The Castle of Otranto is a book by Horace Walpole first published in 1764 and generally regarded as the first gothic novel. In the second edition, Walpole applied the word 'Gothic' to the novel in the subtitle - "A Gothic Story". The novel merged medievalism and terror in a style that has endured ever since. The aesthetics of the book shaped modern-day gothic books, films, art, music and the goth subculture

Add this collection of 21 enchanting arrangements (including "Let All Mortal Flesh Keep Silence," "Bring a Torch, Jeanette, Isabella," and "The Holly and the Ivy") to your Christmas gig bag. These renditions shine as solos but have the richness to cut through background chatter at a holiday party. Evoking an ancient rather than modern setting, they contain variations that intermediate through advanced harpists will find both intricate and satisfying. The entire book can be played cover-to-cover in fifty-five minutes. Suitable for lever harps with 33 strings or more. Contains dynamics, chords, and some fingering suggestions.

This volume focuses on the evolution of public policy and the role of agenda setting with regard to policymaking in countries of the Global South. The authors illustrate the emergence of public policy research as an academic discipline, and highlight various aspects of history, governance, politics, and economics as components of public policy theory development. By offering a cross-national perspective, the papers contribute to a better understanding of when, how, and by whom a given policy agenda is designed, which is essential to grasping how policy is implemented. In turn, the authors investigate how the development of public policy research has influenced policymaking in fields such as democratization, migration, corruption, agriculture, environment, education, and entrepreneurship and, more specifically, agenda setting in selected countries of the Global South.

"Oliver Twist; or, the Parish Boy's Progress is Charles Dickens's second novel, and was first published as a serial 1837-39.[1] The story centres on orphan Oliver Twist, born in a workhouse and sold into apprenticeship with an undertaker. After escaping, Oliver travels to London, where he meets ""The Artful Dodger"", a member of a gang of juvenile pickpockets led by the elderly criminal, Fagin. Oliver Twist is notable for its unromantic portrayal by Dickens of criminals and their sordid lives, as well as for exposing the cruel treatment of the many orphans in London in the mid-19th century.[2] The alternative title, The Parish Boy's Progress, alludes to Bunyan's The Pilgrim's Progress, as well as the

18th-century caricature series by William Hogarth, *A Rake's Progress* and *A Harlot's Progress*.^[3]In this early example of the social novel, Dickens satirises the hypocrisies of his time, including child labour, the recruitment of children as criminals, and the presence of street children. The novel may have been inspired by the story of Robert Blincoe, an orphan whose account of working as a child labourer in a cotton mill was widely read in the 1830s. It is likely that Dickens's own youthful experiences contributed as well. *Oliver Twist* has been the subject of numerous adaptations for various media, including a highly successful musical play, *Oliver!*, and the multiple Academy Award-winning 1968 motion picture. Disney also put its spin on the novel with the animated film called *Oliver & Company* in 1988"

This volume expands upon the ten thematic strands for social studies standards identified by the National Council for the Social Studies by providing readings for each of thematic strands.

Slowly I learnt the ways of humans: how to ruin, how to hate, how to debase, how to humiliate. And at the feet of my master I learnt the highest of human skills, the skill no other creature owns: I finally learnt how to lie. Childlike in his innocence but grotesque in form, Frankenstein's bewildered creature is cast out into a hostile universe by his horror-struck maker. Meeting with cruelty wherever he goes, the friendless Creature, increasingly desperate and vengeful, determines to track down his creator and strike a terrifying deal. Urgent concerns of scientific responsibility, parental neglect, cognitive development and the nature of good and evil are embedded within this thrilling and deeply disturbing classic gothic tale. Mary Shelley's *Frankenstein*, adapted for the stage by Nick Dear, premiered at the National Theatre, London, in February 2011.

This book asks a critical question for our times: why do an increasing number of people support, admire and aspire to be outlaws? Outlaw motorcycle clubs have grown, spread and matured. Popular culture glamorizes them; law enforcement agencies fight them and the media vilify them. Meanwhile, the outlaw bikers exploit the current cultural and economic climate to attract new members. *How Outlaws Win Friends and Influence People* argues that the growth of these anti-establishment groups under neoliberalism is not coincidental, but inevitable. The book asks a critical question for our times: why do people today, in increasing numbers, support, admire and aspire to be outlaws? What needs and desires do the clubs satisfy? How do they win support and influence? Answering this is crucial if we are to successfully fight the social harms caused by these groups, as well as the harms that underlie their proliferation. Unless we understand the cultural dynamic at play here, our fight against these organizations will always take the form of a battle against the mythological Hydra: when one head is cut off, two more grow. "Tereza Kuldova is a rebel with a cause - her new book is a razor-sharp critique of stereotypical conceptions of the 'outlaw biker' and provides refreshing insights

into their subjective life-worlds”? - Daniel Briggs, author of the award-winning *Dead-End Lives*.

