Raised with limited peer interaction, Ernestine St Bennett has difficulty interpreting social cues. At twenty-five she's become a loner; a shy nerd immersed in her scientific studies, whose best friend is her pet fish, Waldo. Then Ernestine meets Simon Prime, who's obviously a nerd, too! Sympathizing with his social dysfunction, Ernie decides to help poor Simon increase his self-esteem and thus enhance his social standing. Using principles learned in her fish studies, she'll simply turn Simon from meek to macho. What Ernestine doesn't know (but Waldo suspects) is that Simon Prime is really ex-cop, private investigator Sam Pierce in disguise. A man who definitely doesn't need his masculinity enhanced!

Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX® Examination is the only review book on the market with a focus on prioritization and management of care—just like the current NCLEX Examination itself! The workbook's unique approach establishes your foundational knowledge and then provides exercises of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. It offers unique preparation for the NCLEX Examination and effectively equips you to practice in today's fast-paced healthcare environment. The only workbook available that provides in-depth practice with prioritization, delegation, and assignment questions similar to those you'll see on the NCLEX Examination, including questions in alternate item formats. Unique three-part organization that (1) equips you with foundational skills to make sound decisions, then helps you apply those skills (2) in straightforward scenarios and (3) then in complex health scenarios. In-depth Answer Key at the back of the book that provides not only the correct answer but also a detailed rationale and an indication of the focus of the question, whether prioritization, delegation, supervision, or patient assignment. Expanded content focus to include psychiatric/mental health, OB/maternity, and pediatrics along with med-surg areas. New chapters on infection control and obstetrics and maternity. Greater emphasis on questions involving core body systems and related health problems, such as diabetes and cancer, to best prepare you for the conditions you are most likely to encounter on the NCLEX Examination and in clinical practice. Four new unfolding cases addressing long-term care, pediatrics, psychiatric/mental health nursing, and OB/maternity. Additional emphasis on medication safety equips you to take appropriate actions to prevent or remediate medication errors. Multiple-select questions revised to include at least 5 response choices each, keeping you up to date with the full range of NCLEX Examination item formats.

Colton "Bull" Lanier lived by a strict code—duty, honor, and trust no one outside his small circle of friends. The she entered his life. His new client was in trouble and kept secrets, but he couldn't ignore her plea for help. When their attraction flared hot enough to scorch them, he gave her something very rare—his trust. But their worlds collided, and he was left questioning everything he'd ever believed.

Then she disappeared, and he was left to face one cold, hard fact: the truth changes everything.

A dangerous new order threatens the mission of the Knights of Arrethtrae. Only loyalty to the King can bring victory! As the Knights of the Prince await His triumphant return, they are steadfast in their mission to take His story into the kingdom and recruit as many as are willing. But when a new and dangerous threat is revealed, their mission is jeopardized. Sir Kendrick and his young charge, the impetuous Sir Duncan, are sent on a mission to discover the identity and origin of a secretive new order known as the Conquistero Knights. They travel to the city of Bel Lione where Lord Ra has been enticing young people in the kingdom to join his festivals, after which many choose not to return home. Their families keep quiet for fear of repercussion. When Sir Duncan disappears while trying to discover the truth of Lord Ra's castle, Sir Kendrick attempts to find and enlist the help of a mysterious warrior. Time is short for he must save Duncan and call upon the knights of Chessington to join in the battle against the evil Lord Ra. Journey to Arrethtrae, where these knights of noble heart live and die in loyal service to the King and the Prince. These knights are mighty, for they serve a mighty King. They are...the Knights of Arrethtrae!

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

Dealing with mechanics and the solving of mechanical problems with the help of pure mathematics, this A-Level text introduces at an early stage an appreciation of the properties of vectors. Throughout the book problems are solved using vector methods where appropriate, and many worked examples are provided to illustrate each main development of a topic. A set of straightforward problems follows each section, and a selection of more challenging questions appears in the miscellaneous exercises at the end of most chapters, with multiple-choice questions on most topics.

