Earn College Credit with REA's Test Prep for CLEP® Financial Accounting Everything you need to pass the exam and get the college credits you deserve. CLEP® is the most popular credit-by-examination program in the country, accepted by more than 2,900 colleges and universities. For over 15 years, REA has helped students pass CLEP® exams and earn college credit while reducing their tuition costs. Our CLEP® test preps are perfect for adults returning to college (or attending for the first time), military service members, high-school graduates looking to earn college credit, or home-schooled students with knowledge that can translate into college credit. The CLEP® Financial Accounting test prep assesses the skills tested on the official CLEP® exam. Our comprehensive review chapters cover: accounting principles and ethics; forms of business and cycles; the income statement; the balance sheet; statement of cash flows; investments; contingent liabilities, and more. The book includes two full-length practice tests. Each exam comes with detailed feedback on every question. We don't just say which answers are right—we explain why the other answer choices are wrong—so you can identify your strengths and weaknesses while building your skills. REA is the acknowledged leader in CLEP® preparation, with the most extensive library of CLEP® titles available. Our test preps for CLEP® exams help you earn college credit, save on tuition, and get a college degree.

Study & Master Accounting was developed with the help of practising teachers, and covers all the requirements of the National Curriculum Statement for accounting.

"Common Core Achieve: Mastering Essential Test Readiness Skills is designed to help you learn or strengthen the skills you need when you take your high school equivalency test."--Page v.

A less-expensive grayscale paperback version is available. Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

In response to a congressional request, GAO provided information on the justification for the Office of Personnel Management (OPM) and Office of Management and Budget program to reduce the number of grade 11 thru 15 positions in the General Schedule and General Merit pay systems based on the findings of the Private Sector Survey on Cost Control (Grace Commission) and the Bureau of Labor Statistics. GAO found that the goals of the program are to: (1) reduce approximately 40,000 of these positions over a 4-year period beginning in fiscal year 1985; (2) save about \$1.7 billion; and (3) improve position management in the federal government. Based on the Grace Commission findings, OPM concluded that the federal government has 50 percent more of its work force at higher grades than does the private sector. However, GAO

found that the data used by the Commission may not be representative of the private sector as a whole and failed to include information on the basis of its studies. OPM maintained that no more than 60 percent of the grade increases could be attributed to greater demand caused by increasingly technical and complex work. However, the Congressional Budget Office has reported that about two-thirds of the average grade increases seemed to relate to the changing character of government work. GAO has found that increased grade levels have been caused by: (1) hiring restrictions which have encouraged agencies to hire employees with specialized skills; (2) reductions in force; (3) contracting out for lower grade work; and (4) mission and program changes. Finally, GAO questioned OPM position accuracy surveys as indications that the federal government has a continuing overgrading problem and the use of Bureau of Labor Statistics data to show the occupational distribution of private sector employment. Therefore, while GAO agreed with the program's objective, it questioned the basis of the surveys used.