Publisher Description

This set is comprehensive and technically literate and more informative on regulation and policy issues. Thomas Murray is a world-renowned leader in this field.

No feminism or feminist philosophy without “A Vindication of the Rights of Woman”. Wollstonecraft argues not only that women ought to have the education of a woman should fit her position and role in society, but also that they are human beings and thus deserve the same fundamental rights as men.

This book inquires into the use of prediction at the intersection of politics and academia, and reflects upon the implications of future-oriented policy-making across different fields. The volume focuses on the key intricacies and fallacies of prevision in a time of complexity, uncertainty, and unpredictability. The first part of the book discusses different academic perspectives and contributions to future-oriented policy-making. The second part discusses the role of future knowledge in decision-making across different empirical issues such as climate, health, finance, bio- and nuclear weapons, civil war, and crime. It analyses how prediction is integrated into public policy and governance, and how in return governance structures influence the making of knowledge about the future. Contributors integrate two analytical dimensions in their chapters: the epistemology of prevision and the political and ethical implications of prevision. In this way, the volume contributes to a better understanding of the complex interaction and feedback loops between the processes of creating knowledge about the future and the application of this future knowledge in public policy and governance. This book will be of much interest to students of security studies, political science, sociology, technology studies, and International Relations.

Read the story that has inspired millions The desert, I remember. The shrieking hyenas, I remember....I remember playing soccer with rocks, and a strange man telling me and my brother Tewolde that we had to go on a trip and Tewolde refusing to go. The man took out a piece of gum and Tewolde happily traded it for his homeland.... So begins the remarkable true story of a young boy's journey from civil war in east Africa to a refugee camp in Sudan, to a childhood on welfare in an affluent American suburb, and eventually to a full-tuition scholarship at Harvard University. Following his father's advice to "treat all people-even the most unsightly beetles-as though they were angels sent from heaven," Mawi overcomes the challenges of language barriers, cultural differences, racial prejudice, and financial disadvantage to build a fulfilling, successful life for himself in his new home. *Of Beetles and Angels* is at once a harrowing survival story and a compelling examination of the refugee experience. With hundreds of thousands of copies sold since its initial publication, the unforgettable memoir continues to touch and inspire readers. This special fifteenth anniversary edition features bonus materials, including a new introduction and afterword by the author. *please note the updated anniversary edition will be released in June. Winner of the Gustave O. Arlt Award in the Humanities, awarded by the Council of Graduate Schools Honorable Mention for the

2019 Sonya Rudikoff Prize, awarded by the Northeast Victorian Studies Association *Civilizing War* traces the historical transformation of civil war from a civil affair into an uncivil crisis. Civil war is today synonymous with the global refugee crisis, often serving as grounds for liberal-humanitarian intervention and nationalist protectionism. In *Civilizing War*, Nasser Mufti situates this contemporary conjuncture in the long history of British imperialism, demonstrating how civil war has been and continues to be integral to the politics of empire. Through comparative readings of literature, criticism, historiography, and social analysis, *Civilizing War* shows how writers and intellectuals of Britain's Anglophone empire articulated a "poetics of national rupture" that defined the metropolitan nation and its colonial others. Mufti's tour de force marshals a wealth of examples as diverse as Thomas Carlyle, Benjamin Disraeli, Friedrich Engels, Arthur Conan Doyle, Rudyard Kipling, Joseph Conrad, V. S. Naipaul, Nadine Gordimer, and Michael Ondaatje to examine the variety of forms this poetics takes—metaphors, figures, tropes, puns, and plot—all of which have played a central role in Britain's civilizing mission and its afterlife. In doing so, *Civilizing War* shifts the terms of Edward Said's influential *Orientalism* to suggest that imperialism was not only organized around the norms of civility but also around narratives of civil war.

