Allow me to blast a ray of sunshine through the murky clouds hovering over advertising agencies and marketing departments alike. If you've got talent, I can keep you from rolling an embarrassing string of gutter balls. Chew With Your Mind Open is here to make it make sense to the degree that advertising ever will. The politics. The personalities. The nonstop problems in need of smart and effective solutions. I was lucky. I had a great thinker in my corner for over two decades. A rock-solid, real-live 24/7 mentor. My father, Guy Day, knew the advertising racket well and was no stranger to remarkable creative work. He co-founded Chiat/Day as a writer and was the agency's president, twice. My dad helped inspire some of the best advertising of the 20th century, Apple's "1984" Super Bowl spot for example. He also inspired me. What my father gave me, is what I'm now ready to give you. Just enough big-picture guidance to be dangerous. My advice can keep you from falling into unproductive time-sucks and sinking in conceptual quicksand. I'll help you avoid the chronic wallowing, unneeded politicking, and blame game that's all too common in the business. I'll help you develop good habits that will serve you well in the worst of times. Throughout my book, I'll share how I got -- and still get -- my best thinking through the gauntlet without collecting a huge assortment of knives in my back. Granted, a few of them will be unavoidable. I'll address that part, too. My knowledge comes from real-life experiences, and my book is broken down by subject and is served one easily digestible nugget at a time. Sometimes my experiences are funny, other times embarrassing, but they always reveal an underlying truth and a learning opportunity that could spare you some scar tissue. Along the way, readers will be in the room with me as I present work, defend it, debate clients, and push the best thinking forward.

to be precise has vanished from our culture, and in writing of every kind we see a trend towards more--more speed and more information but far less clarity. Evans provides practical examples of how editing and rewriting can make for better communication, even in the digital age. **DO I MAKE MYSELF CLEAR?** is an essential text, and one that will provide every writer an editor at his shoulder.

Free Is BadAlmost everything we consume online is free. Email, search, news, entertainment. But those apps on our

phones aren't really free-so if we're not paying, who is? The surveillance marketing industry is. We give them our personal data and let them chase us around the web with ads. In exchange we get cat memes, news and constant updates from our friends. It doesn't have to be this way. Web pioneers tried to build a system where consumers paid creators. Early developers desperately tried to build businesses that ran on sales. Believe it or not, Google's founders were dead set against advertising-for fear it would compromise the quality of their own search results. Yet here we are. Why? Because of the misguided belief that, "Information wants to be free," which is codified deep in our behavior. It started way back in the early days of the republic, evolved with newspapers, radio and broadcast TV, and persists today online. In *Free Is Bad*, digital marketing entrepreneur John Marshall explores the web industry's early history and its search for viable business models. It's an investigation of how an evolutionary accident in the design of the web resulted in the ad-tech industry, enabling "free" as the default model for technology products like search and email, and for media products like news and entertainment. He examines how this made us into the product being bought and sold in the marketplace, and why that hurts the quality of our information and discourse. And he offers a hopeful overview of how the web is slowly clawing its way back to respectability through new, people-first business models. *Free Is Bad* also serves as a guide to how, in the meantime, we can modify our behavior online right now, to better protect ourselves and our privacy. It reimagines our relationship with quality online services, media, and information: A relationship that makes us the customer, not the product. It's not codified in the conviction that, "Information wants to be free." It's rooted in a new belief. The belief that *Free Is Bad*.

LinkedIn is one of the most misunderstood and powerful social platforms on the internet. I'm going to show you how to use LinkedIn to build relationships with executives and get job offers without having to fill out a job application. We all know that the hiring system is broken. Human Resources and Recruiters are the bottlenecks for job-seekers who only want to talk to one person: The hiring manager. The hiring manager has one goal and one goal only: To hire the best candidate as soon as possible. But, there's a small problem. Hiring isn't easy. Companies don't know if they're hiring the next Steve Jobs or someone who is going to quit within three months of joining the company. However, there is one thing that all businesses, big or small, all agree on. The best candidates come from referrals from their employees. Candidates who get referred from an employee are not only faster and cheaper to hire; they stay longer and have proven to be more successful in their career in the long term.

They protect themselves by researching anonymously and not revealing themselves to us until their decision is made. That means that as sellers and marketers, we've lost our opportunity to influence the buying journey—that is, if we're still clinging to the traditional lead-based tools and strategies that we're used to. It's time for a new paradigm. Pioneering CMO Latané Conant delivers a step-by-step guide that will transform the way you think about marketing and selling in the modern age. Latané lays out exactly how to enable your sales and marketing teams to take pride in the customer experience and finally align on how to put your prospects at the center of everything you do. In doing that, you'll learn to uncover customer demand, prioritize which accounts to work, engage the entire customer buying team, and measure real success. With this customer-first approach, you'll be able to confidently take down the forms, stop sending bulk emails, and quit making cold calls—and achieve breakthrough results.
