In *Bibliophiles and Bibliothieves*, Opritsa Popa has documented what might justifiably be described as the most celebrated case of looting of two German cultural treasures by a member of the U.S. Army at the end of World War II and their subsequent odyssey across both an ocean and a continent: the pilfering from a cellar in Bad Wildungen of the ninth-century Liber Sapientiae, containing the two leaves of the oldest extant German heroic poem, the Old High German Hildebrandslied, along with the fourteenth-century illuminated Willehalm codex, both of which had been removed from the State Library in Kassel for protection from bombing raids.

Sylvie Blair ran away for reasons that seemed right at the time but she's never let go of the past. When it comes back to haunt her - literally - she's forced to face her regrets, even as she tries to decide whether to believe her high school sweetheart's crazy stories about ghosts and drug cartels. Can Sylvie let go of the past and embrace the future? And can Dillon keep his mom alive long enough for her to live happily ever after with his dad?

An original workbook companion to the acclaimed business bestseller *The Back of the Napkin* Dan Roam's *The Back of the Napkin*, a BusinessWeek bestseller, taught readers the power of brainstorming and communicating with pictures. It presented a new and exciting way to solve all kinds of problems-from the boardroom to the sales floor to the cubicle jungle. The companion workbook, *Unfolding the Napkin*, helps readers put Roam's principles into practice with step-by-step guidelines. It's filled with detailed case studies, guided do-it-yourself exercises, and plenty of blank space for drawing. Roam structured the book as a complete four-day visual-thinking seminar, taking readers step-by-step from "I can't draw" to "Here is the picture I drew that I think will save the world." The workbook teaches readers how to:

- Improve their three "built-in" visual problem solving tools.
- Apply the four-step visual thinking process (look-see-imagine-show) in any business situation.
- Instantly improve their visual imaginations.
- Learn how to recognize the type of problem to choose the best visual solution.

If *The Back of the Napkin* was a guide to fine dining, *Unfolding the Napkin* is the cookbook that will soon be heavily marked up and dogeared.

Some actions are forever... Gruff and straight-forward, Broc McFadden has always had one passion. To be on the sea. And then he meets the sister-in-law of his former captain Derek. He wouldn't have met her if he hadn't agreed to help Derek by traveling to a land where he was wanted, which puts him in the clutches of a mortal enemy. Fierce and loyal, Beatrice cannot sit idly by and watch the Highlander man who's captured her heart punished unjustly. And yet, she's betrothed to the Lord Randall a man whose handsomeness rivals his cruelty.

This is the first and only book to combine the concept of shareholder value creation with the financial reporting process. Readers will discover the clear links between shareholder value creation, the financial accounting statements, and the market value of the firm. They'll also explore the steps leading from good decisions by management to strong financial statements, and higher shareholder value and stock prices. Throughout the pages, the authors strike an effective balance among the mechanics underlying the preparation of the statements, the measurement issues behind the mechanics, and the economic context in which the statements are prepared and used.

Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion.

Pell's equation is part of a central area of algebraic number theory that treats quadratic forms and the structure of the rings of integers in algebraic number fields. It is an ideal topic to lead college students, as well as some talented and motivated high school students, to a better appreciation of the power of mathematical technique. Even at the specific level of quadratic diophantine equations, there are unsolved problems, and the higher degree analogues of Pell's equation, particularly beyond the third, do not appear to have

been well studied. In this focused exercise book, the topic is motivated and developed through sections of exercises which will allow the readers to recreate known theory and provide a focus for their algebraic practice. There are several explorations that encourage the reader to embark on their own research. A high school background in mathematics is all that is needed to get into this book, and teachers and others interested in mathematics who do not have (or have forgotten) a background in advanced mathematics may find that it is a suitable vehicle for keeping up an independent interest in the subject.

Rajesh is going on an airplane to visit his grandparents, and he is scared to fly on a plane. He can bring one friend. Which friend should he bring?

A thousand years before the Winter War, Elgo, prince of the Vanadurin, killed the Dragon Sleeth and returned home with the fabulous wealth from the dead beast's lair. But there was more in the bounty than gems and gold, for the treasure was cursed, and in time it brought death to noble and peasant, war between Man and Dwarf, strife and destruction beyond reckoning. Now, generations later, as the conflict continues, the great Dragon Black Kalgath, in league with the Wizard Andrak, appears to avenge Sleeth's death and claim the Dragon-cursed hoard. Against this unholy alliance, two sworn enemies set forth to find a legendary long-lost weapon: a warhammer of incalculable power that may be the only hope of victory. But neither the Warrior Maiden Elyn nor the Dwarf Thork is prepared for the dangers awaiting them on this quest....

How far would you go to find yourself? Imagine everything you thought you knew about yourself turned out to be a lie, and you didn't know who was telling the truth. Imagine you possessed a secret so dangerous that, if it were exposed, it would reshape the entire world. What would you do if that secret were your very identity? In almost every way, Palo Vista seems like a typical California city, with office buildings, schools, and homes sprawled out across suburbia, filled with families making a life for themselves at the dawn of the new millennium. But two seniors at Mt. MacMurray High are about to find out that nothing is as it seems. Jason Nix is a star athlete and honors student who can't seem to remember anything about his childhood. Elyse Van Auten is a budding artist from a broken home whose father left her mother two years ago - or so she's been led to believe. Like most teens entering adulthood, Elyse and Jason just want to find out who they really are. For them, however, the stakes go far beyond their own personal quest. Join them on a journey of self-discovery that becomes a desperate fight for survival against enemies determined to conceal the truth ... and find out what happens when that fight becomes personal.