Are humans violent or peaceful by nature? We are both. In this ambitious and wide-ranging book, Agner Fog presents a groundbreaking new argument that explains the existence of differently organised societies using evolutionary theory. It combines natural sciences and social sciences in a way that is rarely seen. According to a concept called regality theory, people show a preference for authoritarianism and strong leadership in times of war or collective danger, but desire egalitarian political systems in times of peace and safety. These individual impulses shape the way societies develop and organise themselves, and in this book Agner argues that there is an evolutionary mechanism behind this flexible psychology. Incorporating a wide range of ideas including evolutionary theory, game theory, and ecological theory, Agner analyses the conditions that make us either strident or docile. He tests this theory on data from contemporary and ancient societies, and provides a detailed explanation of the applications of regality theory to issues of war and peace, the rise and fall of empires, the mass media, economic instability, ecological crisis, and much more. *Warlike and Peaceful Societies: The Interaction of Genes and Culture* draws on many different fields of both the social sciences and the natural sciences. It will be of interest to academics and students in these fields, including anthropology, political science, history, conflict and peace research, social psychology, and more, as well as the natural sciences, including human biology, human evolution, and ecology.

Cyberspace is everywhere in today's world and has significant implications not only for global economic activity, but also for international politics and transnational social relations. This compilation addresses for the first time the "cyberization" of international relations - the growing dependence of actors in IR on the infrastructure and instruments of the internet, and the penetration of cyberspace into all fields of their activities. The volume approaches this topical issue in a comprehensive and interdisciplinary fashion, bringing together scholars from disciplines such as IR, security studies, ICT

studies and philosophy as well as experts from everyday cyber-practice. In the first part, concepts and theories are presented to shed light on the relationship between cyberspace and international relations, discussing implications for the discipline and presenting fresh and innovative theoretical approaches. Contributions in the second part focus on specific empirical fields of activity (security, economy, diplomacy, cultural activity, transnational communication, critical infrastructure, cyber espionage, social media, and more) and address emerging challenges and prospects for international politics and relations.

Retells, in graphic novel format, Mary Shelley's classic tale of a monster, assembled by a scientist from parts of dead bodies, who develops a mind of his own as he learns to loathe himself and hate his creator.

The e-Learning Handbook provides a critical reflection on the current state of e-learning with contributions from the world's foremost e-learning experts and best-selling authors from academe and industry, including Margaret Driscoll; Brent Wilson Lee Christopher; William Horton, L. Wayne Precht, Harvey Singh, Jim Everidge, and Jane Bozarth; Pat Brogan; Patrick Parrish; Marc J. Rosenberg and Steve Forman; Pat McGee; Philip C. Abrami, Gretchen Lowerison, Roger Cote, and Marie-Claude Lavoie; Thomas C. Reeves, Jan Herrington, and Ron Oliver; and Patrick Lambe. The book offers a comprehensive and up-to-date assessment of the technological, design, economic, evaluation, research, economic, and philosophical issues underlying e-learning. Each chapter includes a chart that summarizes the key take-away points, contains questions that are useful for guiding discussions, and offers suggestions of related links, books, papers, reports, and articles.

This book focuses on storytelling and human life by exploring the possibilities of narrative approaches across numerous disciplines and in diverse contexts; stories are humanity's oldest way of making meaning of our past, present and future. Now at seventy-three volumes, this popular MLA series (ISSN 10591133) addresses a broad range of literary texts. Each volume surveys teaching aids and critical material and brings together essays that apply a variety of perspectives to teaching the text. Upper-level undergraduate and graduate students, student teachers, education specialists, and teachers in all humanities disciplines will find these volumes particularly helpful.

When Aubrey, a young Englishman, meets a mysterious man from London high society, Lord Ruthven, they become unlikely friends. Shortly after, Aubrey decides to accompany the noble on a trip to Rome. However, when a moral disagreement arises between the two, Aubrey decides to leave Ruthven in Rome, and goes off on his own. Arriving in Greece, Aubrey meets Ianthe, and the two share an immediate connection. After sharing stories and an evening together, Aubrey and Ianthe part ways for the night. However, after a devastating turn of events, Aubrey and Ruthven reunite, and Aubrey, ready to leave Greece behind, is happy to travel with the older man once again. But as they

