This workbook is designed for use with the Graphic Communications: Digital Design and Print Essentials textbook. The workbook questions, illustrations, and activities are provided to help you assess your knowledge of the material contained in each chapter of the textbook. The exercises serve as a thorough guide for study and will help you improve your understanding of the graphic communications industry, the processes involved in graphic production, and the various forms of printing technology that are changing the industry. This book has basic contact information for the trades

and technical skills including apprenticeship programs and job websites. I cover community colleges and vocational schools in book #2. The trades are really big because they're always there regardless of what high-tech industries come and go. Whenever I go jogging, I always see the plumbing trucks, the electrical trucks, the contractor trucks, the carpet cleaners, window installers, etc. No matter what happens, people always need those basic services. I looked around for an indepth vocational-trades book. I couldn't find one. Here is my attempt at a good comprehensive vocational trades book. Even in the trades, be very wary about what you decide to go to school for. I've had friends spend a few years taking a certain vocational program like electronic technician or computer tech only to end up not being able to find a job in their field.

According to the National Collaborative Workforce and Disability for Youth (NCWD/Youth), the development of soft skills is identified as a critical component for success in activities such as civic participation and youth

leadership in addition to school- and work-based learning experiences. Companies have identified the following competencies as key to success of young workers: Communication; Networking; Enthusiasm and Attitude; Teamwork; Problem Solving and Critical Thinking; Professionalism. Activities that can be found in this publication were created to provide an introduction to the "basics" of soft skills. These materials have been designed with youth service professionals in mind -specifically those working with in-school and out-of-school youth, ages 14-21, on career and workforce readiness skills. Many of the exercises within this resource offer timed activities with directions for specific-workplace scenarios. Some of these activities include several interview role-play situations, plus lessons about a resilient attitude and understanding directions, to networking, plus social media, and email etiquette tips for professional work settings. With each activity, the text allows for extension activities, and journaling activities which are elements of common core principles taught in America's public school system today. Some of the exercises also present follow-up questions with spaces provided for answers as part of hands-on learning lessons. These activities can be used by a facilitator within a school's career and technology center, or a faith-based career search program, and by youth ages, 14-21 that are eager to find a paid position.
