Instant New York Times bestseller "Howard Zinn on acid or some bullsh\*t like that." —Tim Heidecker The creators of the cult-hit podcast Chapo Trap House deliver a manifesto for everyone who feels orphaned and alienated—politically, culturally, and economically—by the lanyard-wearing Wall Street centrism of the left and the lizard-brained atavism of the right: there is a better way, the Chapo Way. In a guide that reads like "a weirder, smarter, and deliciously meaner version of The Daily Show's 2004 America (The Book)" (Paste), Chapo Trap House shows you that you don't have to side with either sinking ships. These self-described "assholes from the internet" offer a fully ironic ideology for all who feel politically hopeless and prefer broadsides and tirades to reasoned debate. Learn the "secret" history of the world, politics, media, and everything in-between that THEY don't want you to know and chart a course from our wretched present to a utopian future where one can post in the morning, game in the afternoon, and podcast after dinner without ever becoming a poster, gamer, or podcaster. A book that's "as intellectually serious and analytically original as it is irreverent and funny" (Glenn Greenwald, New York Times bestselling author of No Place to Hide) The Chapo Guide to Revolution features illustrated taxonomies of contemporary liberal and conservative characters, biographies of important thought leaders, "never before seen" drafts of Aaron Sorkin's Newsroom manga, and the ten new laws that govern Chapo Year Zero (everyone gets a dog, billionaires are turned into Soylent, and logic is outlawed). If you're a fan of sacred cows, prisoners being taken, and holds being barred, then this book is NOT for you. However, if you feel disenfranchised from the political and cultural nightmare we're in, then Chapo, let's go...

Loft conversions are one of the most popular types of home alteration and, as this book shows, they can be an enormously useful and stylish addition to a house. If you have not been involved in a building project before, The Complete Loft Conversion Book guides you through the entire process with chapters arranged so that they follow the sequence of events in a real project. Shows how to identify whether your roof space is suitable for conversion and how designers work out ways to make the best use of available space. Using three-dimensional sketches and colour photographs of actual projects, the author illustrates the options for fitting in a staircase and indicates how to estimate the headroom that will be available. Considers the requirements of the local authority planners and building control officers, and provides tips on how to make applications and approvals run smoothly. Presents highly detailed drawings and photographs showing the conversion process. Provides advice on how to avoid cowboy builders and track down the ideal company, how to draw up a fair contract and how to deal with the legal issues that may arise. Supplies checklists and specifications to help monitor progress and ensure that the work is completed to a good standard. A practical, informative book which guides the reader through the entire building project following the sequence of events for a real project. Brimming with useful advice, it contains information not found in other publications. Aimed at all those considering having a loft conversion, those who have made the decision to convert but are still carrying out research and those just about to have work started. Superbly illustrated with 303 colour photographs and highly detailed drawings. Julian Owen MBE is a chartered architect with over twenty years' experience.

An inspiring and practical handbook for everyone who has ever dreamed of renovating or building their own home. An inspirational and practical guide to building exciting, beautiful and extraordinary homes, GRAND DESIGNS AUSTRALIA HANDBOOK is a must-have book for all homeowners, builders, renovators and dreamers. Showcasing the striking homes - from streamlined, sleek modernist homes to rustic country getaways - that appeared in Grand Designs Australia television series 1-3, this book is packed with practical guidance, advice and ideas for people who are considering building or renovating their home. From the initial vision through to the planning, construction and finishing stages, Peter Maddison steps you through the principles and practicalities involved in creating your own dream house. An essential book for anyone and everyone who has ever dreamed of building, renovating or just living in a beautiful, custom-built home.

This is the comprehensive guide to delivering personalisation in health and social care using person centred approaches. It covers what personalisation and person centred approaches are, the different elements involved, and how to carry it out with all those receiving care and support, from people with disabilities to people at the end of life.

This book, written by an experienced self build architect provides practical, step-by-step advice and guidance on how to build your own high quality, stylish home. Aimed at those who aspire to live in a tailor-made home that expresses their own style because existing houses for sale are either too dull or expensive, but who are daunted by the prospect. It dispels the myth that self-built houses either require you to get your hands dirty or result in little more than brick boxes. The Gothic World offers an overview of this popular field whilst also extending critical debate in exciting new directions such as film, politics, fashion, architecture, fine art and cyberculture. Structured around the principles of time, space and

practice, and including a detailed general introduction, the five sections look at: Gothic Histories Gothic Spaces Gothic Readers and Writers Gothic Spectacle Contemporary Impulses. The Gothic World seeks to account for the Gothic as a multi-faceted, multi-dimensional force, as a style, an aesthetic experience and a mode of cultural expression that traverses genres, forms, media, disciplines and national boundaries and creates, indeed, its own 'World'.

