This collection of new essays explores the many different ways in which Harry Potter has shaped this generation's views on everything from politics to identity to pedagogical spaces online. It seeks to determine how the books have affected fans' understanding of their place in the world and their capacity to create it anew.

Trevor and his friends at the infamous Manhattan BDSM club WhipperSnapper, where everyone calls them the BAD Boys, for “Billionaire Arrogant Doms.” The BAD Boys—Trevor Brooks, Marc Wilde, and Roman Chase—are aptly named; they’ve made money hand over fist due to their aggressive investing at the Brooks Wilde Chase Fund. These guys are so rich they can get away with anything, or so the rumors go. Trevor gives Elisabeth full reign of his estate in Westchester, letting her do as she pleases. He has only two rules. Rule One: she must obey and submit to him while she is living in his house. Rule Two: always answer the blue cell phone. She’s happy to oblige, because being with Trevor makes her want to obey, to love him the way he seems to be falling for her. But Elisabeth’s never been good at being the quiet sub; she’s feisty and gets off on the punishments more than she does by pleasing Trevor. Elizabeth can’t submit to Trevor the way he needs her to, so his friend and business partner (and fellow BAD Boy) Roman takes her in hand. But love triangles can have sharp edges...and somebody’s bound to get hurt. Jaime Gallagher was nothing like the son his father wanted. The two had spent years at odds, but a chance desire to see his father’s pet project on the mysterious island Sir Ian Gallagher owned brought Jaime into the middle of chaos. Jaime is imprisoned, kept captive as the new leaders of the island decide his fate. While awaiting their decision, he chooses to live out a fantasy—one where he would give himself to one of the

In recent years numerous films, television series, comic books, graphic novels and video games have featured time travel narratives, with characters jumping backward, forward and laterally through time. No rules govern time travel in these stories. Some characters move by machine, some by magic, others by unexplained means. Sometime travelers can alter the timeline, while others are prevented from causing temporal aberrations. The fluid forms of imagined time travel have fascinated audiences and prompted debate since at least the 19th century. What is behind our fascination with time travel? What does it mean to be out of one's own era? How do different media tell these stories and what does this reveal about the media's relationship to time? This collection of new essays—the first to address time travel across a range of media—answers these questions by locating time travel narratives within their cultural, historical and philosophical contexts. Texts discussed include Doctor Who, The Terminator, The Georgian House, Save the Date, Back to the Future, Inception, Source Code and others.

After the first Euro-American settlers arrived in Seattle in the 1850s, the surrounding old-growth forests were rapidly harvested for lumber, causing environmental degradation and displacing native peoples. Conflicts about the future of Pacific Northwest forests have continued since then. growth forests, wildlife, streams, and fish, as well as providing environmentally friendly forest products. Practicing sustainable forestry, maintaining healthy forests that are less susceptible to fire, insects and diseases; and fostering public enjoyment are now the main goals of forest management. However, conflicts still exist—and with climate change a looming threat, it is important to realize that forests give us much more than lumber. Robert L. Edmonds, professor emeritus at the School of Environmental and Forest Sciences, University of Washington (UW), wrote this book to bring attention to the sustainability of natural resources. He describes how Washington State's forests and the practice of forestry have changed through time and how these changes relate to the long history of research and teaching at the UW. Its scope extends beyond Washington—many of the principles of sustainable forestry developed by faculty have been adopted worldwide.

Sixty-five million years ago, a disastrous cataclysm eliminated three quarters of all life on Earth. Overnight, the age of dinosaurs ended. The age of mammals had begun. But what if history had happened differently? What if the reptiles had survived to evolve intelligent life? In *West of Eden*, bestselling author Harry Harrison has created a rich, dramatic saga of a world where the descendents of the dinosaurs struggled with a clan of humans in a battle for survival. Here is the story of Kerrick, a young hunter who grows to manhood among the dinosaurs, escaping at last to rejoin his own kind. His knowledge of their strange customs makes him the humans' leader...and the dinosaurs' greatest enemy. Rivalling Frank Herbert's *Dune* in the majesty of its scope and conception, *West of Eden* is a monumental epic of love and savagery, bravery and hope. E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a–520a) to compare "the effect of education (???????) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b–509c) and the analogy of the divided line (509d–511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d–534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality.

In the 1970s, the behavioral psychologist Herbert S. Terrace led a remarkable experiment to see if a chimpanzee could be taught to use language. A young ape, named “Nim Chimpsky” in a nod to the linguist whose theories Terrace challenged, was raised by a family in New York and instructed in American Sign Language. Initially, Terrace thought that Nim could create sentences but later discovered that Nim’s teachers inadvertently cued his signing. Terrace concluded that Project Nim failed—not because Nim couldn’t create sentences but because he couldn’t even learn words. Language is a uniquely human quality, and attempting to find it in animals is wishful thinking at best. The failure of Project Nim meant we were no closer to understanding where language comes from. In this book, Terrace revisits Project Nim to offer a novel view of the origins of human language. In contrast to both Noam Chomsky and his critics, Terrace contends that words, as much as grammar, are the cornerstones of language. Retracing human evolution and developmental psychology, he shows that nonverbal interaction is the foundation of infant language acquisition, leading up to a child’s first words. By placing words and conversation before grammar, we can, for the first time, account for the evolutionary basis of language. Terrace argues that

this theory explains Nim's inability to acquire words and, more broadly, the differences between human and animal communication. Why Chimpanzees Can't Learn Language and Only Humans Can is a masterful statement of the nature of language and what it means to be human.

It is said the Kairos has never lived a quiet life, but when the ancient gods conspired to block his memories, he could live a relatively normal life, most of the time. Such a thing had to be done with great care because there would be times when he would need to remember himself as the Kairos, the Traveler in Time, the Watcher over History. In those times, the memory block was designed to come down, but even the gods could only hope it did not come down too fast or all at once. A sudden influx of memories from so many past and future lifetimes might be incapacitating, and that might prove disastrous for humanity and for history. When Glen, the Storyteller, is attacked by the alien Vordan, disaster is what everyone expects. His mind and memories as well as his body need to move fast to meet this threat to the future of the human race. He is in danger of being overwhelmed with memories until he finds a release valve for the pressure. He tells stories of his past, of times earlier in his life when the memory block came down and he had to deal with whatever threatening situation presented itself. Invasion of Memories tells 9 tales of the

Storyteller from Nursery School to well into adulthood. It is a journey from New Jersey, to Ireland and Vienna, to Virginia and New York City, and to the ships at sea. And all the while, Glen is trying to stop a Vordan invasion that history (the future) does not remember - one that never happened. But there are serious problems here. There are layers of trouble and Glen, with the help of the Men in Black, and Alice, an innocent lawyer drafted into the middle of it all, have to dig deep to uncover the whole story and find a solution. Glen knows these local Vordan could not have come to Earth without help. It isn't the pilot fish that he must find and contend with, it is the shark. Invasion of Memories ends where the Avalon series begins. The Men in Black recover Lincoln, once held captive by the Vordan, but Lincoln's wife Alexis is still missing and he is desperate to find her. The Kairos turns his mind from alien intruders to a missing woman and determines she is lost somewhere in time. Look for Avalon, the Pilot episode, available now for 99 cents, a science fiction-fantasy, time travel adventure aimed at that sweet spot where all good television belongs - where the improbable becomes possible and the impossible becomes probable. Also look for Avalon, Season One - 13 episodes of magic and mayhem, cavemen and space aliens, kidnappers and other ghouls, demons and monsters, all of whom stand in the way of the travelers from Avalon who only want to get through
