King's Daughter is the mesmerizing tale of a woman who must risk everything to hunt down the dangerous man who shaped her past and threatens to steal her future: her father. Helena Pelletier has a loving husband, two beautiful daughters, and a business that fills her days. But she also has a secret: she is the product of an abduction. Her mother was kidnapped as a teenager by her father and kept in a remote cabin in the marshlands of Michigan's Upper Peninsula. Helena, born two years after the abduction, loved her home in nature, and despite her father's sometimes brutal behavior, she loved him, too...until she learned precisely how savage he could be. More than twenty years later, she has buried her past so soundly that even her husband doesn't know the truth. But now her father has killed two guards, escaped from prison, and disappeared into the marsh. The police begin a manhunt, but Helena knows they don't stand a chance. Knows that only one person has the skills to find the survivalist the world calls the Marsh King—because only one person was ever trained by him: his daughter. A Michigan Notable Book!

The dot.com crash of 2000 was a wake-up call, and told us that the Web has far to go before achieving the acceptance predicted for it in '95. A large part of what is missing is quality; a primary component of the missing quality is usability. The Web is not nearly as easy to use as it needs to be for the average person to rely on it for everyday information, commerce, and entertainment. In response to strong feedback from readers of GUI BLOOPERS calling for a book devoted exclusively to Web design bloopers, Jeff Johnson calls attention to the most frequently occurring and annoying design bloopers from real web sites he has worked on or researched. Not just a critique of these bloopers and their sites, this book shows how to correct or avoid the blooper and gives a detailed analysis of each design problem. Hear Jeff Johnson's interview podcast on software and website usability at the University of Canterbury (25 min.)

Discusses in detail 60 of the most common and critical web design mistakes, along with the solutions, challenges, and tradeoffs associated with them. Covers important subject areas such as: content, task-support, navigation, forms, searches, writing, link appearance, and graphic design and layout. Organized and formatted based on the results of its own usability test performed

The author Greg J. Delle has not yet completed his lifetime study of natural humanity and manipulated governed humanity. He and his childhood giraffe friend (Niqynu) travel back through time to when Delle was one year old, to the present, and to the future. Delle depicts how our great inventors, writers, and a host of gifted legends became successful. Despite a system of scarce schooling and

academics, they still prevailed. Delle compares this with current academic standards and how academics can affect a child's creativity. He asks what good are competition and the disease of believing you have to be number one. The twelve hours a day of study and homework a child has – does it teach each and every child to be better than one another? Instead, it would be better to have schools that teach parenting and help people respect and be polite to one another. Delle and Niqynu study the history of religion and how it has affected and continues to affect modern civilization. Of course, God is energy shared by everyone. Delle and Niqynu studied the laws of the Bible, modern school bureaucracy, and the government system - its laws, rules, regulations, fines, penalties, and restrictions. This arduous squeezing system comes down on parents and poor people, to force their children to fit the modern moral mold. Delle and Niqynu question the behavior of adolescents and adults. The rule of sexual societal behavior needs to be set free. Delle and Niqynu never stop asking questions because it is their destiny to help prevent child abuse. Just look at all of the mental and physically abused children. His questions are still unanswered. Come and join them on their quest.

Author Steve Souders, in his job as Chief Performance Yahoo!, collected these best practices while optimizing some of the most-visited pages on the Web. Even sites that had already been highly optimized, such as Yahoo! Search and the Yahoo! Front Page, were able to benefit from these surprisingly simple performance guidelines. The rules in High Performance Web Sites explain how you can optimize the performance of the Ajax, CSS, JavaScript, Flash, and images that you've already built into your site -- adjustments that are critical for any rich web application. Other sources of information pay a lot of attention to tuning web servers, databases, and hardware, but the bulk of display time is taken up on the browser side and by the communication between server and browser. High Performance Web Sites covers every aspect of that process. Each performance rule is supported by specific examples, and code snippets are available on the book's companion web site. The rules include how to: Make Fewer HTTP Requests Use a Content Delivery Network Add an Expires Header Gzip Components Put Stylesheets at the Top Put Scripts at the Bottom Avoid CSS Expressions Make JavaScript and CSS External Reduce DNS Lookups Minify JavaScript Avoid Redirects Remove Duplicates Scripts Configure ETags Make Ajax Cacheable If you're building pages for high traffic destinations and want to optimize the experience of

The essays in *Tracing the Autobiographical* work with the literatures of several nations to reveal the intersections of broad agendas (for example, national ones) with the personal, the private, and the individual. Attending to ethics, exile, tyranny, and hope, the contributors listen for echoes and murmurs as well as authoritative declarations. They also watch for the appearance of auto/biography in unexpected places, tracing patterns from materials that have been left behind. Many of the essays return to the question of text or traces of text, demonstrating that the language of autobiography, as well as the textualized identities of individual persons, can be traced in multiple media and sometimes unlikely documents, each of which requires close textual examination. These "unlikely
