From Aviation Supplies & Academics, trusted publisher of Federal Aviation Administration resources. This book is also available bundled with ASA Inspection

Authorization Test Prep. This FAA-CT-8080-8D is the most current testing supplement, released by the FAA in June 2008. It supersedes the earlier FAA-CT-8080-8C, dated 2005. This publication was prepared by the Flight Standards Service of the Federal Aviation Administration (FAA) for the specific purpose of Inspection Authorization (IA) testing at selected testing centers. Applicants for Inspection Authorization Certificates will be required to use FAA-CT-8080-8D, Computer Testing Supplement for Inspection Authorization, to answer the computer-assisted IA airman knowledge test questions. The supplement material consists of excerpts of selected advisory circulars, airworthiness directives, Code of Federal Regulations, type certificate data sheets, aircraft specifications, FAA orders, and forms. Applicants should note that reference material contained in this supplement is for testing purposes only. To ensure current material is available for use in day-to-day certification activities, users should be aware that they must initiate and order the publications desired, and maintain contact with the managing FAA office for the latest information, forms,

and guidance.

Read what the the U.S. Power Squadron and the U.S. Coast Guard trust as the definitive authority on electronic navigation, now updated with the latest electronic technologies and methods The Weekend Navigator teaches you how to navigate using today's tools and methods, including the latest technologies such as smart phones. While electronic navigation is here to stay, author Bob Sweet recognizes that they are still based on traditional charts and piloting skills, and he combines the two to pass along to you a solid understanding of all the principles of marine navigation. In addition to its continued ground-breaking instruction for the now-digital process of navigation on board power- and sailboats, Sweet helps you understand recent options for chartplotters, less expensive handheld GPS units, smart phones, and the navigation possibilities presented by phone apps. New to this edition is a section entitled "Ooops," which provides an insightful collection of boating accident tales resulting from common GPS and chartplotters no-nos. Using The Weekend Navigator, you can get on the water right away and learn to navigate in an afternoon with GPS; master chart-and-compass piloting while, not before, he or she departs; plot courses and fix positions on paper or electronic charts; and more.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Hunter Allen and Andy Coggan, PhD have

completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the

most important training tool ever developed for endurance sports.