Grand Designs provides inspiration and information to anyone thinking of taking on the challenge of building their own house. During the 1990s, architects and designers have increasingly called for us to change our houses to reflect the way we live, exchanging poky kitchens for larger living spaces, having more room than one bathroom, and taking the surrounding environment into our plans. What better way of accommodating such demands than by designing and building your own home, creating a living space suited to your changing lifestyle? This aspirational book not only provides a guide to the series, but it illustrates the increasingly fashionable desire to design and build a home of one's own.

The guide also takes a detailed look at hiking, with two full chapters dedicated to the best day and overnight hikes found in each park.

The mindfulness of carpentry; sourcing and seasoning your timber; tongue and groove, lap and spline; legs, aprons, stretchers and trestles; fox wedges and tenon joints: through his inimitable artistry, wit and individualism, Joel Bird passes on the skills of table making while also expressing the personal journey that accompanies the learning of these skills. Split into four parts--table beginnings, the table top, the table base, and the table finishing--The Table Maker is part meditation and part guide book, and has within its pages the information needed to make a quality table of your own.

This is the first academic book to examine the long running hit series Grand Designs, which occupies a significant place in the popular imagination internationally. The authors apply an empirically grounded, critical perspective to the study of television to reveal how people use the program in their everyday lives. The emphasis on everyday uses and meanings combines creatively with understanding the program theoretically, textually and in terms of its production structures. This position challenges framings of the popular lifestyle and factual television genre that has been dominated by a neoliberal or governmentality perspective for many years. Presented by British designer and writer, Kevin McCloud, Grand Designs follows the progress of home owners as they embark on design, renovation and building projects at almost always dizzying scales of endeavour. Understanding the program as both a text to analyse and a site of material impact, the book draws on interviews with production members, home renovators, building practitioners and audiences, as well as references to associated media formats to provide contextual depth to the analysis. The authors argue that, as a cultural object, the program is both shaped by and enacts social discourses of home-making, design value and taste. Navigating public, commercial and promotional logics, Grand Designs sparks new forms of cultural production and consumer markets.

"Blows the lid on so many TV secrets" Tom Archer, Controller Factual, BBC "If every first-time producer read this before pitching a program, I guarantee a greater success rate" Gary Lico, President/CEO, CABLEready, USA In recent years there has been an explosion of broadcast and cable channels with a desperate need for original factual/reality programming to fill their schedules: -documentaries, observational series, makeover formats, reality competitions. Yet television executives receive a daily avalanche of inappropriate pitches from pushy, badly prepared producers. Only 1 in 100 proposals are considered worth a second look, and most commissioners never read past the first paragraph. Greenlit explains how to develop, research, pitch and sell your idea for any type of factual or reality television show. It gives the inside track on: \* What channel executives are really looking for in a pitch, \* The life stories of hit factual shows such as

The Apprentice, Deadliest Catch and Strictly Come Dancing \* Advice from channel commissioners, development producers and on-screen talent on both sides of the Atlantic. \* Eleven steps that will increase your chance of winning a commission In a rapidly expanding TV market, Greenlit is packed with resource lists, sample proposals, case studies and exercises designed to boost your skills and develop commission-winning proposals.

In the last thirty years of his life Albert Einstein searched for a unified theory - a theory which could describe all the forces of nature in a single framework. But the time was not right for such a discovery in Einstein's day. Neither was the time right when, in 1988, Professor Stephen Hawking wrote A Brief History of Time in which he took us on a journey through classical physics, Einstein's theory of relativity, quantum physics and string theory in order to explain the universe that we live in. He concluded, like Einstein, that science may soon arrive at the long sought after 'Theory of Everything'. In this groundbreaking new work, Professor Hawking and renowned science writer Leonard Mlodinow have drawn on forty years of Hawking's own research and a recent series of extraordinary astronomical observations and theoretical breakthroughs to reveal an original and controversial theory. They convincingly argue that scientific obsession with formulating a single new model may be misplaced, and that by synthesising existing theories we may discover the key to finally understanding the universe's deepest mysteries. Written with the clarity and lively style for which Hawking is famous, The Grand Design is an account of Hawking's quest to fuse these different strands of scientific theory. It examines the differences between past and future, explains the nature of reality and asks an all-important question: How far can we go in our search for understanding and knowledge?

