With frequent practice questions and sample answers, students have plenty of opportunities to build their confidence answering questions. Answers to coursebook questions are in the teacher's resource.

In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals \* What poverty is and how it affects students in school; \* What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain); \* Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and \* How to engage the resources

necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.

This revised set of resources for Cambridge International AS and A Level Sociology syllabus (9699) is thoroughly updated for the latest syllabus. Written by a highly experienced author, the Coursebook provides comprehensive support for the syllabus. Accessible language combined with the clear, visually-engaging layout makes this an ideal resource for the course. Discussion of significant sociological research, case studies, explanation of key terms and questions within the text reinforce knowledge. Stimulating activities build interpretation and application as well as analytical and evaluation skills. Revision checklists help in consolidating understanding. The book provides complete exam support with each chapter culminating in exam-style questions and a further chapter dedicated to revision, and examination skills and practice. A Teacher's CD-ROM is also available.

Think you know Shakespeare? Think again . . . Was a real skull used in the first performance of Hamlet? Were Shakespeare's plays Elizabethan blockbusters? How much do we really know about the playwright's life? And what of his notorious relationship with his wife? Exploring and exploding 30 popular myths about the great playwright, this illuminating new book evaluates all the evidence to show how historical material—or its absence—can be interpreted and misinterpreted, and what this reveals about our own personal investment in the stories we tell.

Comprehensive student-friendly resources designed for teaching Cambridge International AS and A Level English Language (syllabus 9093 for first examination in 2015). The core aim of this Coursebook is to help students to develop and apply the key skills they need to achieve in AS and A Level English Language. They will build the skills needed for assessment through frequent activities. Divided into two distinct parts for AS and A Level studies, the book covers a wide range of reading skills, such as understanding aspects of style, voice and tone. It also addresses the conventions of key kinds of writing and spoken language, from scripted speeches to travel articles, and looks at how they can capture these conventions in their own work.

This title covers the entire syllabus for Cambridge International Examinations' International AS and A Level Biology (9700). It is divided into separate sections for AS and A Level making it ideal for students studying both the AS and the A Level and also those taking the AS examinations at the end of their first year. - Explains difficult concepts using language that is appropriate for students around the world - Provides practice throughout the course with carefully selected past paper questions at the end of each chapter We are working with Cambridge International Examinations to gain endorsement for this title.

This series is for the Cambridge International AS & A Level IT syllabus (9626) for examination from 2019. This coursebook provides a clear and comprehensive guide to assist students as they develop theoretical and practical IT skills. It contains detailed explanations of theoretical and practical concepts and tasks, with worked examples and exercises to consolidate knowledge. Practical tasks are offered throughout the book, with source files on the accompanying CD-ROM, to help students build and develop their practical knowledge.

Supports students studying for Cambridge International AS & A Level Global Perspectives & Research. This coursebook is the only resource endorsed by Cambridge International Examinations for Cambridge International AS and A Level Global Perspectives and Research (9239), for first examination from 2016. The coursebook helps students and teachers understand the Critical Path via exploration of international topics, such as climate change. This helps develop students' ability to think critically and consider alternative viewpoints in preparation for university and employment. With exam-style questions, group discussion activities and personal reflection, the coursebook provides structure through a skills-based syllabus, while helping build important life skills. Suggested answers to coursebook questions are on the upcoming teacher's resource CD-ROM.

Provides a study of theory and practice on the importance of technology in teaching and learning.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.  
Cambridge International AS Level History is a suite of three books that offer complete coverage of the Cambridge International AS Level History syllabus (code 9389).
