In this stunning follow-up to his acclaimed debut, *Thunderer*, Felix Gilman's brave hero returns from one thrilling and dangerous quest only to confront another. In a magical landscape where time is meaningless, reality precarious, and countless selves work toward countless possible futures, one man must seek a city's truth—and rediscover his own. Imprisoned with a prophetic half human, half beast, the lost man learns his name: Arjun. Slowly the terrible memories emerge, and at last he remembers where—and when—he has been. . . . In the last days of the once great city of Ararat, Arjun is just another ghost lost in the shadows of the Mountain. To some, the Mountain is a myth, to others, a weapon. Above all, it is a dark palace leaving its seekers to wander the city below. For no matter how far one walks, the Mountain never draws closer, and time itself becomes another trap. Rescued by two sisters from the mindless Know-Nothings who erode what's left of the city, Arjun volunteers to retrieve their long-lost third sister from a ghost like himself: Brace-Bel, another man out of time. It will require a perilous trek through ruins to a decadent mansion—one surrounded by traps and devices that could not possibly exist yet. And what awaits Arjun inside is something he could not possibly have imagined. As he struggles to recover the lost girl and piece the fragments of his life back together, Arjun knows he must finally return to the beast to hear the rest of its prophecy. But each step is more treacherous than the last . . . and the beast who knows his fate may pose the most deadly trial yet. A spellbinding novel of imagination and intrigue, *Gears of the City* will propel you into an adventure like no other, in a world like no other.

Finalist for 2009 The Council on Botanical & Horticultural Libraries Literature Award! A Fresh Look at Taxonomy The most fundamental of all biological sciences, taxonomy underpins any long term strategies for reconstructing the great tree of life or salvaging as much biodiversity as possible. Yet we are still unable to say with any certainty how many species are living on the earth. The New Taxonomy describes how a confluence of theory, cyberinfrastructure, and international teamwork can meet this unprecedented research challenge and marks an emerging field, cybertaxonomy. Taxonomy Meets the Challenges of the Biodiversity Crisis An in-depth discussion of the future of descriptive taxonomy, the book examines the efforts of several international groups to catalog the world's biodiversity and make it accessible. An answer to Julien Huxley's The New Systematics, the book marks the beginning of an upward trajectory of taxonomy to meet the unprecedented challenges of the biodiversity crisis. Contemporary taxonomists reclaim the unique mission, goals, and importance of taxonomy as an independent science. They cover technologies such as DNA evidence and its applications, computer-assisted species identification, digital morphology, and E-typification. The book also provides insight into effective ways of organizing taxonomic information and discusses what benefits can be leveraged from a rapid growth of taxonomic knowledge. A Vision and A Strategy for the Future Not much has changed since E.O. Wilson pointed out how little we know of Earth's species in 1985. This book offers a vision and a strategy for changing all that. The first current, unapologetic look at morphology and descriptive taxonomy that points out their incredible importance to science and society, this book frames one of the most constructive responses to biodiversity crises. It is a call to action for the taxonomy and museum communities to come together and to organize, plan, innovate, and initiate the most ambitious period of exploration in the long history of taxonomy.

A Library Journal Best Book of 2015 Go behind the scenes of seven of today's most popular narrative radio shows and podcasts, including *This American Life* and *RadioLab*, in graphic narrative. Every week, millions of devoted fans tune in to or download *This*

American Life, The Moth, Radiolab, Planet Money, Snap Judgment, Serial, Invisibilia and other narrative radio shows. Using personal stories to breathe life into complex ideas and issues, these beloved programs help us to understand ourselves and our world a little bit better. Each has a distinct style, but every one delivers stories that are brilliantly told and produced. Out on the Wire offers an unexpected window into this new kind of storytelling—one that literally illustrates the making of a purely auditory medium. With the help of This American Life's Ira Glass, Jessica Abel, a cartoonist and devotee of narrative radio, uncovers just how radio producers construct narrative, spilling some juicy insider details. Jad Abumrad of RadioLab talks about chasing moments of awe with scientists, while Planet Money's Robert Smith lets us in on his slightly goofy strategy for putting interviewees at ease. And Abel reveals how mad—really mad—Ira Glass becomes when he receives edits from his colleagues. Informative and engaging, Out on the Wire demonstrates that narrative radio and podcasts are creating some of the most exciting and innovative storytelling available today.

One of the field's most respected introductory texts, Modern Physics provides a deep exploration of fundamental theory and experimentation. Appropriate for second-year undergraduate science and engineering students, this esteemed text presents a comprehensive introduction to the concepts and methods that form the basis of modern physics, including examinations of relativity, quantum physics, statistical physics, nuclear physics, high energy physics, astrophysics, and cosmology. A balanced pedagogical approach examines major concepts first from a historical perspective, then through a modern lens using relevant experimental evidence and discussion of recent developments in the field. The emphasis on the interrelationship of principles and methods provides continuity, creating an accessible "storyline" for students to follow. Extensive pedagogical tools aid in comprehension, encouraging students to think critically and strengthen their ability to apply conceptual knowledge to practical applications. Numerous exercises and worked examples reinforce fundamental principles.