Snowbound in a cabin . . . able to live out all her fantasies . . . Laura Barber has dreamt of doing unspeakably delicious things with Ethan Gould for years. Now, stuck in a mountain cabin, she just might get her shot. Ethan offers her the chance to live out each and every one of those desires. They may be rivals in the business world, but in the bedroom they're a perfect match. Knowing they have only a few days, Laura shakes off all her inhibitions. Every secret need, every lust-filled thought . . . it's all fair game. The Latin language has been the one constant in the cultural history of the West for more than two millennia. It has been the foundation of our education, and has defined the way in which we express our thoughts, our faith, and our knowledge of how the world functions. Indeed, the language has proved far more enduring than its empire in Rome, its use echoing on in the law codes of half the world, in the terminologies of modern science, and until forty years ago, in the liturgy of the Catholic Church. It is the unseen substance that makes us members of the Western world. In his erudite and entertaining "biography," Nicholas Ostler shows how and why (against the odds, through conquest from within and without) Latin survived and thrived even as its creators and other languages failed. Originally the dialect of Rome and its surrounds, Latin supplanted its neighbors to become, by conquest and settlement, the language of all Italy, and then of Western Europe and North Africa. Its cultural creep toward Greek in the East led it to copy and then ally with it in an unprecedented, but invincible

combination: Greek theory and Roman practice, delivered through Latin, became the foundation of Western civilization. Christianity, a latecomer, then joined the alliance, and became vital to Latin's survival when the empire collapsed. Spoken Latin re-emerged as a host of new languages, from Portuguese and Spanish in the west to Romanian in the east. But a knowledge of Latin lived on as the common code of European thought, and inspired the founders of Europe's New World in the Americas. *E pluribus unum*. Illuminating the extravaganza of its past, Nicholas Ostler makes clear that, in a thousand echoes, Latin lives on, *ad infinitum*.

If a hungry little traveler shows up at your house, you might want to give him a cookie. If you give him a cookie, he's going to ask for a glass of milk. He'll want to look in a mirror to make sure he doesn't have a milk mustache, and then he'll ask for a pair of scissors to give himself a trim.... The consequences of giving a cookie to this energetic mouse run the young host ragged, but young readers will come away smiling at the antics that tumble like dominoes through the pages of this delightful picture book.

It is said that if the smell of the Himalayas creeps into a man's blood, he will return to the hills again and again, and will strive to live amongst them always. Ruskin Bond, master storyteller and connoisseur of the mysterious and macabre, shows how this love may persist to death and beyond. The stories in this collection are set amidst the mists and mellow magic of Bond's beloved mountains. The agents of the supernatural may be gentle like the fairy folk in 'On Fairy Hill', or malevolent like the well-dressed diners of 'The Prize'; humorous like the very proper witch, Miss Bellows, in 'The Black Cat', or tragic like the haunting Gulabi in 'Wilson's Bridge'. 'The Rakshasas' harks back to traditional hill spirits, while 'The Night of the Millennium' poises us tantalizingly on the brink of the future. Bond aficionados will meet familiar faces in 'Reunion at the Regal'. Rounding off this collection is a gripping mystery, 'Who Killed the Rani?', which is evocative of life in hill stations some twenty years ago. And over all the stories looms the benevolent or brooding presence of the Himalayas, described with Bond's inimitable lyricism.

In 1988, on Stephen King's retirement JWT published 'The King Papers' a small collection of Stephen King's published writings spanning 1967-1985. They remain timelessly potentially valuable but are an almost unexploited gold mine. This book is comprised of a selection of 20-25 of Stephen King's most important articles, each one introduced by a known and respected practitioner who, in turn, describes the relevance of the particular original idea to the communications environment of today. The worth of this material is that, although the context in which the original papers were written is different, the principles themselves are appropriate to marketing communications in today's more complex media environment. The book will serve as a valuable reference book for today's practitioners, as well as a unique source of sophisticated, contemporary thinking. "Designed for an introductory course on Biochemical Engineering, this book