continue their travels, Aubrey slowly begins to notice Ruthven's odd behavior. After even more consideration, Aubrey realizes a shocking pattern—nearly everyone that Ruthven comes in close contact to meets an untimely end. Afraid of his newly acquired knowledge, Aubrey attempts to distance himself from the suspicious man, though he is forced to reconsider his efforts when Ruthven expresses intent to marry Aubrey's sister. First published under Lord Byron's name, *The Vampyre* rose to immediate commercial success. However, though he was inspired by a discarded piece of Lord Byron's work, both authors have since admitted that John William Polidori was the true writer of *The Vampyre*. Considered to be the first work of vampire fiction, *The Vampyre* had an immense role in shaping vampires as literary figures, influencing the canonical rules of vampires that many still follow today. First published in 1819, Polidori's *The Vampyre* remains to be a thrilling and spooky read centuries later, and has since inspired both film and theater adaptations. With mystery and eerie suspense, Polidori's work is an extraordinary example of 19th century gothic horror. This edition of *The Vampyre* by John William Polidori features a striking new cover design and is printed in a font that is both modern and readable. With these accommodations, *The Vampyre* caters to a contemporary audience while preserving the original innovation of John William Polidori's work.

This volume constitutes an updated version of the bibliography published in 2004 by the African Mathematical Union. The African Studies Association attributed the original edition a 'special mention' in the 2006 Conover-Porter Award competition. The book contains over 1600 bibliographic entries. The appendices contain additional bibliographic information on (1) mathematicians of the Diaspora, (2) publications by Africans on the history of mathematics outside Africa, (3) time-reckoning and astronomy in African history and cultures, (4) string figures in Africa, (5) examples of books published by African mathematicians, (6) board games in Africa, (7) research inspired by geometric aspects of the 'sona' tradition. The book concludes with several indices (subject, country, region, author, ethnographic and linguistic, journal, mathematicians). Professor Jan Persens of the University of the Western Cape (South Africa) and president of the African Mathematical Union (2000-2004) wrote the preface.

Have you ever wanted to read Mary Shelley's *Frankenstein*, but found the language too outdated or difficult to read? This edition updates the vocabulary and language style of the original novel, sentence by sentence, to make this classic novel easier to read for a modern audience. Illustrated.

In the gloomy summer of 1816, a motley collection of poets, exiles, and adulterers gathered at the Villa Diodati on the shores of Lake Geneva...*Fantasmagoriana*: a collection of Gothic tales by Mary Shelley, Lord Byron, Percy Bysshe Shelley, and John William Polidori, all originating in a night of ghost storytelling. Contains the complete *FRANKENSTEIN* and Polidori's influential *THE VAMPYRE*, plus Gothic works by Byron, Shelley, and Mathew 'Monk' Lewis.

First-place winner of the Society for Education Studies' 2005 book prize, *Education and Conflict* is a critical review of education in an international context. Based on the author's extensive research and experience of education in several areas afflicted by conflict, the book explores the relationship between schooling and social conflict and looks at conflict internal to schools. It posits a direct link between the ethos of a school and the attitudes of future citizens towards 'others'. It also looks at the nature and purpose of peace education and war education, and addresses the role of gender and masculinity. In five lucid, vigorously argued sections, the author brings this thought-provoking and original piece of work to life by:

- * Setting out the terms of the debate, defining conflict and peace and outlining the relevant aspects of complexity theory for education
- * Exploring the sources of conflict and their relations to schooling in terms of gender/masculinity, pluralism, nationalism and identity
- * Focusing on the direct education/war interface
- * Examining educational responses to conflict
- * Highlighting conflict resolution within the school itself.

This is the first time that so many aspects of conflict and education have been brought together in one sustained argument. With its crucial exposure of the currently culpable role of formal schooling in maintaining conflict, this book will be a powerful and essential read for educational policy makers, managers, teachers and researchers dealing with conflict in their own contexts.

This open access book is the culmination of many years of research on what happened to the bodies of executed criminals in the past. Focusing on the eighteenth and nineteenth centuries, it looks at the consequences of the 1752 Murder Act. These criminal bodies had a crucial role in the history of medicine, and the history of crime, and great symbolic resonance in literature and popular culture. Starting with a consideration of the criminal corpse in the medieval and early modern periods, chapters go on to review the histories of criminal justice, of medical history and of gibbeting under the Murder Act, and ends with some discussion of the afterlives of the corpse, in literature, folklore and in contemporary medical ethics. Using sophisticated insights from cultural history, archaeology, literature, philosophy and ethics as well as medical and crime history, this book is a uniquely interdisciplinary take on a fascinating historical phenomenon.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Designed for an undergraduate course in international law, the text may also supplement International Relations, Foreign Policy, International Affairs, World Politics, and Comparative Law courses. A mix of commentary, edited cases, and problems are included. Revisions include three new chapters: International Organizations (Ch. 3), Individuals and Corporations (Ch. 4), and International Environment (Ch. 12). Career Opportunities in International Law is the new Appendix 3. Exhibits graphically illustrating chapter concepts have been added as well as expanded coverage of Sources (Ch. 1), Dispute Resolutions (Ch. 9), and International Business (Ch. 3).

