English language teaching (ELT) has changed dramatically over the past decade in Asia, an area of the world where English is taught as a foreign language, rather than a second language. A drastic movement has been made from the traditional Grammar-Translation Method to more communicative approaches to teaching and learning, such as project-based and task-based learning. In this book, the authors outline the development of ELT in Asia in the past decade in the wider context of educational reform in the region which puts greater value on the acquisition of English and in student-centered classrooms. Given the growing importance of English and the enormous energy and enthusiasm in the region for learning the language in both formal and informal contexts, ELT will continue to flourish. University and secondary school teachers and researchers from five different Asian countries share methodologies and innovative programs that they have found to be successful in their classrooms, including ideas for technology-enhanced language learning. This volume offers insight into the daily academic lives of secondary and university English language classrooms across the region and shows how English is currently being reframed in this vibrant region.

April, 1947. In a run-down farmhouse on a remote Scottish island, George Orwell begins his last and greatest work: *Nineteen Eighty-Four*. Forty-three years old and suffering from the tuberculosis that within three winters will take his life, Orwell comes to see the book as his legacy—the culmination of a career spent fighting to preserve the freedoms which the wars and upheavals of the twentieth century have threatened.

Completing the book is an urgent challenge, a race against death. In this masterful novel, Dennis Glover explores the creation of Orwell's classic work, which for millions of readers worldwide defined the twentieth century, and is now again proving its unnerving relevance. Simultaneously a captivating drama, a unique literary excavation, and an unflinching portrait of a writer, *The Last Man in Europe* will change the way we understand both our enduringly Orwellian times and Nineteen Eighty-Four.

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: *providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and *presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education. Washback in Language Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations.
