The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor is In*, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right *The Professor Is In* addresses all of these issues, and many more.

Competition for research funds in epidemiology, preventative medicine, and biostatistics has never been more intense and, at the same time, the grant application and review process at such agencies as the National Institutes of Health (NIH) is undergoing significant transformation. Writing Dissertation and Grant Proposals:

Epidemiology, Preventive Medicine and Biostatistics targets effective grant proposal writing in this highly competitive and evolving environment. Covering all aspects of the proposal writing process, the text: Provides summary checklists and step-by-step guidelines for grant structure and style alongside broader strategies for developing a research funding portfolio Explains how to avoid common errors and pitfalls, supplying critical do's and don'ts that aid in writing solid grant proposals Demonstrates proven tactics and illustrates key concepts with extensive examples from successfully funded proposals Written by an established NIH reviewer with inside knowledge and an impressive track record of funding, *Writing Dissertation and Grant Proposals: Epidemiology, Preventive Medicine and Biostatistics* is a virtual cookbook of the appropriate ingredients needed to construct a winning grant proposal. Therefore, the text is not only relevant for early-stage investigators including graduate students, medical students/residents, and postdoctoral fellows, but also valuable for experienced faculty, clinicians, epidemiologists, and health professionals who cannot seem to break the barrier to obtain NIH-funded research.

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Grant funding has become increasingly crucial to universities and university faculty, even as government and private funding reductions and increased application pools result in a more and more competitive environment. Securing the funding which is available is not a simple process, and institutional support for faculty who seek grants is uneven, where it exists at all. Faculty members are often left to navigate their own ways through the shifting landscape of the grants maze. When added on top of teaching and service loads, it is no surprise that many faculty members either avoid seeking grants altogether or produce grant proposals which have little or no chance of being funded. Faculty need a guide, and this book is that guide. Written by a team of successful grant writers, *Grant Seeking in Higher Education* orients faculty to the grants culture and walks readers step-by-step through the entire grant-seeking process, from identifying sources to preparing a successful application to administering the funds after the grant is awarded. The grant-seeking toolkit which is free online to purchasers of the book for

you to download or print and use in your work includes standard forms, templates, and timelines for proposal development so any faculty member, from the scientist to the humanities scholar, can be sure not to miss out on the funding they deserve.

A game-changing book about the revolutionary potential of working from home, by two experts who work -- and live -- together. When the COVID-19 pandemic closed offices around the world, sending millions into makeshift home offices, it was a forced compromise made under duress. But 2020 taught us that there may be another way to work: one that doesn't involve hellish commutes and set schedules that no longer make sense, especially for companies with international reach. While working from home can make people happier and make companies more productive, it has its pitfalls. Doing it well takes some thought. *Out of Office* combines Charlie and Anne's first-person experiences of moving to a rural area and working remotely -- for years before the pandemic hit -- to demonstrate how workers everywhere can find new ways of working anywhere.

Writing high quality grant applications is easier when you know how research funding agencies work and how your proposal is treated in the decision-making process. *The Research Funding Toolkit* provides this knowledge and teaches you the necessary skills to write high quality grant applications. A complex set of factors determine whether research projects win grants. This handbook helps you understand these factors and then face and overcome your personal barriers to research grant success. The guidance also extends to real-world challenges of grant-writing, such as obtaining the right feedback, dealing effectively with your employer and partner institutions, and making multiple applications efficiently. There are many sources that will tell you what a fundable research grant application looks like. Very few help you learn the skills you need to write one. *The Toolkit* fills this gap with detailed advice on creating and

testing applications that are readable, understandable and convincing.

"Grant writing requires practice, but it can have a dramatic impact on an organization's funding for years at a time. The purpose of this book is to help you to feel more confident in your ability to write successful proposals. Mary Gladstone-Highland, Certified Fund Raising Executive and Founder of Spark Group LLC, a non-profit consulting firm, shared the tips and tricks that she has picked up throughout her career to help you avoid the common mistakes that new grant writers often make. With this workbook she encourages you to ask the right questions, hand-holds you through practical exercises, and offers a map that includes paths to develop strategic relationships with funders."--Page 4 of cover.

This fully updated and revised edition of a classic guide to grant writing for health and human service professionals reflects the two major changes in the field: new NIH application processes and an increased emphasis on interprofessional and team approaches to science. New case examples reflect grant writing strategies for a great variety of health and human service professions, and the text includes an enhanced focus on online methods for organizing grant submissions. A new section on special considerations for submitting grants addresses specific types of research including community-based participatory research, mixed methods, behavioral intervention research, and dissertation and , mentorship proposals. The new chapter on common writing challenges and solutions provides examples of strong and weak statements and highlights the importance of writing with precision. Additionally, this new edition provides an expanded section on post-award requirements and links to NIH videos about grant writing. Written for individuals in both academic and practice settings, the guide addresses, step-by-step, the fundamental principles for effectively securing funding. It is the only book to provide grant-writing information that encompasses many disciplines and to focus on building a research career with grant writing as a step-by-step process. It provides detailed, time-tested strategies for building an investigative team, highlights the challenges of collaboration, and describes how to determine the expertise needed for a team and the roles of co-investigators. The book addresses the needs of both novice and more experienced researchers. New to the Fourth Edition: Reflects recent changes to the field including an emphasis on interprofessional approaches to science and new NIH application processes Offers additional case examples relevant to social work, nursing, psychology, rehabilitation, and occupational, physical, and speech therapies Provides links to NIH websites containing videos on grant writing Includes chapter opener objectives Expands section on post-award requirements Focuses on electronic mechanisms for organizing grant submissions

This book is designed to help researchers achieve success in funding their National Science Foundation (NSF) research proposals. The book discusses aspects of the proposal submission and review process that are not typically communicated to the research community. Written by authors with successful track records in grant writing and years of experience as NSF Program Directors, this book provides an insider's view of successful grantsmanship. Written in a practical approach, this book offers tips that will not be found in official paperwork and provides answers to questions frequently asked of NSF Program Directors. The purpose of the book is to improve your NSF grant-writing skills and improve your chances of funding.

A guide to writing grant proposals tailored specifically to a donor's interests, complete with step-by-step instructions and samples of winning proposals. In grant-seeking, words can go where the applicant can't—the foundation boardroom, the corporation's headquarters—so it's important to use them as the strategic, powerful tools that they are. This book shows readers how to find, frame, and use words effectively to make the case for any organization and its projects. Readers are provided the tools for crafting a grant proposal that speaks directly to the funder's interests. Grant-seekers will learn: ? How to find out which funders fit their project exactly ? Strategies for figuring out what each grant-maker is looking for ? Critical tips for crafting attention-grabbing proposals Koch shows readers how to write with a point of view that is geared to the funder's interests and goals, while remaining true to the project. Packed with examples of winning proposals, and strategies for using words to inspire and convince, this is the must-have resource for any grant-seeker hoping to stand apart from the crowd.