The past several decades have seen an explosion of interest in narrative, with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts. As accounts of what happened to particular people in particular circumstances and with specific consequences, stories have come to be viewed as a basic human strategy for coming to terms with time, process, and change. However, the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars, teachers, and students to have access to a comprehensive reference resource.

Shanghai's illustrious history and phenomenal future is celebrated in this book, which examines the evolution of the city's architecture and urban form in order to contextualise the challenges facing the city today. The physical legacies that reflect Shanghai's uniqueness historically

and contemporarily are examined chronologically using specific case studies of exemplary architecture interwoven in a compelling narrative that unlocks the many mysteries surrounding this amazing metropolis. Some of the most influential colonial architecture in the world, outstanding examples of Modernism and Art Deco, and an exceptional selection of eclectic and vernacular architecture reflecting Shanghai's many adopted cultures are revealed. This is the first book ever to examine this remarkable subject in a manner that is both comprehensive and captivating in its written content and stunningly illustrated with over 300 archive and contemporary photographs and maps.

How are soldiers made? Why do they fight? Re-imagining the study of armed forces and society, Barkawi examines the imperial and multinational armies that fought in Asia in the Second World War, especially the British Indian army in the Burma campaign. Going beyond conventional narratives, Barkawi studies soldiers in transnational context, from recruitment and training to combat and memory. Drawing on history, sociology and anthropology, the book critiques the 'Western way of war' from a postcolonial perspective. Barkawi reconceives soldiers as cosmopolitan, their battles irreducible to the national histories that monopolise them. This book will appeal to those interested in the Second World War, armed forces and the British Empire, and students and scholars of military sociology and history, South Asian studies and international relations.

American independence was inevitable by 1780, but British writers spent the several decades following the American Revolution transforming their former colonists into something other than estranged British subjects. Christopher Flynn's engaging and timely book systematically examines for the first time the ways in which British writers depicted America and Americans in the decades immediately following the revolutionary war. Flynn documents the evolution of what he regards as an essentially anthropological, if also in some ways familial, interest in the former colonies and their citizens on the part of British writers. Whether Americans are idealized as the embodiments of sincerity and virtue or anathematized as intolerable and ungrateful louts, Flynn argues that the intervals between the acts of observing and writing, and between writing and reading, have the effect of distancing Britain and America temporally as well as geographically. Flynn examines a range of canonical and noncanonical works—sentimental novels of the 1780s and 1790s, prose and poetry by Wollstonecraft, Blake, Coleridge, and Wordsworth; and novels and travel accounts by Smollett, Lennox, Frances Trollope, and Basil Hall. Together, they offer a complex and revealing portrait of Americans as a breed apart, which still resonates today.

Careers in astronomy for women (as in other sciences) were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era, recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be

remembered as interesting individuals in an earlier opportunity-poor age. Placed in roughly chronological order, their lives constitute a sample thread in the story of female entry into the male world of science. The book is aimed at astronomers, amateur astronomers, historians of science, and promoters of women in science, but being written in non-technical language it is intended to be of interest also to educated readers generally.

In *The Philosophy of The X-Files*, Dean A. Kowalski has gathered a remarkable cast of contributors to shed light on the philosophical mysteries of the television show *The X-Files*. With sections devoted to the show's credos, such as "The Truth Is Out There," individual characters, and specific episodes, *The Philosophy of The X-Files* illuminates the philosophical assumptions and presuppositions of the show as well as presents discussions through the show to help the reader better understand philosophy and philosophical inquiry.

This volume serves to help readers understand and address factors that contribute to the psychological distress and negative self-perception of patients with head and neck cancer to improve their quality of life. It explores many of these issues in depth, such as the trends in diagnosis of head and neck cancer, disfigurement, advances and outcomes associated with minimally invasive surgery, long-term quality of life and functional outcomes, issues related to cancer pain, importance and impact of nutrition, how reconstructive advances effect functional outcomes, the impact of cancer recurrence, and financial consequences of cancer diagnosis and treatment. *Head and Neck Cancer: Psychological and Psychosocial Effects* will help otolaryngologists, oncologists, surgeons, psychologists and healthcare professionals define the unique issues associated with the HNC patient population, discuss pertinent data, outline key aspects of high quality care in this population, and to draw attention to necessary future investigations and developments.
