King Solomon transformed the tiny tribal nation of Israel into an economic and military superpower. His brilliance as an international financier made Israel the wealthiest nation of the ancient world. And he did it with integrity. Solomon left us twenty-eight profound leadership strategies--as valid today as when the proverbs were written. The same extraordinary wisdom that transformed Solomon's world can revolutionize every aspect of leadership--from assembling a cohesive team to managing a crisis--for any CEO, manager, pastor, coach, military strategist, or government leader. Pat Williams, senior vice president of the Orlando Magic, uses time-honored principles, real-life stories, and compelling takeaways to apply Solomon's ancient insights to the high-speed world in which we live today.

The Teacher's Book is accompanied by a DVD-ROM with tests in both PDF and editable Word format, along with a series of teacher training videos. There is also

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning

Through performance and the spoken word, Yucatec Maya storytellers have maintained the vitality of their literary traditions for more than five hundred years. *Telling and Being Told* presents the figure of the storyteller as a symbol of indigenous cultural control in contemporary Yucatec Maya literatures. Analyzing the storyteller as the embodiment of indigenous knowledge in written and oral texts, this book highlights how Yucatec Maya literatures play a vital role in imaginings of Maya culture and its relationships with Mexican and global cultures. Through performance, storytellers place the past in dynamic relationship with the present, each continually evolving as it is reevaluated and reinterpreted. Yet non-indigenous actors often manipulate the storyteller in their firsthand accounts of the indigenous world. Moreover, by limiting the field of literary study to written texts, Worley argues, critics frequently ignore an important component of Latin America's history of conquest and colonization: The fact that Europeans consciously set out to destroy indigenous writing systems, making orality a key means of indigenous resistance and cultural continuity. Given these historical factors, outsiders must approach Yucatec Maya and other indigenous literatures on their own terms rather than applying Western models. Although oral literature has been excluded from many literary studies, Worley persuasively demonstrates that it must be included in contemporary analyses of indigenous literatures as oral texts form a key component of contemporary indigenous

Understanding Da Vinci's Creative Genius The life and art of history's most influential mind Bestselling author Leonard Shlain explores the potential for humankind through the life, art, and mind of the first true Renaissance Man, Leonardo da Vinci. His innovations as an artist, scientist, and inventor are recast through a modern lens, with Shlain applying contemporary neuroscience to illuminate da Vinci's creative process. No other person in human history has excelled in so many areas of innovation: Shlain reveals the how and the why. Shlain theorizes that Leonardo's extraordinary mind came from a uniquely developed and integrated right and left brain, which offers a model for how we too can evolve. Using past and current research, Leonardo's Brain presents da Vinci as the focal point for a fresh exploration of human creativity. With his lucid style and remarkable ability to discern connections among a wide range of fields, Shlain brings the reader into the world of history's greatest mind. Leonard Shlain is a bestselling author, inventor, and surgeon. Admired among artists, scientists, philosophers, anthropologists, and educators, he authored three bestselling books. He

Looking at a wide selection of Pakistani novels in English, this book explores how literary texts imaginatively probe the past, convey the present, and project a future in terms that facilitate a sense of collective belonging. The novels discussed cover a range of historical movements and developments, including pre-20th century Islamic history, the 1947 partition, the 1971 Pakistani war, the Zia years, and post-9/11 Pakistan, as well as pervasive themes, including ethnonationalist tensions, the zamindari system, and conspiracy thinking. The book offers a range of representations of how and whether collective belonging

takes shape, and illustrates how the Pakistani novel in English, often overshadowed by the proliferation of the Indian novel in English, complements Pakistani multi-lingual literary imaginaries by presenting alternatives to standard versions of history and by highlighting the issues English-language literary production bring to the fore in a broader Pakistani context. It goes on to look at the literary devices and themes used to portray idea, nation and state as a foundation for collective belonging. The book illustrates the distinct contributions the Pakistani novel in English makes to the larger fields of postcolonial and South Asian literary and cultural studies.

Orientalism is the term applied to scholarship that reduces Islam and Muslims to

stereotypes of ignorance and violence in need of foreign control. It has been used to rationalize Europe's colonial domination of most of the Muslim world and continued American-led interventions in the post-colonial period. In the past 30 years it has been represented by claims that a monolithic Islam and equally monolithic West are distinct civilizations, sharing nothing in common and, indeed, involved in an inevitable "clash" from which only one can emerge the winner. Most recently, it has appeared in Alt Right rhetoric. Anti-Muslim sentiment, measured in public opinion polls, hate crime statistics, and legislation, is reaching record levels. Since John Esposito published his first book nearly 40 years ago, he has been guiding readers beyond such politically charged stereotypes. The essays in this volume highlight the contributions of scholars from a variety of disciplines who, like -- and often inspired by -- John Esposito, recognize the misleading and politically dangerous nature of Orientalist polarizations. They present Islam as a multi-faceted and dynamic tradition embraced by communities in globally interconnected but substantially diverse contexts over the centuries. The contributors follow Esposito's lead, stressing the profound commonalities among religions and replacing Orientalist discourse with holistic analyses of the complex historical phenomena that affect developments in all societies. In addition to chapters focusing on diversity among Muslims and interfaith relations,

this collection includes chapters assessing the secular bias at the root of Orientalist scholarship, and contemporary iterations of Orientalism in the form of Islamophobia.
