Reviews topics covered on the test, offers tips on test-taking strategies, and includes two full-length practice tests with answers and explanations.

One of the most significant developments in school education in recent years has been the development and introduction of standards, a subject of considerable controversy. This book is the result of a symposium held in Kiel, a symposium that was arranged by two leading science education groups, one at IPN (Leibniz Institute for Science Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together experts from 15 countries. These countries include those that have extensive experience with the effects of standards on the educational system, on individual schools and teachers and on students. Other reports concern countries which are introducing them shortly and yet others on countries that are in the early stages of development of standards. 11 are from Europe and the others are from Australia, Israel, Taiwan and the U.S. The book is divided into three parts. In Part A, two of the organizers set the scene, describing the reasons for arranging the symposium and outlining the preparations and the work done at the meeting. Part B contains 17 reports from the 15 countries and in Part C, there are two summaries, analysing the conclusions, taken from two different vantage points. The controversies surrounding standards remain. However, this book gives a succinct and authoritative overall account of the advantages and disadvantages of their introduction taken from the experiences of many countries.

Ireland 1973: a very different world. But a tiny village in County Dublin was about to lose its innocence for ever. On a bright and sunny June afternoon, a seven-year-old boy was left in the care of his teenage neighbour. No one knew, or would even have dreamed of suspecting, that the teenager was a Satanist. The two went out to the fields to look for rabbits. The child was never seen alive again. For the first time, in *The Boy in the Attic*, David Malone reveals the exact events of that summer day: how the youngster was lured to his death, how the teenager came to delve so deeply into the occult and the nightmarish scene awaiting police when they entered the attic. But there is another disturbing question - how is it that this murder, which was easily one of the most shocking and horrific in living memory, was barely reported upon at all? Why have you never heard of the boy in the attic until now?

Tender fictional memoir of growing up in post-war Belfast. In one of the most captivating stories of childhood yet to emerge from Northern Ireland, The Faloorie Man traces the early years of Martin McBride, a young Catholic boy growing up on the streets of post-war Belfast. Stark, funny, at times heart-wrenching, Martins coming of age story is set against sectarian division. As he emerges from the cocoon of his family, he faces an uncertain world: the shocking discovery of the difference between boys and girls, the unprovoked fighting on the schoolyard, the torture of education, the doubtful pleasure of illicit sex, and the accidental discovery of a darkly hidden truth.

As a schoolboy the only thing Len Woodgate wanted to do was to join the RAF. He achieved this at the tender age of 16, by becoming a member of the 49th Entry of the RAF Halton Apprenticeship scheme. Then followed a full career in the RAF where he later gained a commission. As well as the UK, he was posted on several overseas tours. He finished his service by taking charge of the Aerospace Museum at Cosford and prepared it to be taken over as part of the Royal Air Force Museum. Now, aged 87, Len Woodgate is a remarkable man who has lived an equally remarkable life. His mind is still as sharp as a razor and his memory is still crystal clear. Numerous of Len's exploits and achievements are related within his book.
