I am always telling you the best way to learn is by practicing questions, so I have made you a book full of practice questions. These books have the questions and the answers and links to videos that carefully walk you through how to get the answers. Book 1-Your GCSE maths is divided into five different topics; there will be a different number of questions (or parts of problems) depending on the subject. The different number of questions in each section in this book reflects the exam. 15% Number 8 questions 20% Ratio, Proportion, and Rate of Change 10 questions 30% Algebra 15 questions 15% Statistics and Probability 7 questions 20% Geometry and Measure 10 questions Book 2- 50 Algebra questions This book is not designed as a textbook or revision guide but as a workbook. There are lots of good (and bad) expensive and free revision guides out there, on my YouTube channel and other great websites. So, there is no point in me adding to the masses. All the teaching, all the new content, is available for free on my YouTube channel, this book is for you to practice and learn. The best way to approach this is to watch the teaching video and make notes, or after class try a section and check the answers.