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a

thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

In these “thought-provoking visions of the future” (The Wall Street Journal), Joe Quirk and Patri Friedman of the Seasteading Institute explain how ocean cities can solve many of our environmental, technological, and civic problems, and introduce the visionaries and pioneers who are now making seasteading a reality. Our planet has been suffering from serious environmental problems and their social and political consequences. But imagine a vast new source of sustainable and renewable energy that would also bring more equitable economies. A previously untapped source of farming that could produce significant new sources of nutrition. Future societies where people could choose the communities they want to live in, free from the restrictions of conventional citizenship. This extraordinary vision of our near future as imagined in Seasteading attracted the powerful support of Silicon Valley’s Peter Thiel—and it may be drawing close to reality. Facing growing environmental threats, French Polynesia has already signed on to build some of the world’s first seasteads. Joe Quirk and Patri Friedman show us how cities built on floating platforms in the ocean will work, and they profile some of the visionaries who are implementing basic concepts of seasteading today. An entrepreneur’s dream, these floating cities will become laboratories for innovation and creativity. Seasteading “offers hope for a future when life on land has grown grim” (Kirkus Reviews), proving the adage that yesterday’s science fiction is tomorrow’s science fact.

Designed for the introductory, calculus-based physics course, Physics for Engineers and Scientists is distinguished by its lucid exposition and accessible coverage of fundamental physics concepts. The text presents a modern view of classical mechanics and electromagnetism for today’s science and engineering students, including coverage of optics and quantum physics and emphasizing the relationship between macroscopic and microscopic phenomena. Organized to address specific concepts and then build on them, the text divides each chapter into short, focused sections followed by conceptual review questions. Using real-world examples throughout the text, the authors offer a glimpse of the practical applications of physics in science and engineering and develop a solid conceptual foundation that enables students to become better problem solvers. A well-integrated media package extends this emphasis on core concepts and problem-solving skills by offering students and instructors many diverse opportunities for active learning.

Based on popular essays in New York Times’ Modern Love and Salon, as well as an Off-Broadway one-person play, The Pleasure Plan is a sexual healing odyssey, a manifesto for women to claim pleasure as a priority, and a love story all at once. Fifty percent of adult women have some form of sexual dysfunction at some point of their lives, preventing them from enjoying vibrant, soul-satisfying sex. Such was the case with Laura Zam, who suffered the blame, shame, and embarrassment of feeling bedroom broken. For her, delving between the sheets meant physical pain, zero desire, and emotional scars from being molested in her early years. However, in her late forties, after meeting and marrying the love of her life, Zam was determined to finally fix her sensual self. This is her brave and bawdy plan to triage her flaccid romantic life, stepping into a void where intimacy, self-love, and playfulness could be experienced--the full monty of Eros that had been missing from her existence. The Pleasure Plan is what happened when she decided to challenge her hopelessness. In partnership with her initially reluctant husband, she visited 15 healers and tried 30 pleasure-enhancing methods: from dilators and dildos, to hypnosis and hosting a sex brunch, to cleansing chakras, to making love to her husband in front of a geriatric Tantric goddess. Packed with humor, heart, and a healthy dose of prescriptive advice, this book chronicles Zam’s insight as she confronts many issues—from mismatched libidos to female erection enlightenment. Throughout this journey, she and her husband grow as individuals and as a couple, both in and out of the bedroom. Fearlessly honest and full of inspiration, Zam peels back the layers—or covers—and exposes her foibles, insecurities, and eventual wisdom as she excavates past traumas, accepts and embraces her worth, and claims her right to be completely alive. Today, Laura works as a sexuality educator, wellness coach, and speaker helping other women who suffer from sexual dysfunction, the effects of trauma, or those who would simply like more pleasure (of all kinds) in their lives. She also consults with health care providers so they may better assist their clients in achieving sexual well-being. While The Pleasure Plan is Zam’s personal narrative, it demystifies pervasive taboos, encouraging women to make pleasure a priority, while teaching them how to claim (or reclaim) the power of their sexual selves. It also shows men how they can support their partners in this #Metoo era. Healthy, sultry intimacy is a right; it is time for women to learn—through glorious trial and error—how to embrace the sensual side of themselves. . . exuberantly and unabashedly.

"In 1942, the federal government expelled more than 22,000 Japanese Canadians from their homes in British Columbia. From 1942 to 1949, they were dispossessed, sent to incarceration sites, and dispersed across Canada. Over 4,000 were deported to Japan. Cartographies of Violence analyses the effects of these processes for some Japanese Canadian women. Using critical race, feminist, anti-colonial, and cultural geographic theory, Mona Oikawa deconstructs prevalent images, stereotypes, and language used to describe the 'internment' in ways that masks its inherent violence. Through interviews with women survivors and their daughters, Oikawa analyses recurring themes of racism and resistance, as well as the struggle to communicate what happened. Disturbing and provocative, Cartographies of Violence explores women's memories in order to map the effects of forced displacements, incarcerations, and the separations of family, friends, and communities"--Publisher's website.
