Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of Learning to Teach Geography in the Secondary School... 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work...a standard reference for many beginning teachers on geography initial teacher training courses.' - Educational Review

Offers clear, practical support for students for the CIE syllabus The teachers workbook goes alongside the pupil book. Written by an experienced IGCSE teacher and CIE teacher trainer, English as a Second Language offers clear, practical support for students. Endorsed by the University of Cambridge International Examinations for use with the syllabus, It is divided into succinct units based on the skill areas of the IGCSE examination. The units adopt a lively approach to the subject, utilising a diverse range of stimulus material. They also include imaginative and stimulating exercises designed to build confidence and develop the skills needed to succeed in the examination. A students workbook is also available. This book is a comprehensive volume that brings together vast knowledge about agricultural prairies in one place, providing concise information and providing concise descriptions of natural resources and their influence on crop productivity. It provides detailed descriptions about natural settings as well as lucid discussions on soil fertility and crop production trends for various agricultural prairies distributed all across the earth. Chapters one through seven provide detailed descriptions on geologic aspects; physiography and agroclimate; natural vegetation and cropping history; human population, migration and development of settlements; natural resources such as soils, water, and crops; and environmental concerns. In particular, the first chapters cover the prairies of North and South America, namely, the Great Plains of North America, the Cerrado of South America, and the Pampas of South America. Chapter 4 deals with the steppes of Southern and Central Europe, Chapter 5 describes the savannahs of West Africa, Chapter 6 is concerned with Indo-Gangetic and Deccan plains, and Chapter 7 deals with prairies of Northeast China. The last chapter provides a comparative view of all agricultural prairies. Specifically, it compares the contrasting natural features, soil fertility, irrigation, and crop productivity. Agricultural prairies exist at levels of intensification. A few show subsistence or low input trends. Discussions pertaining to extent of intensification are included. Further, it includes interesting discussions on how the situation has grown into interdependence of man and prairies. It highlights the way prairies (crops) have influenced, naturally coaxed, and driven human activities to their own advantage.
