Baer proposes a novel approach to the historical record of Islamic conversions during the Ottoman age and gathers fresh insights concerning the nature of religious conversion itself. Rather than explaining Ottoman Islamization in terms of the converts' motives, Baer concentrates on the proselytizing sultan Mehmet IV (1648-87).

Using original photographs, a scrapbook journal explains the nesting cycle of loggerhead sea turtles and the natural life along the southeastern coast, including local shore birds, shells, and the sea turtle hospital.