Who were the first Britons, and what sort of world did they occupy? In A History of Ancient Britain, much-loved historian Neil Oliver turns a spotlight on the very beginnings of the story of Britain; on the first people to occupy these islands and their battle for survival. There has been human habitation in Britain, regularly interrupted by Ice Ages, for the best part of a million years. The last retreat of the glaciers 12,000 years ago brought a new and warmer age and with it, one of the greatest tsunamis recorded on Earth which struck the north-east of Britain, devastating the population and flooding the low-lying plains of what is now the North Sea. The resulting island became, in time, home to a diverse range of cultures and peoples who have left behind them some of the most extraordinary and enigmatic monuments in the world. Through what is revealed by the artefacts of the past, Neil Oliver weaves the epic story - half a million years of human history up to the departure of the Roman Empire in the Fifth Century AD. It was a period which accounts for more than ninety-nine per cent of humankind's presence on these islands. It is the real story of Britain and of her people.

Don't simply show your data—tell a story with it! Storytelling with Data teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. Art Savvy is a systematic approach to understanding art. It gives you methods to assess a design and really see what the artist was doing. Unlike chaotic art writings, terms are clearly defined, categorized, organized and illustrated. It is designed to answer questions like: What things will allow me to understand art? What are the basic elements? What is concept art? Can you "read" a work of abstract art? Visual literacy is the ability to interpret, negotiate, and make meaning from information presented in art work. Art Savvy gives you this. Defining Terms: Often art terms are not clearly defined, are used interchangeably or get mixed up with other types of analysis. For a thorough exploration of all aspects of art, photos of great works are referenced with color keyed notations to illustrate the 5 easy pieces: 1. Design Elements- Visual grammar, line, shape, form, mass etc. - definitions & how to see them. 2. Organization Principles- How elements are arranged and how this effects the concept. 3. Style- Relation to other groups of work and formulas for design. 4. Technique- How methods and materials are used to impact the concept. 5. Concept- What this piece about. What major themes and elements were used. Assessment techniques in each section of Art Savvy will train your eye to always see these 5 aspects of any artwork. It is not attempting judgments of relevance, philosophy, spiritual meanings and other ethereal aspects that a work may convey. This text poses the question: "What is the basic concept here?" but sticks to pure analysis and leaves all judgment to you and the experts. This field guide is a mini textbook on design principles that will let you understand art!

The novel begins as Arella prepares for 2000 and the fresh start it represents. More at home in cyberspace than anywhere she has actually lived, she reinvents herself and her life story for readers of a multimedia web diary she calls \*Arella's Repertoire,\* a blend of memoir, travelogue, and blog. Characters who star in this virtual drama recapture worlds Arella has known and weave together the memories, dreams, and imaginings that have contributed to her development as a woman and a writer in postmodern America. Framed as an online text that she posts incrementally throughout the month of December 1999, the narrative explores personal and cultural memory. \*Arella's Repertoire\* forms part of a quartet that also includes two works of nonfiction, \*Video-Graphic Alchemy: Transforming "Dear Diary"\* and \*VirtualDayz: Remediated Visions & Digital Memories,\* and another fictional text, \*Vagabond Scribe (Leah's Backstory).\*

Is my child too sick to go to daycare today? When can my child go back to daycare? What should I look for when I am considering a daycare center for my new baby? Every parent of a child in daycare asks these questions. Dr. Leigh Grossman's new book, THE PARENT'S SURVIVAL GUIDE TO DAYCARE INFECTIONS, presents the facts about different germs and provides guidance on what to do when your child has been exposed to or is sick with a specific infection. How do I choose a daycare center that uses current infection control practices? How long does a child need to stay home when they do have an infection? Can I prevent infection in my child? What are the appropriate and inappropriate uses of antibiotics? What are the best practices for treating a specific childhood infection? Designed to be the home reference book for parents of young children in daycare and preschool, THE PARENT'S SURVIVAL GUIDE TO DAYCARE INFECTIONS is a comprehensive and clear book, with an easy-to-use format, informational quick reference tables, and a detailed index. Providing up-to-date guidance, the book includes contributions from 39 pediatric expert physicians. With chapters on most of the infections that parents of children in daycare and preschool encounter, the authors explain what the illness is, how the infection is spread, how the illness is diagnosed, how long it lasts and how long the child needs to stay at home. This book is a ready reference for the children in your life and an excellent gift for the new parent. This press guide aims to provide a comprehensive, accurate and informative guide to the UK press, both print and broadcast.