Silver Winner, ForeWord Magazine Book of the Year, History From September 1941 until January 1944, Leningrad suffered under one of the worst sieges in the history of warfare. At least one million civilians died, many during the terribly cold first winter. Bearing the brunt of this hardship—and keeping the city alive through their daily toil and sacrifice—were the women of Leningrad. Yet their perspective on life during the siege has been little examined. Cynthia Simmons and Nina Perlina have searched archival holdings for letters and diaries written during the siege, conducted interviews with survivors, and collected poetry, fiction, and retrospective memoirs written by the *blokadnitsy* (women survivors) to present a truer picture of the city under siege. In simple, direct, even heartbreaking language, these documents tell of lost husbands, mothers, children; meager rations often supplemented with sawdust and other inedible additives; crime, cruelty, and even cannibalism. They also relate unexpected acts of kindness and generosity; attempts to maintain cultural life through musical and dramatic performances; and provide insight into a group of ordinary women reaching beyond differences in socioeconomic class, ethnicity, and profession in order to survive in extraordinary times.

Archie is a Geek to his core – and despite having a Close Encounter with Sarah at the beginning of term, he's still completely clueless about girls. Enter Clare – an older woman (she's sixteen) who Archie meets on his weekend trip to see his dad and his nightmare step-mum, Jane. Clare and Archie hit it off – and she comes up with a brilliant, foolproof way to get their crushes to notice them: pretend to be going out with one another! What can possibly go wrong? With school, Sarah, a fake girlfriend and his insane family to deal with, Archie and his mates step-up the nerdiness and go Live Action Role-play gaming. Ladies and gentlemen, we are entering a new era... A warm, witty tale of being a teenage geek, *Geekhood* captures the awkwardness of being a teenager perfectly. *Geekhood* has won huge acclaim and deserves a place in the heart of any teenager with even slightly geeky leanings. "A deliciously tender story that wittily captures the ecstasy and agony of being a teenager." Julia Eccleshare, *LoveReading4kids*. "This book makes being a geek sound pretty cool to me!" True Blood's Stephen Moyer. Carlos is a lover of women. He loves them passionately, intensely, and deeply, and he tries to be sincere and tender. He is sensual and caring, generous in his affection and attention, and prone to fall ardently in love. His sensual adventures, filled with the pursuit of beauty and every possible hedonistic pleasure, take him to three different countries. In each country, he loses his heart on the perpetual quest for the elusive love of his life. He knows that each woman he romances is ready to be loved, and it's up to him to unlock the mystery of her inner heart if he desires access to more. But on his lust-fueled quest, he finds an unexpected surprise in an older woman. Has he finally found the one woman he could love forever in this sophisticated and beautiful woman he meets? Is she the woman of his dreams, his fantasies, his

heart's desire? Only time will tell. The heart wants what the heart wants, and Carlos knows just how far he will go to see his most fervent dreams come true.

Introduces the tenets of the macrobiotic diet and features recipes that draw from macrobiotic traditions and various world cuisines.

Robert P. Morgan is one of a small number of music theorists writing in English who treat music theory, and in particular Schenkerian theory, as part of general intellectual life. Morgan's writings are renowned within the field of music scholarship: he is the author of the well-known Norton volume Twentieth-Century Music, and of additional books relating to Schenkerian and other theory, analysis and society. This volume

of Morgan's previously published essays encompasses a broad range of issues, including historical and social issues and is of importance to anyone concerned with modern Western music. His specially written introduction treats his writings as a whole but also provides additional material relating to the articles included in this volume.

Do traditional distinctions between "belief" and "knowledge" still make sense? How are differences between knowledge and belief understood in different cultural contexts? This book explores conflicts between various types of knowledge, especially between orthodox and heterodox knowledge systems, ranging from religious fundamentalism to heresies within the scientific community itself. Beyond addressing many fields in the academy, the book discusses learned individuals interested in the often puzzling spatial and cultural disparities of knowledge and clashes of knowledge.

In the wake of the Civil War, the wealthy and carefree Julia Hoffman endeavors to bring meaning into her life when she falls in love with abolitionist and reverend Nathaniel Green, eventually serving as a nurse alongside Phoebe, who has entered the army under false pretenses. Original.

Generally, biologists and mathematicians who study the shape and form of organisms have largely been working in isolation from those who work on evolutionary relationships through the analysis of common characteristics. Increasingly however, dialogue between the two communities is beginning to develop - but other than a handful of journal papers, t

This is the first book to present both classical and quantum-chemical approaches to computational methods, incorporating the many new developments in this field from the last few years. Written especially for "non"-theoretical readers in a readily comprehensible and implemental style, it includes numerous practical examples of varying degrees of difficulty. Similarly, the use of mathematical equations is reduced to a minimum, focusing only on those important for experimentalists. Backed by many extensive tables containing detailed data for direct use in the calculations, this is the ideal companion for all those wishing to improve their work in solid state research.

This analysis identifies tasks that a qualified heavy duty equipment mechanic is called upon to perform in Canada. The equipment is typically found in the fields of construction, transportation, natural resources, and materials handling. The analysis identifies tasks and sub-tasks performed by such a mechanic, arranged in blocks of distinct operations relevant to that occupation. These blocks include workplace safety, work practices and procedures, and tasks related to internal combustion engines, power trains, electrical and electronic systems, hydraulic and hydrostatic drive systems, pneumatics, steering systems, suspension and braking systems, frames, chassis, wheels and tracks, attachments, and

ground-engaging and working tools. For each task, the document outlines the element of skill and knowledge needed to perform the task adequately, identifies any shifts or changes in technology that affect the task, lists tools and equipment required for the task, and provides an indication of whether the task has been validated by each province and territory. The appendix includes a list of tools and equipment used in the occupation, and a tabulation of the percentage of time a worker spends performing each block and task in a given year (by province/territory and for Canada as a whole). Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from Walking Through Clear Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from Details magazine, and the funniest of her advice columns from the East Village Eye, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

The love between sisters is truly a special gift. Inspirational quotes and Scriptures will show her how much you care.
