A top business leader shares the business principles he used to launch both a top company and a thriving nonprofit. Nonprofit leaders know that solving pervasive social problems requires passion and creativity as well as tangible results. The Non Nonprofit shares the same business principles that drive the world's best companies, showing how they can (and should) be applied to the realm of nonprofits. Steve Rothschild personally crossed sectors when he left corporate America to found Twin Cities RISE!, a highly successful poverty reduction program. His honest story, and success and missteps, create an essential roadmap for any social venture looking to prove and boost its impact. Distills essential nonprofit principles such as having a clear and appropriate purpose, creating economic value from social benefit, and establishing mutual accountability. Shares successful approaches from innovative organizations such as Grameen Bank, Playworks, Common Ground, Habitat for Humanity, Lumni, Caring Bridge, College Summit and RISE!. Draws from the author's success in founding and building Twin Cities RISE!, which trains unemployed Minnesotans for living wage jobs. RISE! serves 1,500 participants each year. As insightful as it is inspiring, The Non Nonprofit can help maximize the positive impact of any nonprofit.

The purpose of Research in Governmental and Nonprofit Accounting is to stimulate and report high-quality research on a wide range of governmental and nonprofit accounting issues. A number of papers appearing in Volume 10 differ from much of our existing empirical work. The Bento and White and Copley and Seay studies use time-series data over relatively long intervals. In the case of the Sneed and Sneed and Elder, Kattelus, and Douthett studies, the authors use methodologies which have not been employed in previous studies in either the public or private sector. To the extent that these methodologies permit investigation of previously unexplored issues, the papers will be of interest to researchers outside of the governmental and nonprofit area. Governmental and nonprofit accounting represents an undeveloped research area which would benefit from rigorous examination. The government and not-for-profit sectors are also becoming increasingly attractive research areas. There are new standards of reporting for not-for-profit entities and a proposal for a dramatic change in state and local government financial statements. Change is always an opportunity for new research. As evidenced by the Forgione chapter, data exists and is becoming increasingly available.

"This Seventh Edition is filled with authoritative advice on the financial reporting, accounting, and control situations unique to not-for-profit organizations. It contains discussions of the accounting and reporting guidelines for different types of organizations, complete guidance on tax and compliance reporting requirements, illustrated explanations of various types of acceptable financial statements, and much more!"--Publisher's Website.

For more than 60 years, Accounting for Governmental & Nonprofit Entities has been the leader in the market. It is a comprehensive governmental and not-for-profit accounting text written for students who will be auditing and working in public and not-for-profit sector entities. Originally published in 1951 and written by Professor R. M. Mikesell, this book and the many subsequent editions revised by Professors Leon Hay, Earl Wilson, Susan Kattelus, Jacqueline Reck, and Suzanne Lowensohn have given generations of instructors and students a comprehensive knowledge of the specialized accounting and financial reporting practices of governmental and not-for-profit organizations, as well as an understanding of how those organizations can better meet the information needs of a diverse set of financial statement users and decision makers. The vision of these original authors continues to be reflected in this 18th edition, and their strategy of providing a large and innovative set of instructional support materials prepared and tested in the classroom by the authors continues to be a guiding principle today. The current author team brings to this edition their extensive experience teaching government and not-for-profit courses as well as insights gained from their professional experience, scholarly writing, and professional activities. The result is a relevant and accurate text that includes the most effective instructional tools.

The national income and product accounts that underlie gross domestic product (GDP), together with other key economic data—"price and employment statistics"—are widely used as indicators of how well the nation is doing. GDP, however, is focused on the production of goods and services sold in markets and reveals relatively little about important production in the home and other areas outside of markets. A set of satellite accounts—in areas such as health, education, volunteer and home production, and environmental improvement or pollution—would contribute to a better understanding of major issues related to economic growth and societal well-being. Beyond the Market: Designing Nonmarket Accounts for the United States hopes to encourage social scientists to make further efforts and contributions in the analysis of nonmarket activities and in corresponding data collection and accounting systems. The book illustrates new data sources and new ideas that have improved the prospects for progress.

Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 11e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. This approach has two advantages: (1) it is the approach most commonly applied in practice, and (2) it is an approach familiar to students who have studied the process of consolidation in their advanced accounting classes. State and local government reporting is illustrated using an ongoing example integrated throughout Chapters 3 through 8 and 13. This edition incorporates all of the FASB, GASB, GAO and AICPA pronouncements passed since the last edition.
