In 1805 three little girls decided to create a "boys club" because boys have more fun. Their childhood was filled with sword fighting, horse racing, and archery. Now in 1815 they are all grown up and expected to join Society. Who will marry such independent and deadly misses? Trials of Artemis (Regency, Hot) Loving Lord Lucifer... An independent bluestocking sneaks into a library to read rare Greek texts and ends up with a husband instead. Jacqueline "Jack" Walters loves archery and Greek military history. In her third season she has failed to inspire so much as one marriage proposal and is planning to settle into the quiet life of a spinster. Gideon Wolfe, Earl of Harrington, has been avoiding marriage but a case of mistaken identity in the library has left him saddled with an argumentative and unwilling fiancée. What readers are saying: "I enjoyed seeing the relationship play out between the two main characters, especially since the author decided to make them both forthright and honest with each other, being able to pick up on emotional cues, instead of relying on misdirection and misinterpretation to lengthen the story, as is usually the case in this genre." "Their characters and their relationship develop at an almost perfect pace as the book progresses (with bumps along the newlywed road, of course). If you like a strong female, this is the book for you."

This fascinating topographical dictionary of London, published in 1891, provides a valuable record of many places now lost to development.

At a summer tea party in Cambridge, England, a lady states that tea poured into milk tastes differently than that of milk poured into tea. Her notion is shouted down by the scientific minds of the group. But one guest, by the name Ronald Aylmer Fisher, proposes to scientifically test the lady's hypothesis. There was no better person to conduct such a test. For Fisher had brought to the field of statistics an emphasis on controlling the methods for obtaining data and the importance of interpretation. He knew that how the data was gathered and applied was as important as the data themselves. In *The Lady Tasting Tea*, readers will encounter not only Ronald Fisher's theories (and their repercussions), but the ideas of dozens of men and women whose revolutionary work affects our everyday lives. Writing with verve and wit, author David Salsburg traces the rise and fall of Karl Pearson's theories, explores W. Edwards Deming's statistical methods of quality control (which rebuilt postwar Japan's economy), and relates the story of Stella Cunliff's early work on the capacity of small beer casks at the Guinness brewing factory. *The Lady Tasting Tea* is not a book of dry facts and figures, but the history of great individuals who dared to look at the world in a new way.
