Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

From regular maintenance for optimum performance to emergency repairs, this illustrated e-guide is the perfect handbook for beginners and experienced cyclists alike. The Bike Repair Manual includes insightful information on the anatomy and functioning of all types of bikes - road, racing, mountain, hybrid, BMX and children's. Step-by-step sequences show you how to carry out repairs, from vital servicing to improving your bike's performance both on and off road. Learn how to maintain the main elements, such as brakes, drivetrain, and steering, as well as the complex components, including hub gears, hydraulic brakes, and suspension forks. Detailed chapters cover everything from the correct, safe way to set up your bike and the must-have kit for successful repairs to troubleshooters for keeping your bike in top form. Featuring easy-to-follow photographic tutorials and handy add-ons, such as a step locator and toolbox, Bike Repair Manual is the essential e-guide for every cyclist.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Whether it be the small but luxurious CB350/4 right through to the ground breaking CB750/4. This guide covers dismantling the motorcycle and its components, restoring and sourcing parts, paint spraying, decals and polishing. The chapters cover, Engine, frame, forks, fuel, exhaust, seat, brakes, tyres, electrics, up to the rebuild and on to safe setup and general maintenance and finally onto riding safely and storage.

This repair and service manual covers Honda CBR900RR (CBR900RRY 929cc 2000, CBR900RR-1 929cc 2001, CBR900RR-2 954cc 2002, CBR900RR-3 954cc 2003) European models; CBR929RR (CBR929RR-Y 929cc 2000, CBR929RR-1 929cc 2001), and CBR954RR (CBR954RR-2 954cc 2002, CBR954RR-3 954cc 2003) US and Canada models.

After disassembling and gutting your car, it is easy to feel that you're in way over your head when it comes to the upholstery. This is why so many do-it-yourself restorers outsource the work, at considerable expense, to an experienced upholstery shop. Taking the time to acquire the skills for upholstery restoration may feel like a daunting task, but what if an experienced upholsterer presented every skill you needed to restore upholstery yourself? Starting with a list of necessary tools, author Fred Mattson guides you through all the required tasks, including seat restoration; door panel removal, patterning, assembly, and installation; headliner removal and installation; carpet cutting; and even convertible top restoration. The easy-to-follow step-by-step presentation allows for a thorough understanding of all the processes. Every photo in this book provides a hands-on approach that shows you how to repair and restore a car's interior to concours, show-quality specifications. Other restoration books may show you beautifully restored interiors, but they don't show you how to produce them. This book helps you develop the skills needed with instruction from a professional upholsterer, saving you thousands of dollars over outsourcing the restoration. If you are interested in saving money, doing a complete restoration yourself, or simply want to know how it's done, this book is a handy addition to your automotive library.
