Autobiography of the most successful driver in Australian motorsport history He is the most successful driver in Australian motorsport history. One of the icons of the sport, ultimately a Holden hero after starting his career with Nissan: but there is much more to Mark Skaife than just that. Move past the numbers – more touring car round wins than any other driver, equal to the best in touring car titles, five Bathurst wins, three Australian Drivers' Championships and numerous other accolades – and you'll find a driver with a deeply entrenched popularity in the sport. This is Mark's story in his own words, from before the time the motorsport bug first bit to the final days of his time with HRT and the desire to keep racing at Bathurst. He talks about the level of commitment he put in to become the very best while some of those around him tell how this changed the face of the sport in this country. Find out what motivated him to dominate. How teams he was involved with twice forced the rules to be changed to give others a chance. What he loved about the sport and what he misses today. But also discover the other Mark Skaife. An accomplished businessman with runs on the board, a family man devoted to his three children, a road safety advocate and much more. This is the only place you will read the true story of Mark Skaife and all that has gone on around him.

"60 Years of Holden" builds on the success of its predecessors (45 and 50 Years of Holden), bringing together vast amounts of technical information and specifications on the 100 model series that Holden has produced since it began manufacturing. Beginning with Holden's pre-1948 history, this book charts Holden's course in Australia, with

This official book captures the amazing history of Larry Perkins' famous team via the histories of its individual race cars. The book follows on from the sold-out release by the same production house in 2017 documenting the history of every Holden Racing Team race car and the follow up sell-out in 2020 covering the history of all of Dick Johnson Racing's cars. Perkins Engineering built more than 50 Commodore race cars for both its own racing program and privateer customers as well as more than 200 engines for touring cars, AUSCAR, Formula Holden, road car and boat use. All of these Perkins-built cars will be covered in full including never-before-published insights and photographs to feature and Perkins Engineering's official records used to help compile the ultimate history book. The exciting new release will start with Perkins' first ENZED Commodore Group A VK built in 1986, include the histories of the three Bathurst-winning Castrol Commodores that conquered the Mountain in the 1990s and end with the last Jack Daniel's Commodore VE. It features Commodore models including VK, VL Group A SS, VL Group A SV, VN, VP, VR, VS, VT, VX, VY, VZ and VE and includes all of the iconic Perkins Castrol and Jack Daniel's race cars as well as the wide range of privateer cars built by Perkins Engineering. Each car's racing history is presented in a stunning layout along with a special focus placed on each car's performances in 'The Great Race' at Bathurst. This hardcover book will be produced in an exclusive limited-edition print run and each copy will come individually numbered and hand-signed by Larry Perkins, making it not only an official historic resource but a truly special collectable item. Australian-made and printed in Australia via green printing methods, this book is a must-have for the collection of any Larry Perkins, Perkins Engineering, Holden, Bathurst, motorsport, motoring or automotive enthusiast. Scheduled for release in October/November 2021, this book can't be missed.

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Na de dood van zijn ouders woont Harry Potter in de bezemkast bij zijn zeer onvriendelijke tante en oom. Op zijn elfde hoort hij dat hij een tovenaars is. Dat verandert zijn hele leven. Vanaf ca. 11 jaar.

This offers honest and largely unedited glimpses into the world of social work of 40 years or so ago. Illustrated by the professional practice of one Colin Millwood, an enthusiastic but otherwise green social worker, it coincides with the early beginnings of his arrival at his local Social Services Department.

This first book of its kind tells the behind-the-scenes story of the incredibly illegal Cannonball rally. This best seller is now available in paperback! In the early 1970s, Brock Yates, senior editor of Car and Driver Magazine, created the now infamous Cannonball Sea-to-Shining-Sea Memorial Trophy Dash; a flat out, no-holds-barred race from New York City to Redondo Beach, California. Setting out to prove that well trained drivers could safely navigate the American highways at speeds in excess of the posted limits, Mr. Yates created a spectacle reminiscent of the glory days of the barnstorming pilots. Filled with fascinating unpublished stories, nostalgic and modern-day photographs, inside information and hilarious stories from this outrageous and incredibly immoral rally. Brock is one of the best-known, most respected automotive journalists in the world today.

A find for every Holden V8 owner and enthusiast, this book shows you how to identify different versions and parts. A comprehensive section illustrates disassembly and rebuild procedures. Other chapters are devoted to modifications for enhanced performance.

The General Motors G-Body is one of the manufacturer's most popular chassis, and includes cars such as Chevrolet Malibu, Monte Carlo, and El Camino; the Buick Regal, Grand National, and GNX; the Oldsmobile Cutlass Supreme; the Pontiac Grand Prix, and more. This traditional and affordable front engine/rear-wheel-drive design lends itself to common upgrades and modifications for a wide range of high-performance applications, from drag racing to road racing. Many of the vehicles GM produced using this chassis were powered by V-8 engines, and others had popular turbocharged V-6 configurations. Some of the special-edition vehicles were outfitted with exclusive performance upgrades, which can be easily adapted to other G-Body vehicles. Knowing which vehicles were equipped with which options, and how to best incorporate all the best-possible equipment is thoroughly covered in this book. A solid collection of upgrades including brakes, suspension, and the installation of GM's most popular modern engine-the LS-Series V-8-are all covered in great detail. The aftermarket support for this chassis is huge, and the interchangeability and affordability are a big reason for its popularity. It's the last mass-produced V-8/rear-drive chassis that enthusiasts can afford and readily modify. There is also great information for use when shopping for a G-Body, including what areas to be aware of or check for possible corrosion, what options to look for and what should be avoided. No other book on the performance aspects of a GM G-Body has been published until now, and this book will serve as the bible to G-Body enthusiasts for years to come.

This work considers the role of local government in 13 EU Member States (Austria, Belgium, Czech Republic, France, Germany, Greece, Hungary, Italy, Netherlands, Poland, Spain,

Sweden and the United Kingdom. The book aims to provide an account of the system of local government in each of the countries studied along with a critical and contextual approach to the level of autonomy that local government enjoys. The approach is comparative, based on a questionnaire which all of the authors considered. There is then a detailed conclusion to the book which offers a detailed summary and comparative analysis of the responses in order to better consider the role of local authorities as the 'fourth level' of governance in the EU. The book aims to offer a detailed introduction to and account of each system of local government which may appeal to those seeking an overview of the area, but also a critical and contextual approach that will be of interest to those actively researching in the areas of local and regional government or EU-central-local government relations. The book contains details of reform in local government up to November 2012, including an analysis of the impact of austerity measures on local autonomy where these have become significant.

The ultimate service manuals! Bentley manuals are the only comprehensive, single source of service information and specifications available for BMW cars.
