The research reported in Caught in the Act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers, teaching in low socio-economic status and socially challenged environments in South Africa. The chapters show the possibilities for enhancing achievement in school mathematics if a strength-based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance – fitness for the context in which teachers are teaching – of the “goods” developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics teachers, school leaders, mathematics curriculum advisors, policy makers and researchers.

Paths to College and Career Jossey-Bass and PCG Education are proud to bring the Paths to College and Career English Language Arts (ELA) curriculum and professional development resources for grades 6–12 to educators across the country. Originally developed for EngageNY and written with a focus on the shifts in instructional practice and student experiences the

standards require, Paths to College and Career includes daily lesson plans, guiding questions, recommended texts, scaffolding strategies and other classroom resources. Paths to College and Career is a concrete and practical ELA instructional program that engages students with compelling and complex texts. At each grade level, Paths to College and Career delivers a yearlong curriculum that develops all students' ability to read closely and engage in text-based discussions, build evidence-based claims and arguments, conduct research and write from sources, and expand their academic vocabulary. Paths to College and Career's instructional resources address the needs of all learners, including students with disabilities, English language learners, and gifted and talented students. This enhanced curriculum provides teachers with freshly designed Teacher Guides that make the curriculum more accessible and flexible, a Teacher Resource Book for each module that includes all of the materials educators need to manage instruction, and Student Journals that give students learning tools for each module and a single place to organize and document their learning. As the creators of the Paths ELA curriculum for grades 6–12, PCG Education provides a professional learning program that ensures the success of the curriculum. The program includes: Nationally recognized professional development from an organization that has been immersed in the new standards since their inception. Blended learning experiences for teachers and leaders that enrich and extend the learning. A train-the-trainer program that builds capacity and provides resources and individual support for embedded leaders and coaches. Paths offers schools and districts a unique approach to ensuring college and career readiness for all students, providing state-of-the-art curriculum and state-of-the-art implementation.

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

"Extraordinary for its craft and emotional effect . . . [Ethan Canin is] a writer of enormous talent and charm." –The Washington Post "Character is destiny," wrote Heraclitus—and in this collection of four unforgettable stories, we meet people struggling to understand themselves and the unexpected turns their lives have taken. In "Accountant," a quintessential company man becomes obsessed with the phenomenal success of a reckless childhood friend. "Batorsag and Szeralem" tells the story of a boy's fascination with the mysterious life and invented language of his brother, a math prodigy. In "City of Broken Hearts," a divorced father tries to fathom the patterns of modern relationships. And in "The Palace Thief," a history teacher at an exclusive boarding school reflects on the vicissitudes of a lifetime connection with a student scoundrel. A remarkable achievement by one of America's finest writers, this brilliant volume reveals the moments of insight that illuminate everyday lives. "Captivating . . . a heartening tribute to the form . . . an exquisite performance." –The Boston Sunday Globe "A model of wit, wisdom, and empathy. Chekhov would have appreciated its frank renderings and quirky ironies." –Chicago Tribune

Student academic writing is at the heart of teaching and learning in higher education. Students are assessed largely by what they write, and need to learn both general academic conventions as well as disciplinary writing requirements in order to be successful in higher education. Teaching Academic Writing is a 'toolkit' designed to help higher education lecturers and tutors teach writing to their students. Containing a range of diverse teaching strategies, the book offers both practical activities to help students develop their writing abilities and guidelines to help lecturers and tutors think in more depth about the assessment

tasks they set and the feedback they give to students. The authors explore a wide variety of text types, from essays and reflective diaries to research projects and laboratory reports. The book draws on recent research in the fields of academic literacy, second language learning, and linguistics. It is grounded in recent developments such as the increasing diversity of the student body, the use of the Internet, electronic tuition, and issues related to distance learning in an era of increasing globalisation. Written by experienced teachers of writing, language, and linguistics, *Teaching Academic Writing* will be of interest to anyone involved in teaching academic writing in higher education.

Access to education is a fundamental human right under the Convention on the Rights of the Child, and represents a key tool to protect refugee children from recruitment into forced labour, military activity, prostitution and crime. The papers presented in this book were commissioned by the UNHCR and presented at a workshop on refugee education held in March 2001 in the United States. Issues discussed include: educational response in emergency situations; quality of refugee school programmes; youth education for peace and conflict resolution; and a case study of vocational training programmes in Tanzania.

“This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics” (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we’re starting to realize it’s not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we’re at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We’re drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and

can't seem to live without. "When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences." —SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics." —Publishers Weekly "A compulsively interesting story. Buy it (with cash)." —Bill McKibben, author of *The End of Nature* "What a great read—rigorous, smart, inspiring, and as seductive as plastic itself." —Karim Rashid, designer