'The school where I first met Cora Ravenwing was called Okington School, and I was just beginning to have real ideas and opinions of my own when I first went there...' With Cora Ravenwing (1980) Gina Wilson began her acclaimed career as a novelist for young adults. As she describes in a new preface to this reissue, the idea for the novel 'took a grip' on her such that she wrote without 'planning', inspired by the theme of a child's growing sense of intuition. 'A sensitive, mystery-tinged portrayal of social tensions... Cora Ravenwing, village scapegoat, is the first child whom narrator Becky Stokes meets when her family moves outside London in the mid-1950s; and her reflections deftly pick up the undercurrents of gossip, hostility, and social pretension that power the story of their year's troubled friendship.' The Cisco CCNA is one of the most widely recognised and respected qualifications in the IT industry. Every year, tens of thousands of people embark towards taking the exam via private study, Cisco Academy courses, or online training. The sad truth is most students quit along the way, and for those few who actually do attempt it, only 50% pass. All that time, effort, and money wasted! If there are so many manuals, CBT courses, lab simulators, exam engines, and study resources out there, then what goes wrong? This is the question Cisco trainer Paul Browning wanted to get to the bottom of. After interviewing thousands of students, he discovered that most people quit because they are simply overwhelmed with the sheer volume of material they need to digest and, of course, the large number of hands-on skills they need to be able to demonstrate in the exam. Add to that the day-to-day stresses of commuting to work, bringing up a family, and the distraction of everyday problems and challenges; it's no wonder people quit. This is where Cisco CCNA in 60 Days can help. Devised by two industry experts and countless Cisco students just like you, the 60-day programme breaks down every exam requirement into a daily study task. All you need to do is open the book at the relevant day (from 1 to 60), read the theory, and complete the lab. Every lesson is reviewed several times in the form of exam questions, review sessions, a handy exam cram guide, and, of course, hands-on labs for you to follow. You can choose to take the CCENT after the first 30 days and the ICND2 after the next 30 days, or you can take the CCNA after 60 days of study. Here is what is included in your study guide: 60 daily study tasks Full explanations of theory Real-world tips and advice Over 47 hands-on labs, plus 15 bonus CCENT and ICND2 labs CCENT and ICND2 cram guides Bonus VLSM guide Motivational goal-setting guide Downloadable videos Free support via www.in60days.com Author Paul Browning is a former police officer who used his CCNA qualification to help him make a career change to IT. He worked for Cisco in the UK for a while, and then went on to start his own Cisco training company, which he ran for 8 years before moving into online Cisco training. He is the author of several Cisco study guides. He has also created the online Cisco certification training sites, including www.howtonetwork.net and www.in60days.com Technical author Farai Tafa used to work in a shoe shop but decided he wanted more out of life, so he began to study for his Cisco exams. He is now a dual CCIE and one of the leading Cisco consultants in the US. He currently designs, installs, and troubleshoots networks for large companies. Author Daniel Gheorghe is a CCIE in Routing and Switching. He is currently preparing for his second CCIE certification (in Security) and he is developing his skills in system penetration testing. He also holds numerous certifications in networking and security, from Cisco and other vendors, including CCNA, CCDA, CCNA Security, CCNP, CCDP, CCIP, FCNSA, FCNSP, and CEH. He took an

interest in IT at an early age and soon developed a passion for computer networking, which made him study hard in order to reach an expert level. Technical author Dario Barinic is a network expert (dual CCIE #25071 - Routing and Switching, and Service Provider) with a Master of Engineering degree and eight years of experience in the networking field. He also holds other certifications, such as Cisco CCNA and CCNP, HP AIS, ASE, MASE, and various Cisco specialisations. Dario is specialised in the area of routing and switching (designing, implementing, troubleshooting, and operating service provider and large enterprise WAN and LAN networks).

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

The vast Chantry House estate is owned by Atreus Dionides, billionaire Greek shipping tycoon. Lindy Ryman had never seen the tanned master of the estate until one day while taking an impromptu skinny-dip to cool herself off. A brusque encounter turns into a secret fling that continues for a year... But is Lindy ready to be just another inexperienced mistress to the Greek tycoon, or will their passion burn down the barriers shutting off his heart from a real romance?

[Dedicated to the One and Only God from whom all blessings flow]. In the reign of Hoshea, the Neo-Assyrian king Shalmaneser V began the invasion of the Northern Kingdom of Israel. The conquest was completed by Sargon II who sent the Israelites into exile in parts of the Assyrian empire. Unlike the initial invasion and deportations of Tiglath-Pileser (Pul) III, this event marked the end of Israel as a nation. The exiled Israelites became known as the Ten Lost Tribes. But were they truly lost? This volume has some interesting answers.
